School of Mines Notes

On Monday evening, March 15th, Dr. Heinrich Ries, head of the Department of Economic Geology at Cornell University and one of the leading authorities on the clays and the clay industry, addressed the mining society and its friends on the Relation of Economic Geology to Mining with an additional short talk on the clays.

The junior metallurgists with Professor McQuigg in charge will leave for their eastern trip on April 6th. They will visit the plants of the New Jersey Zinc company at Palmerton, New Jersey; the United State Metals Refining company at Chrome, New Jersey; Raritan Refinery; National Lead company; Electric Smelting and Aluminum company; and Henry Maruer company, at Perth Amboy, New Jersey; Balbach Smelting company at Newark, New Jersey; Nichols Copper company at Long Island, New York; and various places of interest in and about New York City.

The members of the junior mining and mining geology classes leave Saturday, April 4th, for two weeks of bituminous coal mining practice. A week to 10 days will be spent at Boswell and Jerome in studying mining methods in the mines of the United Coal company. Visits will also be made to the mines of the Berwind-White Coal company at Windber; various operations near Connelsville; the H. C. Frick operations near Mt. Pleasant; and finally a visit to the U. S. Bureau of Mines Station at Pittsburgh and the Government Experimental Mine at Bruceeton.

Early Work-outs

Interest in our wrestling activities has been very marked in the season which recently closed. This fact was evident not only in the support which the student gave their team, but also in the number of men who competed for the various weights.

Of this year's team we lose Sayre by graduation, consequently the substitute men will be called upon to care for the light heavyweight class which he so ably filled.

It is essential that new men be developed in all the weights. With this in mind, it is proposed to have work-outs on Tuesday and Friday evenings when members of the varsity teams will be there to help those who come out. The first year men will find in this plan an opportunity to develop material for their next year's class team, and the men who were trying out for the team this past season will find opportunity to improve their chances for making good later on.

Two Year Athletic Meet

Before a large and enthusiastic audience the Two-year Agricultural Athletic Association presented its first meet on last Thursday night in the Armory. The contests, which consisted of a wrestling meet and a basketball game between the two classes, resulted in victories for the seniors.

The wrestling meet was well contested with the result in doubt until the final bout was decided. Director Lewis officiated, but had no decisions to render since every bout was won by a fall.

The basket ball game was fast and close throughout the entire contest. Wertz starred for the first year men, while Gill showed up well on the second year team. The game resulted in a 24-20 victory for the older men.

2nd year		1st year
Finger Capt.	f	Capt. Cadwell
Creed	f	Reitler
Gill	c	Pierson
Henderson	g	Wertz
Black	g	Longaker
Referee, Lewis.		Time of halves 20 minutes.

Baseball

The next issue of the paper will contain the line-up of the team and a sketch of each man on the team.

There is a difference between fruit growing and forestry

yet most of the directions for fruit growing are directions for producing rapid wood growth only. This means coming into bearing late and irregular bearing on account of lack of enough available mineral plant food to raise a crop of fruit and to set strong fruit buds in the same season.

POTASH

Two years before the trees are expected to come into bearing the annual application of minerals should begin, using 50 to 100 pounds Murrate of Potash and 100 to 200 pounds of bone, acid phosphate or basic slag per acre. Potash improves the flavor, shipping quality and keeping power as well as the yield of fruits.

Write us for Potash prices and for free books with formulas and directions.
