

the wing position on the right side of the line last year, switched colleges and is now attending the University of Pennsylvania this fall.

Steve Yeager, right halfback, on the 1960 football team, is now on the American football team of the National Guard. Efforts to secure his release from service have proved unsuccessful with the result that Yeager has about given up hope of being able to participate in the 1961 campaign.

In addition to the loss of these men, the 1960 team, the veteran center, will be missing the center of the line because of personal restrictions.

The second string players who will be missing the 1961 season include: Dan Fries, left guard, Kean, senior; Dave Vergo, right halfback; Fred Sutton, tackle; Oberle guard, and Man Mendenhall, quarterback. The first four men were graduated last year. Mike Fries, who was a member of the 1960 team, has withdrawn from college. "Pop" Gill, who was expected to fill one of the vacancies at guard this fall, will also be unable to play because of personal restrictions.

The members of last year's varsity team who have returned to college this fall are: Captain "Left" Hank, fullback; "Red" Smith, right halfback; "Buck" and "Carmie," left halfbacks. These men all reported in excellent condition and

(Continued on Page 4.)

Barre has taken an unusual interest in the type of work which is being done in the civil engineering profession. It is probable that several classes will be organized, of which surveying will be the most important. The various engineering societies have a long and well-merited particular interest in work at this nature and are well pleased with the advance of the work. Not only the American Society of Civil Engineers, the club, the City Engineers' office, the High School and the leading manufacturers of the city are interested in the work, but the State of Vermont indicates a successful organization.

During the last year Prof. Burr lectured at Collingdale to the operators of the Vermont Water Works, and the fact that the work was very successful it is probable that similar courses will be given this year at Fairlee and Burlington. The State of Vermont has been very successful in promoting Extension classes, which will be held in conjunction with the M. C. E. and the A. S. C. E. Under the direction of Y. M. C. A. leaders at the Engineering Extension convention last May.

In the Philadelphia district, Pottstown, Crester, West Chester, Norris-town and Ardmore have all indicated their desire to continue the work which has been done in the past years and to organize additional classes.

This issue of the Collegian is being sent to all Alumni. Those who wish to subscribe should do so at once or signify their intention of doing so in order that they will continue to receive the paper.

The present rate is \$1.25 a year, but after October 15 the rate will be \$1.50. Make all checks payable to the Penn State Collegian.
