THE REGISTRAR, State College, Pennsylvania

What Profession are You Choosing?

If it is either **MEDICINE, DENTISTRY, PHARMACY or CHEMISTRY**, do not fail to learn the advantages of

The Medico-Chirurgical College

OF PHILADELPHIA

It is in the City which has been and still is the American Center of Education in these Sciences. It has Departments of and grants Degrees in all four of them. It has its own Buildings comprising well-planned and well-equipped Laboratories, a large modern Hospital, and the finest clinical Amphitheatre extant. Its Courses in each Department are carefully graded. It has abundant and varied Clinical Material. Its Faculties are renowned and of high Pedagogic ability. Its Training is essentially and thoroughly practical.

Special Features are Personal Instruction and Individual Work. Free Quizzes. Ward Classes limited in size; Practical Clinical Conferences; Modern and Modified Seminars; Special Lectures by eminent Authorities; Practice and Training in Technique, etc., etc.

Write to-day to the Dean of the Department in which you are interested for announcement describing the course and containing full information as to fees. Compare the advantages this college offers with any other before making a final decision. Seventeenth and Cherry Streets, Philadelphia, Pa.

IT KEEPS US HUSTLING

to supply the necessary demand for our bread, cakes, etc. The more people try our oven products the more steady customers we secure. For the reason why just try our bread on your own table. The test of taste will be more convincing than any words of ours.

Advisors' Ruling Explained.

Probably no recent rule has caused so much discussion as that of the Freshman Advisors' printed last week. In order to give a more complete understanding the ruling is printed in full with an explanation of its purpose and administration.

Those students on probation shall not participate in athletics or other student activities so long as the probation lasts.

Those students having a deficiency from the first semester shall not participate in athletics or other student activities until that deficiency is removed.

Those students below grade in work aggregating more than three credit hours shall not participate in athletics or other student activities until the deficiency in college work shall be brought within the limit of the three credit hours.

The purpose of this rule is (a) to protect the college from the criticism of parents that their sons are permitted to waste time in extra scholastic pursuits, (b) to compel students to put enough time on their studies, (c) to furnish an incentive to students for a higher grade of scholastic work.

In view of these purposes the advisors will use their judgment in applying the rule. For example, first months grades in some subjects are not final by some schools and will not eliminate a student from extra-class activities. Or again, where men are merely practising in view to entering public performances and the stoppage of that practice would result only in placing the men back in the gymnasium or military drill for several hours a week, they will not be prohibited from continuing their practice. According to the rule, a student will be permitted to re-enter extra-class activities as soon as he can bring evidence from his instructors that he is above grade. The foregoing examples are merely suggestive and each case will be dealt with on its merits with the intention of the rule in mind.

Gymnastic Tournament.

The annual boxing gymnastic tournaments will be held in the Armory Saturday, night March 28. This is the first gymnastic tournament to be at Penn State and should prove quite interesting. It will consist of competitive work on the parallel bars, horizontal bars, swinging rings, vaulting bar, horse and mat.

All entries should be handed in at "Doc" Lewis office by Wednesday night, March 25.

The engineers of the university of Nebraska have nearly completed a giant telescope. The barrel of this sky gun is 20 feet long, with 12 lenses, and has nearly 1200 different parts.

Experimental Convention.

The first Cattle Feeders Convention ever held in Pennsylvania will occur at State College, April 3.

At that time the steer feeding experiment for the year will be closed. Sixty head of West Virginia cattle have been fed this year. These have been divided into five lots and fed different rations. Some interesting results are being obtained that should be of immense value to Pennsylvania feeders. The results will be presented at this meeting. It will also afford an opportunity to see the cattle and note their condition before they are sold. A competent commission man from Pittsburg stock yards has been secured to value the cattle in the day of the convention. A program has been arranged at which the different phases of cattle feeding and marketing will be discussed. This meeting should be of particular interest to cattle feeders in Pennsylvania as it is in direct line with one of their live stock problems. Every cattle feeder in Pennsylvania should make an effort to attend this meeting at State College on April 3.

Varsity Soccer Schedule.

The following schedule, which will be increased, has been announced by the soccer manager: March 28, varsity vs. sophomores; April 4, Lafayette pending; April 18, open; April 25, West Virginia at State College; May 2, varsity vs freshmen.

An important meeting for soccer men will be held in room 209 Engineering building tonight after the mass meeting. More than sixty men are expected to report for practice which will commence as soon as the condition of the field permits.

An effort will be made to form an interclass league this spring which will serve as a reserve force for the varsity squad. The management has made application for entrance into the intercollegiate league and expects favorable action. The sport is being boomed in most colleges and deserves the support of every State man.

Engineering Lecture.

Mr. Howard Rhode of the Lehigh Portland Cement company will address the Engineering Convocation in the Old Chapel, Friday evening, March 20, at 7 o'clock, on the Manufacture of Portland Cement. The lecture will be illustrated with moving pictures. At 3:20 in the afternoon of the same day Mr. Rhode will address the seniors and juniors in Civil Engineering on the subject of Concrete Road Construction, in room 220, Engineering Building. All interested are invited to attend these lectures.
