THE HOME ECONOMICS GIRLS' WORK

The Home Economic department aims to further the work of scientific management and efficiency. Emphasis is placed upon efficiency and system in the practical training of the girls, both in the laboratory-kitchen and the home-kitchen. The ability to arrange her buying and planning systematically and to master all household affairs under any circumstances, are what each girl acquires.

Instruction in dietetics renders every girl capable of fulfilling the position of dietitian in hospitals. An advanced study of food composition and nutritive value is included. Instruction in cooking and serving meals to individuals, families and groups, is given. Dietetics for well, ill or convalescent persons are planned. Practical experience in serving sick trays is obtained.

A training in the method of teaching, is also acquired. A movement has been started whereby the teaching will be carried on in the rural schools. Boy Scouts are taught camp-cooking at night classes, and evening lessons for working girls are meeting with success. Classes in the town high schools and grammar schools are also conducted.

Advanced cooking for formal and special occasions, and foreign cooking are the different phases of the cookery class. Seniors plan, buy, and serve, on a business-like scale for a week at a time. A given income is allowed and the girls work in groups of four. This is done in addition to their regular class-work.

The college idea to go out and extend her knowledge to the community in which she lives, is impressed upon every girl with this training.

Departmental Notes

The increasing value of the Engineering Experiment Station to the State is shown by the investigations which have been and are now being carried on at that station. The following bulletins have recently been sent to the printer:

Bulletin 10. Elimination of Pounding in Kerosene Engines.
Bulletin 11. Distribution of Vertical Soil Pressures. Part 2.
Bulletin 12. Power Required for Grinding Pennsylvania and Argentine Cereals in Flour Mills.
Bulletin 13. The Manual Arts and Industrial Training in Rural Schools.

Bulletin 14. Purchasing Coal by Specification and Methods of Sampling Coal.
Bulletin 15. Methods of Measuring the Absorption of Ultra Violet Rays.

At the last meeting of the American Mathematical Society, held at Providence, R. I., Dr. E. R. Smith, of the Department of Mathematics, read a paper on the "Problem of Fitting Curves to Certain Kinds of Data," which seemed to attract a good deal of favorable comment.

The last number of the Bulletin of the American Mathematical Society contains an article by Dr. E. R. Smith and another by Dr. Rowe of the Department of Mathematics.

Mr. Edward H. Worthington, of the University of Pennsylvania, has been engaged as an additional instructor in the Department of Mathematics.

At Penn's inter-class track meet fast times were made. "Ted" Meridith, the Olympic champion, was defeated in the 880-yard dash by Brookes, a Freshman, who comes from Central High School.

The Dickinson faculty have decided not to hold classes from Wednesday afternoon until Monday morning, November 25-30. Here's to Dickinson faculty. May others follow in the footsteps thou hast trod.

IN THE COLLEGE WORLD.

The Haverford Student Council have passed that singing in groups, playing of musical instruments and all unnecessary noises shall stop at 10 p. m. during the football and soccer season. How did they so quickly find out the improvement policy of the "Old Main Bunch?"

A new precedent in college debating circles has been established by the league composed of Ohio-Wesleyan, Oberlin and Western Reserve University. For all inter-collegiate debates between these institutions, the use of judges will be eliminated.

The college paper of Tulane University, New Orleans, La., states that the southern schools favor the honor system.

The students at Princeton have voted in favor of compulsory Sunday chapel.

The preferences of the senior class at Yale were determined recently by a class vote. Football was chosen the most interesting sport to watch, 215 favoring it as against 62 who voted in favor of basketball. The favorite pastime is tennis, with baseball as a close second. Princeton was almost unanimously voted as the favorite college next to Yale. Harvard was second.

Upperclassmen act as advisers to the freshmen at Penn. The system is very satisfactory.

The million dollar gymnasium of Columbia University has been destroyed by fire.

There has been some misunderstanding at Bucknell concerning the wearing of freshmen caps. To avoid this, the Senior Council passed a resolution that freshmen must wear their caps when in Milton, which is four miles from Bucknell.

The fifth annual joint concert of the University of Pittsburgh and Pennsylvania State College will be held in Carnegie Music Hall, Pittsburgh, the night before Thanksgiving. A large delegation will come from State College to attend the concert and the football game Thanksgiving Day.

The Chemistry Club of the University of Pittsburgh, has introduced moving pictures into its lecture work for the first time in this country. This club is controlled entirely by students.

QUO VADIS

GEORGE KLEINE'S RECORD MAKER

Pronounced and known as the Greatest Motion Picture ever produced

Secured at an enormous expense—making a price of 25 cents admission imperative—consuming two and one-half hours' time to witness—and far from being tiresome—every moment one of pleasure as praised by those who have already had the good fortune of seeing this

Remakable Production

Unparalleled in the world for photographic beauty, human interest, dramatic power and spectacular grandeur. Never before has anything like this been attempted in State College—you will agree with us

25 cents, and worth it
