Have You Ever Traveled for Business or Pleasure?

Why Not Combine the Two

Our proposition assures your expenses and you can make a considerable sum for next college year. The work is the most valuable training a young man could have.

Physicians are the best class of men to do business with and are accustomed to buying from salesmen.

Later on you will be tied down by your chosen occupation and a season on the road will be something pleasant to look back upon. There is nothing that broadens the young man and puts an edge on a keen mind like road work.

Foresters' Convention.

The spring meeting of the Pennsylvania Forestry association, held at State College, May 24 to 25 and 26, consisted of many interesting

and beneficial meetings. Prominent members of the association from all parts of the state were present, and numerous addresses were given. Aside from the average attendance of 20 or 30, many students were present at the various meetings.

On Wednesday evening, in the Auditorium, addresses were made by Dr. Drinker, president of Lehigh university, and Dr. Harshberger, professor of botany at the University of Pennsylvania.

On Thursday morning, at the meeting held in the Forestry building, the following addresses were given: "Pennsylvania," John Birkinbine, president of the association; "A prospective Forestry Policy for Pennsylvania," Dr. J. T. Rothrock; "Pennsylvania's Problem in Forestry," S. B. Elliott, State Forestry Reserve commissioner; "Private and Municipal Forests in Pennsylvania," Prof. J. A. Ferguson. Dr. Buckhout also spoke.

In the afternoon, a trip was made to the forestry reserve near Boalsburg, and a buffet supper was served at the residence of Mr. Boal. On Thursday evening, in the Auditorium, Dr. Baker gave an illustrated lecture on "Reforestation of Waste Lands", and Prof. Edmund Secest, head of the department of forestry at the Ohio Agricultural Experiment station, gave a talk on "Cooperative Forestry in Ohio" which was also illustrated.

On Friday, trips were made to the experimental plats and forestry plantations in the morning, and in the afternoon, to the Barrens. At the morning meeting in the Agricultural building, the addresses were as follows: "Forestry and Agriculture," Dr. Thomas F. Hunt; "Mutual Forest Interests of Pennsylvania and Maryland," Prof. F. W. Besley, state forester of Maryland, "Tree Planting Near Reading," Jacob Nolde; "Some Friends and Foes of Forestry," Prof. H. A. Surface, economic zoologist of Pennsylvania.

It is believed that the members of the Pennsylvania Forestry association and their visitors gained not only in strength in their own organization, but also in interest in, and knowledge of, the college. The entertainment of our visitors should always be a strong point with us and we should strive to make strangers feel that they are always welcome within our buildings or on the campus.

On To Pocono.

"There's an awful lot of talkin' round the campus here of late, About some kind of Conference in the east end of the State. They say there's something doing every minute all day long, With funny bouts and speechy spouts and many a gleeful song. And I have a funny feelin'-man!—it makes me want to go— To the Delaware! The Water Gap! Me for Pocono!"

Benefit Social.

Great eats will be in store for all who attend the social to be given Saturday evening June 3, in the Lutheran church basement by the Grace Lutheran club. Strawberry shortcake, ice cream, homemade candies and other enjoyable sweets will be much in evidence. All for the benefit of the Grace Lutheran church. Don't forget Saturday evening June 3, from seven o'clock on. Be there.

Engineers' Convention.

There will be an important convention of the engineers, manufacturers, and others connected with the industries, resident in the State of Pennsylvania, at the College on June 7, 8, 9, and 10. The real work of the convention will begin on the eighth, and end at noon of the tenth.

The special purpose of this meeting is to form a more or less formal and wholly effective organization of the various engineering societies and engineers of Pennsylvania. This is to give the engineers as a body their proper influence in the development of the State. Today, the medical profession, the profession of law, the agriculturists, bankers, and certain other interests, are so associated that when public problems arise relating to their activities, they are in a position to do valuable service in obtaining right solutions.

On the other hand, the engineers, or industrialists, lack any such satisfactory organization, and are in large measure powerless to aid the Commonwealth and their own interests in a way at all commensurate with their relative importance in the State. There are a host of problems continually arising, which we must meet, such as the control of public utilities; labor laws; the building of highways, sanitation and water supply; building, factory, and mining regulations.

Representatives of corporations within the State are urged to attend so that all may have a voice in problems that concern them most and on which their welfare and that of the commonwealth depends.

Juniors Win Championship.

Captain Anne's nine cinched the cellar-championship last Saturday by losing to 1914 by the score of 8 to 6. The game was nip and tuck throughout and neither side was sure of victory until the final inning had been played. Harlow, Glavin, and McNeal were the only players who were able to make extra base hits.

Three-base hits—Harlow. Two-base hits—Glavin, McNeal. Hit by pitched ball—Harlow, Miller. Stolen bases—Harlow, Glavin 2, Baker 2, Fennel, Trefal, Miller, Hitler 3, Johnson. Base on balls—Off Nisley, 5, off Duncan 4. Struck out—by Nisley 3, by Duncan 3. Time 2.05. Umpires—Mauthe and Henderson.
