

Bucknell Vanquished By State But Fumble Enables Them to Score

(Continued from Page 1)

but the former fumbled on the next play and Bucknell recovered. They failed to gain and in turn also fumbled. Clark rolled on the ball. Tug and Beck worked the line and the latter went around the end for a touchdown, but a State line man hid on the side and the ball was brought back, and State made no gain. It was in the next play, Beck went around the end for the first score. Cabbage kicked the goal. Score 7-0.

Clark on the next kick off back to our forty yard line. Beck and Clark attempted in carrying the ball down the field, and helped two punters on Bucknell to get the ball. The punt was placed on the ten yard line. Clark went around right end for a touchdown. Clark pointed out on the line but the latter dropped the ball. Beck losing a change of kick. Score 13-0.

WICKS RUN. The next play came so suddenly that the spectators could not believe their eyes. Beck received the kick off on his own yard line, and with a quick flick of his hand sent the ball into the end zone. Cabbage again kicked the goal. Score 20-0.

Cabbage kicked off to State but Bucknell was unable to gain either through the line or around end, so they punted. The ball found its way to our forty yard line. Beck made ten yards but fumbled. Beck however, recovered the ball. Beck and Cabbage made a first down on the ten yard line. Beck holding and State was penalized fifteen yards, as the first period ended.

An exchange of punts followed, in which State gained. Beck on the march down the field began again, with each member of the back field carrying the ball until Clark fumbled. Clark went through the line for a touchdown. Cabbage kicked the goal. Score 27-0.

CLARK AGAIN SCORES. Bucknell again failed to gain after receiving the kick off and punted. Clark and Beck made a first down, but a State penalty forced Clark to punt. Higgins and Morris downed the man in his tracks. On the next play, Bucknell fumbled and State recovered. Three yards were gained on the ball over. Clark going the first distance through left tackle. Cabbage added one more yard. Score 34-0.

Beck received the kick off and came back fifteen yards. On the next play, he went through left tackle for 27 yards. Cabbage attempted a field goal but missed. Bucknell's 15 yard line but 27 yards. Beck immediately after Bucknell had put the ball in play on the 20 yard line the ball ended. Score 41-0.

In the second half the Bucknell players who were all fighting hard, were cooled in cutting down the number of long runs. One of the most notable runs of the half was the one made by Lawrence of Bucknell who recovered a fumble made by State on State's 15 yard line and ran 57 yards for a touchdown. This making Bucknell the only team to cross State's goal line this year. A sharp contrast with the ground gained was the number and length of the penalties inflicted both on Bucknell and State. The only "ground gaining" forward pass of the game was made by Bucknell in a forward from Waddell to Hall putting a gain of seven yards.

PARRISH BLOCKS KICK. The third quarter of the game with Cabbage of State kicking to Bucknell's fifteen yard line. Beck returned the kick three yards. Because of Bucknell's inability to gain on the ball, Beck kicked the ball down. After a few minor gains Cabbage attempted a field goal. Bucknell recovered the ball on State's twenty yard line but not being able to break through State's wall were again forced to punt. Beck on a few short gains. State kicked to Bucknell. Parrish as Bucknell kicked a kick of an ability to gain the ball. Beck kicked the ball back over Bucknell's goal line where Morris fell on the ball thus giving State her first touchdown in the second half. The quarter ended with either side making any more noticeable gains.

BUT TWO BELOW GRADE REPORTS

Change in System Will Affect the Three Upper Classes—Formerly Three Reports a Semester

In accordance with a faculty action of last year which goes into effect this fall, but two below grade reports will be sent out each semester to members of the senior, junior and sophomore classes, instead of three as in former years. Reports will be sent out to the freshmen at the end of every four weeks, or according to the usual custom, at the end of the first, second and third quarters. The change affects only those students who come directly under the supervision of the various deans, and in addition to the seniors, juniors and sophomores, members of the two year agricultural classes and special students will be included in the reporting.

The reasons for these changes are various. It means that the first reports will be sent in on a basis of six weeks' work instead of four weeks as has been customary. This change will provide each student more time in which to get started with his work, and it is pointed out that many students have come to college with a belief that they are sent in on but four weeks' work, before he has time to get started. It is pointed out that his new studies are not so different from those he has had in high school, and it is said, will eliminate this undesirable feature.

The custom of sending out the second reports at the end of an eleven week period will eliminate undesirable features at the end of the semester. It was pointed out that the reports came too close to the final examination time for the students who found themselves below grade to pick up the slack. In addition, two weeks in the final examinations will be eliminated. On the other hand, the reason for contributing the old custom with the same reports of equal importance to the board of freshmen advisers. They are in close touch with each freshman, and they are like to get a line on what they are doing. The reports will be sent out on Oct. 25 and Nov. 25.

In cases where freshmen are taking advanced work with one of the upper classes, their grades will be sent in at the usual time that those of their respective classes are sent in. This will insure fairness in making out the freshmen grades at the end of the semester. The first below grade reports will be sent out to the freshmen on Oct. 18 and to the sophomores on Oct. 25. Reports for all other students will be sent out on Oct. 25 and Nov. 25.

HEALTHFUL HINTS FOR AVOIDING TYPHOID FEVER

At this season of the year, typhoid fever is very prevalent throughout the country, especially in rural districts. While just now there are no signs of this disease among the students, it is well to take care and precaution concerning the drinking water and the personal cleanliness. Typhoid fever may make its appearance.

Particular care should be taken to avoid when on a hike, drinking at fountains and especially at open wells and streams, and also eating and drinking dairy products, and other raw food stuffs.

According to the College Health Department, typhoid fever is caused by bacteria which get into water, milk, dairy products and miscellaneous other articles, and in such a way are introduced into the human body. Again, it may be transmitted by one who has at some time been ill from the fever. On three hundred and thirty cases of typhoid fever were recently traced to a single ice cream plant in this state. From this illustration it is seen that typhoid fever is easily spread from person to person through food-stuffs.

TO NEW BEAVER FIELD SPECIAL WIRE RUN OUT. In order that the results of football games played here may be sent out as fully and as quickly as possible to the various newspapers of the state, Mr. A. O. Vorse, the College News editor, has succeeded in having a special wire run out to the grounds on New Beaver Field. The special wire which has been installed gives direct service to the New York and Philadelphia newspapers, and also to the United Press, the Associated Press, the United Press, how ever, continues its attention almost entirely to the evening papers, whereas the Associated Press concentrates itself largely with the morning papers.

With the direct service that the special wire means it will be possible not only to send out the scores by quarters, but also to send out direct accounts of the games for publication in the final editions of the evening newspapers.

Establishing the new line, the college provided the necessary poles and the Western Union Telegraph company attended to the stringing of the wire.

I. P. A. STARTS ACTIVE WORK

Members of Prohibition League Inaugurate Campaign for New Members—State Convention To Be Held Here

For the coming year, the Prohibition League has made plans which are more extensive in their scope than those of any previous year. In addition to the study of the liquor problem, which has always been one of the aims of the league, the executive committee has planned for more extensive deputations work at a strong essay contest this fall, and a live, interesting oratorical contest in the winter. For the use of all those entering these activities, the books and articles on alcohol and the liquor problem will all be collected into one pile in the library and the catalogues of these subjects brought up to date.

A membership contest for new members is in full swing at present in the league. This was started a week ago in accordance with the pupular plan of dividing the old membership into two opposing sides. At the end of two weeks the defeated side will be expected to give a treat in honor of the winners.

Deputation meetings will be continued on a larger scale than last year and the work extended over more territory. The reported demonstration last year that this work can be done, recently has set a strong argument for its continuance and its extension to other colleges.

During the first week in December the preliminary essay contest will be held. The prizes in the finals of this work will be \$15 and \$10 respectively for first and second places. Any man, providing he is interested in the abolition of the liquor traffic, is eligible for the contest.

The annual oratorical contest will be held in the winter months, the winner of which competes in the state oratorical contest held at the time of the annual state convention. The state convention this year is to be held at the Pennsylvania State College about April 1, 1917, and will be the largest convention held in the history of the league. A contingent from the college, from the other colleges will be one of the new features introduced.

DATE UNCERTAIN FOR TUG-O'-WAR

Committee in Charge Unable to Secure Rope—Scrap Will Be Held As Soon As Possible.

The committee, appointed by the Student Council to conduct the Tug O' War, is still unable to give any definite information about the probable date of the scrap. It is the desire of President Sparks and of the Student Council to hold the scrap as soon as possible and the committee in charge is making every possible effort to secure a rope suitable for the contest. The committee has sent a request to the University of Pennsylvania for the use of the rope which is used there in their annual Tug O' War. No reply has been received from them as yet but one is expected the early part of this week.

Last year the rope used was borrowed from the University of Columbia but the rope is not available this year as it is in poor condition. As soon as word is received from the University of Pennsylvania, the committee will be able to proceed with their work. Every effort will be made to hold the scrap this fall and as soon as possible so as to cause no interference with the freshman football games which are usually held early Saturday afternoons. In the event of the scrap being held next Saturday afternoon, every effort will be made to give the student body notice of the time and place.

JUNIORS OF MINING SCHOOL HOLD FEED FOR FRESHMEN

Last Thursday evening, following a custom of many years, the Juniors of the School of Mines and Metallurgy gave the annual reception to the freshmen entering the school. The "feed" was held in the essay furnace room of the old Mining building, where there is ample accommodations for the looking of the "merry little 'dog'." The entire student body of the Mining School was on hand and there was much enthusiasm manifested. Dean Crane and Doctor Moore led the speaking with talks of their summer experiences, after which the new members of the Mining faculty were introduced and initiated. The feature of the reception was the initial appearance of the newly organized Mines' Sextette. Their efforts met with continued applause and they responded to many encouragements.

ARCHITECTS TO HOLD FEED THURSDAY NIGHT

On Thursday evening, October 12, the Architectural Engineering Society will hold a feed for the new Architects in room 292 Engineering building. The feed will include a short business meeting, the first of the present year. There will be several speeches by competent men and every member is urged to attend.

NEW HIGHWAY MAY BE MADE EXTEND TO STATE COLLEGE

An attempt to have a detour made from the William Penn Highway through State College is being made by the business men of this town. The route as planned involves a road which will lead from Lewistown through State to Tyrone and from there by the main highway to Pittsburgh. The main William Penn Highway as to run from Philadelphia through Lewistown up the Juniata Valley to Huntingdon and from there through to Pittsburgh. The plan to have a detour road marked on the maps, which will run through this town is being pushed by Mr. J. F. Aikens. Up to date Mr. Aikens has secured about one hundred and fifty men to contribute one dollar each to the cause. He hopes that by turning this money over to the Highway Association for improvements that the detour road will be granted. The business men hope in this way to bring many tourists, passing over the main highway, over the detour road to State College.

Do you know we carry a complete line of Ever Ready Flashlights, Batteries and Bulbs?

Our stock is fresh and the line can always be depended upon.

Step in and look over our line when in need of a Flashlight, Battery or Bulb.
