BIG WRESTLING DATES SECURED

A Meet Arranged With Princeton on Eastern Trip

The wrestling season will open with a bang this year due to an excellent schedule and a large squad from which to pick the varsity team. So far four big wins in the wrestling world, namely, Cornell, Princeton, Lehigh and Navy, will appear on State's schedule. The Princeton-Lehigh and Navy meets will be wrestled away from home on the following dates: Lehigh at Lehigh on February seventeenth, Princeton at Princeton on March eighth and Navy at Annapolis on March third. A big attraction at the very beginning will be the opener with Boston Tech. According to Coach Lewis the outlook for the coming year is very encouraging. With a squad of over twenty-seven experienced men from which to pick the team he expects to get a team which will be one of the best which State has put out in a long time. He expects that the keen competition, which will be caused by the large number of candidates for each weight, will bring out some excellent material. The squad has had two valuable additions in Simole, who wrestles in the 145 pound class, and Miller, a former "two year Ag," who has changed over to the four year course. Simole's comes from their best wrestler in his class. Although he was not able to wrestle at Cornell when there, he will be eligible to wrestle here this season. In Miller the squad has a man who is said to be second to none in the 135 pound class except Captain Long.

ITEMS OF INTEREST IN THE SCHOOL OF AGRICULTURE

Professor W. H. Darr, of the department of agronomy, will deliver a series of lectures on corn and its improvement at a meeting of Clearfield county farmers to be held Nov. 10 and 11, under the auspices of the Beechwood Vocational school near Falls Creek, Pa. The department of animal husbandry is planning to hold a stock feeding campaign in Lancaster county on Tuesday, Wednesday and Thursday, Nov. 14, 15 and 16. Professor Tomhave and Hirschman and Dr. Haysner of the College, Mr. P. S. Bayard, of the board of trustees, and members of the State Livestock Sanitary Board will address the audience. Dean W. C. Clatter, of the School of Education at the University of Missouri, will speak to the members of agricultural societies on Tuesday, Nov. 14, in room 206 of the agricultural building. Mr. Earl M. Moffit, a Penn State graduate in the mining department, will enter into the extension service of the College as assistant professor of farm management on Monday, Nov. 13. Mr. Moffit comes here from the University of Maine, where he was engaged in work of a similar nature.

COLLEGE LIME EXPERIMENT OF STATE-WIDE INTEREST

One of the most notable experiments ever undertaken by the College is now being prosecuted to determine the lime requirements of the soils throughout all of Pennsylvania. Through the co-operation of the agricultural extension representatives in the various counties in which farm bureau work has been organized, soil samples are being secured from the various parts of the State representing the different soil types. At least 400 samples are to be taken from each county. The experiment is being conducted by Professor J. W. White, of the department of experimental agronomy. All samples sent in by extension representatives are accompanied by descriptive sheets covering conditions on the different farms from which the samples were taken. These samples after being received at the College are tested and the results, in connection with the descriptive sheets, are studied to correlate the existence of acidity in the soils with such factors as drainage, green manures, fertilizers, and the insufficient use of lime. To date about 100 samples have been examined. The lime requirements as determined from the samples already received have been found to range from zero to 12,000 pounds per acre. A considerable percentage of the samples show requirements of 3,000 to 4,000 pounds per acre. When the work of analyzing the soil samples has been completed, the data will be compiled and printed in bulletin form. Rough maps will also be prepared showing the extent of the requirements for soils in the areas studied and the relative areas of acid and alkaline soils.

BIG ENROLLMENT AT NEW EXTENSION SCHOOL

The Wilkes-Barre Engineering Extension School now has enrolled more than 100 students in the courses in mechanics, surveying, and the study of cement and concrete. It is probable that an instructor will be placed at Wilkes-Barre to give his entire time to the branch there, which has opened with a remarkable enrollment considering that the courses are distinctly technical, and somewhat advanced in their nature. It is planned to give practical field work in surveying and to this end the necessary instruments will be provided as soon as possible for use in this course.

DR. CRANE RECEIVES NEW STATE APPOINTMENT

Dean Crane, of the School of Mines, has been appointed a special commissioner by Governor Brumbaugh to confer with commissioners from other states in regard to the unification of the mining laws of the various states. The conference of the commissioners will be held in conjunction with the meeting of the American Mining Convention, Chicago, November 13-16. Dean Crane will also attend the meeting of the last named body as a delegate from the State of Pennsylvania.

WILL GIVE PLAY FARMER'S WEEK

Planning Production of "Back to the Farm."

Dean Watts and Professor Marshall are now planning to produce a play during Farmer's Week, the purpose of which is mainly the entertainment of the people from the rural districts who will be here at that time. Professor Marshall originated the idea and Professor Marshall will train the actors. A call has been posted for men who will be in State College during the Christmas season and it is on these men that Mr. Marshall will depend for his players. He desires that every man who possibly can will answer the summons and join the activity. Every year at this time some means of entertaining the farmers must be found, and up to the present time the program has been mostly in the form of lectures. But this year Dean Watts thought of a new form of entertainment and now is working with this idea in view. The play will be called "Back to the Farm" and is a simple little reproduction of farm life. Its purpose, according to Dean Watts, is two-fold, first, merely as a plan of entertainment, and secondly it offers a way by which the Liberal Arts school may demonstrate to the visitors, the value and results of its training. It may also serve as a means of showing the men from the rural districts some plan of amusement which may be carried out for their boys and girls. In regard to this, Dean Watts states that the country people are falling behind in the matter of amateur performances, and it is hoped that they may receive some good ideas from the exhibition here.

VARIETY AT CORNELL

The Freshman class at Cornell contains 1,170 men, coming from forty-four states of the Union, five dependencies and sixteen foreign countries.

STATE SWAMPS GENEVA ON FLOODED GRIDIRON

(Continued from Page 1) but this time was forced to kick after several fumbles. But the westerners could do nothing when they had gained possession of the ball. It is true that they won their only first down at this point but it was due to a fifteen yard penalty inflicted upon State. The quarter ended shortly afterwards with Geneva holding the ball. Score 20-0. On the first play during the second quarter, Geneva fumbled and State promptly recovered. Jones scored the next touch-down after every man in the back-field had done his little bit in carrying the ball within striking distance. Cabbage hoisted the leather for another point. Score 27-0. Robb is injured. Cabbage decided that the back-field were doing too much running so he received the next kick-off and returned the ball to Geneva's 40 yard line. It was during the next few scrimmages,

that Robb was injured. It appears that he strained a muscle in his hip while slipping in the mud. Gross replaced him. The next touch-down resulted from a forward pass from Cabbage, the latter running 30 yards before he planted the ball between the posts. He easily added another point with his trusty toe. The score now stood State 34, Geneva 0, and after the following kick-off State continued in the same manner as before and steadily worked toward the Beaver Falls boy's goal line. But this time the ball was lost in a fumble and Geneva attempted to punt out. Conover broke past the defence and recovered the fumble for a touch-down. Cabbage again kicked the goal. Score, State 41, Geneva 0. The half ended shortly afterwards.

And Still They Go.

In the first part of the second half Geneva seemed to brace for a few minutes, only to weaken a little later and to be as ineffective as in the first half. Geneva kicked to Conover on the thirty yard line. He returned the ball five yards and after five plays Edgerton made a wonderful run around right end for fifty-five yards and touch-down. Cabbage kicked the goal. Geneva kicked to Conover on the forty yard line. In successive plays State carried the ball down the field for three first downs. State was penalized five yards for holding and after one more first down, Gross crossed the line. Cabbage failed to kick the goal. Score, 51-0.

HERMAN'S MEN VICTOR OVER PENN FRESH

(Continued from Page 1) Penn fumbled on their 15 yard line and Rauch picked up the ball and made a touch-down. Miller kicked the goal. Score, State 7, Penn 0. Penn fumbled the kick-off and Black

recovered for State. Wolfe made ten yards, and then Melroy plunged over for a touch-down. Miller again kicked the goal. Score, State 14, Penn 0. Miller kicked off and Penn began a march down the field, taking the ball to State's 20 yard line, where the half ended, and Penn scored. At the start of the second half, Wolfe returned the kick-off 60 yards in a beautiful open field run. State failed to gain however, and it was Penn's ball. Miller intercepted a forward pass. He attempted another field goal, but it was blocked and Penn recovered the ball. On a series of forwards, Penn carried the ball to State's 20 yard line, where Miller again intercepted a pass. Wolfe punted, and on the first play, Osborne intercepted a forward. Wolfe made ten yards as the quarter ended. Miller and Wolfe made a first down, but holding cost 15 yards. Wolfe got loose around end and went for 30 yards. Dunbar failed to gain and Wolfe made five yards. The ball remained about the middle of the field from that point until the final whistle blew. The lineup: Penn Freshmen 6 Penn State Fresh 14. Wallace..... left end.....Rauch Graves..... left tackle.....Hills Dieter..... left guard.....Hart

VENUS 10¢ PENCIL

17 Perfect Degrees from 6B Softest to 9H Hardest and hard and medium copying

VENUS 10¢ PENCIL

17 Perfect Degrees from 6B Softest to 9H Hardest and hard and medium copying

LIKE a soft-leaded easy marking pencil? Take the higher numbered B's such as 3B, 4B, 5B. For the extreme limit of softness 6B is without an equal and is used by many as being the ideal of all pencils.

Medium degree is HB. It's are the harder grades, 2H or 3H being used for thin, clear, fine lines of detailings. Your professors will confirm these statements as to the merits of VENUS pencils. Note the distinctive VENUS water mark finish when you buy.

FOR A COLD

Take Gilliland's cold tablets and Syrup White Pine and Tar. This combination will release any cough or cold within a few hours.
