WEDNESDAY, APRIL 16, 1913

One can hardly over-estimate the Penn State value to a college of a trip like that taken by the glee club. There is a great deal of honor in the representatives of our college being chosen to make the trip, when the number of applicants for the favor is considered. Moreover, a still greater source of pride should be the favorable impression made by the club, as western papers unanimously testify. Superintendent S. E. Busser, who has charge of securing the Santa Fe entertainments each year, and who was present at the concert given by the club in Barstow, Cal., pronounced it the best he had heard produced by any college glee club.

Credit should be given to E. G. Hollister, Penn State '11, a Santa Fe man, of Albuquerque, N. M., who not only secured the trip for the glee club, but was with the club after leaving Chicago and managed the trip as far as railway connections and accommodations were concerned. The success of the club as a musical organization has been due largely to the untiring efforts of Director C. C. Robinson; and finally, congratulations should be offered the club members themselves for their ability to prepare and give such an excellent program as that enjoyed by western audiences.

The Landscape Gardening Department and students are putting forth more efforts than ever before, this spring, to beautify the campus at the college entrance and about the various college buildings; but their purpose is hardly to furnish shrubbery to be used as receptacles for papers, cans and other rubbish. Along this line, all are requested not to lessen the natural beauty of our campus by carelessly littering it with paper and the like.

With the opening of the college baseball season, one cannot help being impressed by the attendance and the enthusiasm shown at the games on New Beaver Field. However, for the benefit of

new men at least, it may be said that it has always been a custom at Penn State never to leave a varsity game before it is finished, no matter how certain the result may be. Nothing could be more discouraging to the members of a team than to feel that their efforts are apparently not of sufficient interest to hold the attention and presence of a few of their fellow students; even though the actions of the latter in leaving are due to thoughtlessness rather than lack of interest. Strict observance of this "unwritten law" as to leaving ball games will doubtless be appreciated both by the varsity men and spectators alike.

Military Drill.

The following is the progressive scheme of Practical Military Instruction to be followed during the second Semester 1913:

- April 7. Organization, manual of arms, close order—school of company,
- April 8, 9, 10. Manual of arms, close order—school of company.
- April, 11 Battalion inspection by the commandant.
- April 14. School of squad and school of company. A company, position and aiming drill.
- April 15. Extended order—company. B company, position and aiming drill.
- April 16. Battalion drill—close order. C company, position and aiming drill.
- April 17. Company, close order. D company, position and aiming drill.
- April 18. Battalion inspection.
- April 21. School of squad, close and extended order.
- April 22. Instruction in loadings and firings, extended order.
- April 23. Battalion, close order.
- April 24. Company, close and extended order.
- April 25. Battalion inspection by Cadet Majors.
- April 26. Company, close and extended order.
- April 29. Problem, company, in troop leading, and establishing outpost.
- April 30. Problem, advance guard, rear guard and flank guard.
- May 1. Battalion, close order.
- May 2. Regimental review and inspection.
- May 5. Combat exercise company, "the advance" and occupying defensive position.
- May 6. Combat exercise, "the advance on an occupied position".
- May 7. Battalion, parade, review and inspection.
- May 8. Regimental formation, parade, review and inspection.
- May 9. Regimental formation, parade, review and inspection.

Commencement Guests.

The Commencement programme for 1913 has been arranged with the thought of furthering the interest in study of the French language and literature in the college. To this end the Baccalaureate sermon will be preached by Dr. Charles M. d'Aubigne, Pastor of the Reformed Church of Neuilly-Paris, France, who will be in America to address the meetings of the Second World's Christian Citizenship Conference, Portland, Oregon. The Commencement address will be delivered either by M. Jules Jusserand, the French Minister to America, or by M. de la Rocca, Counsellor of the French Embassy at Washington. It is also probable that the regiment of college cadets will be reviewed by Comte de Chambrun, Military Attache of the French Legation at Washington. It is hoped to have other distinguished French guests at the college at the same time.

The High Standard Laundry

The Student's Laundry

It has always been our sole aim to give you the best service possible to be obtained in our line. We use the best of supplies, this with good machinery, expert help and the use of good "hoss" sense gives you laundry work to be proud of. See our sanitary shirt, collar and necktie cases.

ENGINEERING NOTES

P. M. Rainey, engineer with the Western Electric Company, New York, spent three days at the College during which time he lectured before the senior electrical engineers on the joint use of lines by telegraph and telephone companies. Friday evening, April 4, a very interesting illustrated talk was given by Mr. D. R. Mason, Metallurgical Engineer, with the National Tube Co. By the use of his excellent lantern slides, Mr. Mason explained very clearly the manufacture of steel tubing.

Tuesday evening, April 8, the student section A. S. M. E. had the pleasure of an address from Mr. H. A. Hey, Assistant to the Secretary of the A. S. M. E. Mr. Hey set forth the advantages of student membership in the A. S. M. E. in such a way as to stimulate interest among the non-members present and to make the members appreciate more fully the value of their affiliation.

Mr. Mason and Mr. Hey are both Penn State graduates.

Friday morning, April 11, at 11:20 the students of the College, interested in engineering, were given an exceptional privilege by listening to a lecture by Mr. C. D. Young, Engineer in charge of the testing work of the Pennsylvania Railroad. Mr. Young in his talk touched on the present practice in railroad work in the use in super-heated steam, electrical engineering in steam road work, and apprenticeship courses for engineering graduates.

Mr. E. W. Bush, well known as a bridge engineer, and president of the Alumni Association, spoke last Friday before the senior engineering students on the subject of "Handicaps to the Engineer." His lecture was exceedingly practical, entertaining, and useful, and was delivered before a good sized and attentive audience.

The Senior Highway Engineers scraped and dragged College avenue and some of the other streets in town on Monday, to the obvious benefit of the streets. This work of the students is done in connection with the Highway Engineering course.
