THE KELLOGG-HAINES SINGING PARTY.

The Marcus A. Kellerman Company

The Marcus A. Kellerman Company, which will present its entertainment in the Auditorium on November 7, is a musical organization composed of famous persons in musical circles of whom Mr. Kellerman is the leader. The New York Tribune says "Marcus Kellerman's voice is one of great

beauty and has an especial merit of vital resonance. His art is most admirable". The violinist, Miss Sara Gurowitsch has made a great hit in New York as a 'celloist. Mr. Parson, who is the pianist of the company, is a Russian who entered the conservatory at 10 years of age. Before his graduation he was recognized to be the best pianist in the institution.

Departmental Notes.

The department of Botany this year has the largest enrollment that it has ever had. There are 460 undergraduate students and six graduate students. The department has just purchased the latest model of a Spencer Microtome, a machine that will cut material for cross-sections accurately to the two-hundred-thousandths of an inch.

On Saturday, November 14 the new Stock judging pavilion and barn will be dedicated. Professors Larson and Tomhave have the program in charge. It will include some very interesting events both for the students and the visitors.

Professor Larson gave addresses the first three days of this week before the Milk Testing association, the American Butter Manufacturers Association and the Official Dairy association all of which had conventions in Chicago. Professor Putney of the same department attended these meetings.

Juniors and seniors in manual arts have begun their work under the care of the Engineering Extension division with an enrollment of 28. The division also supervises the manual arts work in the Bellefonte High school where the enrollment totals 70 in these courses.

Dr. E. C. Woodruff, assistant professor of Electric Railway engineering, will be one of the speakers at the meeting of the American institute of electrical engineers in New York City on November 13. His paper will be upon "Graphic Methods for Speed-time and Speed-distance Curves in Electric Railway Calculations".

Mr. R. H. Spahr has been appointed instructor in the extension division of the School of Engineering. Mr. Spahr is a graduate of the School of Engineering of Washington and Lee university and received a M. S. degree from the University of Kentucky. He was instructor and later assistant professor in the University of Kentucky; in the construction department of the Canadian railroad for one year; and spent most of the last year in Chautauqua organization work. He is now engaged in organization work the extension division of School of Engineering in the eastern part of Pennsylvania.

Engineering extension classes have recently been organized in Erie. The most important classes

are shop arithmetic, shop sketching mechanical drawing, power plant economics, scientific shop management and accounting, automobile engineering, practical electricity, and sheet metal design.

The Pennsylvania Day exhibit of the School of Engineering will be located in Engineering D, (the new building directly being the main engineering building). The exhibit will serve as a dedication of this building although there will be no formal exercises. There will be a main exhibit in the central portion of the building, representing a model gasoline electric power plant suitable for a country estate. Around this central exhibit there will be others representing work in all the departments of the School of Engineering.

Professor Diemer has been busily engaged during the past few weeks in organizing a class in industrial management in Erie. Some of the most prominent industrial leaders of that section have elected the course and great interest is shown in the work. At each meeting one of the men assume charge and discussions on different problems of management are given. Professor Diemer will keep actively in touch with the work.

Alumni

From the Gulf Refining Company, of Port Arthur, Tex., comes the following: "There are six Penn State men with this company and all are eager to hear of the things going on at Old Penn State. Might say that "Rip" Mechling was the cause of our digging up two "bits" apiece for our subscription to the paper.

Below are the willing victims: J. G. Glasgow '09, E. B. Phillips '09, V. H. Transue '12, A. E. Miller '12, H. P. Ohleen '12, D. G. Mechling '14.

Al S. Wilson, end of the famous wrecking teams of '12 and '13, has recently announced his engagement to Miss Ethel M. Blair, of Dante, Va. Al is connected with the Clinchfield Portland Cement Corporation of Dante.

R. M. Koon '14, a post graduate student at Harvard, rooted heartily for the Blue and White in the famous game Saturday.

Mrs. Holmes talked on the "spiritual peace of a christian life" at the Y. M. C. A., Sunday October 18.
