#### The Final Basketball Trip.

Although the York Athletic Club cancelled the game scheduled there for last Friday night, our basketball five played two corking good games on the final trip of the season. Swarthmore won from State on Tuesday night by the score of 30 to 26 and the Harrisburg Collegians were taken into camp on Saturday night by the score of 44 to 37. With the two Bucknell games yet to play—one here on March 12 and the other at Lewisburg one week later—our season's record now stands with six victories, and six defeats.

The Swarthmore game was almost a repetition of the contest played here with the Garnet two weeks ago, except that this time Swarthmore came out on top. The excitement was intense and the score always close, the home team feeling highly elated at winning what it considered a very fine triumph. Shore and Smith were the stars at shooting as

in the game here, with Hermann and Eberle carrying off the honors as fast dribblers. Shore's work was noteworthy in every way. During the first half our men had about four shots at the basket to every one for Swarthmore and in the second half it was much the same, but the Garnet five finally won after a pretty battle.

Reed and Blythe were "strictly in" the Harrisburg game, for "Bill" secured seven field goals and "Spi" garnered in six. This was not a bad night's work for two guards. All the points were needed, as the game was made decidedly interesting by the Capitol City boys, who played a much stronger game than when they appeared here earlier in the season. George Cockill, an old Bucknell athlete and a well-known professional baseball player, starred for the Collegians with Clansen just at his heels. Our team worked well together and well-deserved the vic-

tory; the foul shooting was good on both teams. Below are the scores on the recent basketball journey:

#### School of Mines and Metallurgy.

The Bureau of Mines of the Province of Ontario, Canada, has presented the Department Library with a complete set of the reports which it has issued. These are very complete, and cover the geology, mining and metallurgy of the ores and minerals occurring in the province.

The mineralogical laboratory has recently been equipped with appliances for making blowpipe determinations, thus increasing greatly the efficiency of the work in mineralogy.

Professor W. M. Weigel spent a few days recently in Pittsburg at the U. S. G. S. testing plant, becoming familiar with the mine rescue apparatus kept there, and also making a study of the methods of testing explosives for use in coal mining work.

Prof. C. P. Linville is attending the meeting of the American Institute of Mining Engineers, being held in Pittsburg this week.

The School has received as a donation from the U. S. G. S. fuel testing plant at Pittsburg, a very fine set of lantern slides illustrating mine rescue work, and appliances for conducting it.

Professor W. D. Crockett's lecture on "Edgar Allen Poe" scheduled for April 23 has been changed to April 22.
