First semester begins middle of September; second semester the first of February; Summer Session for Teachers about the third Monday in June of each year. For catalogue, bulletins, announcements, etc., address
THE REGISTRAR, State College, Pennsylvania

BY THE WAY.

The University of Pennsylvania has inaugurated a new custom—that of flying their opponent's colors in conjunction with their own at all baseball games.

Dean Baker, former Professor of Forestry at Penn State, concluded an important deal at Syracuse University by buying 90 acres of land for the forestry nursery.

The State of Pennsylvania has 25,000 college students. It stands third in the list of states, with New York and Illinois leading.

The Irving Girls, that we soon expect to have with us, gave a very enjoyable Glee Club Concert at Dickinson College.

Dr. M. E. Wadsworth, former Dean of the School of Mines at Penn State and recent Dean of the Pittsburgh School of Mines, has just handed in his resignation. Dr. Wadsworth, known as "Poppy," one of the most popular professors at the University, practically organized his entire department. Everyone regrets his leaving.

At Vanderbilt University the faculty permits the members of the two upper classes to paddle recalcitrant freshmen.

The Student Council at the University of Michigan has decided to hold its session open to the undergraduate public. The action comes after an agitation which has been hanging fire within the council for the past two years.

Captain Fry Will Leave.

After a successful career of three years as Commandant of Cadets, Captain E. A. Fry, Thirteenth United States Infantry will take up active military service in another part of the world.

Captain Fry will join the Fifteenth Infantry Regiment on the 1st of July, and will leave for China to take his post at the first opportunity. On account of inconvenient sailing facilities he does not expect to start his journey until about August 5th. Captain Fry will be located somewhere in the vicinity of Peking.

In conjunction with Captain and Mrs. Fry's numerous friends in State College, the staff expresses regret at their departure. It wishes them a pleasant journey, and hopes that they will like and enjoy their sojourn in that distant country.

New Breaker Model.

The installation of the Anthracite coal breaker model, which was donated to the School by Mr. Isaac Christ of Tamaqua, has just been completed, and the model is now ready for operation.

This is perhaps the most complete breaker model that has yet been constructed, and is built on large enough a scale so that it can be actually operated. It is thoroughly modern in its design and equipment, has rope drive throughout, and is provided with shaking screens, and Christ Jigs. This model may be seen in the Machinery room, at the lower end of the Mining Building.

"Ice and Refrigeration" for April contains a discussion by Professor Wood on the disputed question of saturated ammonia tables. The article contains the results of determinations made in 1910 at the college.

The Royal Union Mutual

of Des Moines, Iowa

Has never lost a dollar either in principal or interest.
Its policies are protected by a deposit with the state.
They have made the best settlements ever made by any insurance company.
They have the lowest participating premiums.
They earn more money on their invested funds than any other company doing business in Pennsylvania

College Boys, Attention!

Young men often say to me, "What good will a life insurance policy do me if I die?" Bless your heart, tell me of anything that will do you any good if you die. But it will do others good. It will help to reimburse that mother or father, if you die, who scratched and saved to put you through college. And if you live and keep up the payments to maturity, I can tell you of policies that will not only protect those you love or to whom you may be indebted for funds to complete your course, but will pay you back personally at maturity all you put in or more. Do you know that after you have paid one full annual premium in my company, should you become totally and permanently disabled and unable to earn money, your policy will become a fully paid policy for the face of it? The latest wrinkle in life insurance. Let me tell you about this—also many other things that will surely interest you—and make you money.

New York Life Ins. Co.

JESSIE D. WHITE, 124 W. College, Ave.

Alumni Notes.

C. G. Stoll, '03, formerly Engineer of Methods of the Western Electric Company, N. J., has been promoted to the position of Superintendent of Manufacturing at the New Jersey plant.

Hurst, '04, is a foreman of substations on the P. R. R. with headquarters at N. Y.

Romig, '05, formerly with the Western Jersey & Seashore R. R. at Camden, N. Y., has been transferred to Altoona for the P. R. R.

V. F. Harkness, ex-1911, is located with the Westinghouse Lamp Company at Bloomfield, N. J.

Dr. Stecker is Honored.

At a recent election Dr. Stecker was elected a member of the "Societe Mathematique de France," of France. This organization is the only one of its kind in France and we feel justly proud that one of our faculty should receive such distinction.

Dr. Stecker is also an active member of similar societies in Germany, in England, and in the United States.

First Soccer Game.

In the first of the regularly scheduled class soccer matches, the freshman soccer team defeated the junior soccer team one goal to no. 1915's victory was the result of their superior aggressiveness, the ball remaining in their opponent's territory during the greater portion of the match. The stars of the match were Meixner and Valentour for the Juniors and Tobin and Corbin for the freshmen.
