## HOSPITAL ASSURED.

Cornerstone of Needed Institution to be Laid Soon.

On Monday a committee of the Board of Trustees was at the college and selected a site for the proposed hospital, to be near the wireless tower, facing the road on the north. The space available is not large, but is on a steam line, which is a necessary condition. Plans for the construction of the new building have not been definitely decided upon, but the cornerstone is to be laid at 4:30 Wednesday afternoon of Commencement week.

Money available at present amounts to about \$10,000, about half of which has been raised in various ways among students, the rest by the "Hospital Committee". It is estimated that, to erect the kind of building desired, at least \$10,000 more is needed, besides an endowment of \$12,000 to insure running expenses. With the money now at hand, only a small structure can be built, perhaps thirty by forty feet, with provisions made for future enlargement. The building now used as an infirmary will be continued for the reception of contagious diseases.

## Farmers' Excursions.

On Thursday, June 5, the authorities of the college, co-operating with the Pennsylvania Railroad, will have plans for an interesting and instructive day at the college for visitors who may avail themselves of excursion rates on the neighboring Pennsylvania lines. A special train will leave State College at 6:00 p. m., on the same day.

Under the auspices of the college and the State Grange, an invitation has been extended to members of the Junior Grange to visit the college on June 18, when special arrangements will be made for their entertainment. The purpose of these excursions is to create popular interest in the School of Agriculture and in the college in general.

## A. S. M. E.

At a meeting of the student branch of the A. S. M. E. Tuesday evening, May 6th, the following officers were chosen for the next year: President, H. L. Swift, '14; Vice President, C. F. Kennedy, '15; Secretary, Homer L. Hughes, '14; Treasurer, R. B. Rudy; Faculty Advisors, Prof. J. A. Moyer and J. A. Mease.

After the election of officers the program consisted of a paper on the Diesel Engine by A. L. Foell, and a paper on Steam Turbines by H. L. Hughes. Each man discussed the cost of installation and operation of the above mentioned prime-movers as compared with other machines of the same class.

## A Reminder.

It may be well to again call attention to the new bulletin board recently placed at the Co-op, which has not been used as extensively as it might, though a very convenient means of announcing certain kinds of meetings. Full directions as to posting of notices are printed within the case, and the board was designed for notices of regularly scheduled meetings and those in which everybody in general is interested.
