

Military Developments (Continued From First Page)

protecting coast cities, or the merchant marine. Atlantic Coast Naval District. For the above named purposes three districts have been created on the Atlantic coast. The first district is in command of Captain W. R. Ruse, Commandant of the Charleston Navy Yard, power boats, and 5,000 men have been asked for, and a large number have already been offered. The first work is to take a census, or inventory of the various craft offered, and enlist those boats and crews most suitable for the different classes of service. The second naval district extends from Chatham to New London, and the headquarters are at Newport, R. I. The patrol squadron and private organizations are enrolled for service in the second district, and Commandant Stuart Davis of the Patrol Squadron in Newport, enlists hereof. The third district extends from New London, Conn., to Barnegat Bay, N. J. The fourth district extends from Barnegat Bay to Virginia. The various yacht clubs on the Delaware and Chesapeake Bays, and on the New Jersey coast, have in most instances offered their boats and in some instances, their crew for service. These are now being inventoried, and in the course of time, assignments will be prepared for each boat, so that the district which it will patrol will be fully defined. According to the statement of one authority, it is understood to be the intention of the Navy Department so far as possible, to enroll the owners and crews of such suitable boats as units. The owners will be given a military rank, and will select their crew from those who are familiar with the coast in their district, or men who are skilled in the operation of high power marines, engineers, or those who are wireless operators. As far as possible, these boats will be selected from the friends of the owners. Navy Officers to Command. It is the intention of the Navy Department to place an enlisted naval officer aboard each boat as commander, so far as is possible. To be eligible for enrollment in class 4, it is necessary to furnish satisfactory evidence as to ability, character and citizenship. Men will be enrolled for service according to their experience, for instance, as navigators, engineers, electricians, or wireless operators. The Navy Department desires to have a variety of boats offered for service with the idea of classifying them according to their size and speed. It is planned to classify these boats into four groups varying in length from 40 to 60 feet. The government itself has thus far built one 40-foot and one 60-foot boat, but no other contracts have been let for this type. The boats constructed under these classifications will be used largely for harbor service and light offshore work, since information received from abroad regarding the performance of the 800 to 900 sixty- and eighty-five-foot submarine chasers, built by American firms for foreign governments, indicate that even the largest of these boats can not be used for continuous offshore service. For the last named service it is the plan of the Navy Department to build 110-foot motor boats of steel construction. It will take about four months to build the first boat after which time they can be produced with greater rapidity. It is planned to build about 200 of them by dividing the order among all available builders. Other Colleges and The War. At Cornell University the Varsity boathouse has been closed because of the war, only inter-collegiate crews will go on the water. On April 14th the Cornell Ambulance Unit departed from New York for France. The party consisted of 33 men and each of them drive machines. Funds for the support of the party have been provided by the contributions of the students, faculty and alumni. At the University of Pittsburgh under the leadership of Colonel H. B. Meller, former member of the National Guard of Pennsylvania. Drill exercises have begun at Columbia University. One hundred men have signed pledges to drill every afternoon and as new men sign, additional companies will be formed. A Naval Unit has been formed at the University and the members are receiving instruction in piloting and gas engine operation. Syracuse University is endeavoring to raise a Hospital Unit for service in France. It is hoped to have 20 men doing ambulance service at the front by July 1st. Ten companies started military training last Friday. The student bodies of all the smaller colleges of the State have begun plans for military training and in many of the colleges lecture courses of a military nature have been started.

DR. O. F. BOUCKE ON FINANCING THE WAR

What the Government Wants is Industrial Mobilization—Not Military Aid; Must Produce More

Dr. O. F. Boucke, of the department of Economics and History, gave the second of his series of three lectures on "War Finance," last evening at a well-attended meeting in the Liberal Arts Assembly Room. As was the case at the lecture last week, many were unable to gain admittance to the room. His subject for this lecture was "What the Government Wants." Last week he spoke on the topic, "How Can We Save?" while next Tuesday he will take up the question, "How Shall We Satisfy the Government?" The underlying thought expressed in last night's address was the importance of industrial mobilization. Noteworthy statements made in this lecture were as follows: "We cannot suddenly find new natural resources, but more of our must work privately, or for the government and we must also work more efficiently. But more especially, we must produce more materials and less luxuries. In other words, all wars involve a shifting of labor forces and a change in modes of living, as shown in Europe today. More women and youths will be called to labor, greater economy and higher ideals of citizenship will be needed, and in particular, the farmer will have to produce enough not only for home consumption but also for the Allies as well, while consumers must be less wasteful. "In the long run, industrial mobilization and a readjustment of individual to national interests is more important than military aid. However, the seven billion dollar loan will be succeeded by further taxes for military purposes, so that only by frugality or harder work we shall be able to maintain our present level of living. This means that taxation must hereafter be designed to encourage right production and restrict undue concentration of private incomes. far as is possible in mind, we shall be in a position to win the war, but it will necessitate departures in internal and external policies for long decades to come." In connection with his first lecture last week on "How Can We Save?" Dr. Boucke advocated producing more and consuming less. He stated in this talk that, "The government does not depend on what we ordinarily think of when speaking of banks, but on existing goods, as kept in the cold-storage plants, grain elevators, and basements of homes. These latter are our true saving banks, or in other words, it is not only money that counts in war time but food and other necessities." He mentioned the fact that many luxuries can be foregone and thus leave the labor and capital employed in their production free for producing other necessary things. In giving examples of such luxuries, he included articles such as alcoholic liquors, tobacco, automobiles, confectionery, jewelry, etc.

SPEAKS ON ARCHITECTURE The Landscape Gardening Society was addressed by Professor A. L. Kocher, of the Architectural Department, last Wednesday evening in the Hort Building "Colonial Architecture in Pennsylvania" was the subject of the address and the Professor used many slides to illustrate the various types that are to be found in this locality.

We have no particular hours but we are particular at all hours. Mowry's Cafe

THE PRIDE OF THE CLAN Matinee and Evening THURSDAY, APRIL 26 AT THE NITTANY

Cornell University Medical College IN THE CITY OF NEW YORK Admits graduates of Penn State College presenting the required Physics, Chemistry, and Biology. Instruction by laboratory methods throughout the course. Small sections facilitate personal contact of student and instructor. Graduate Courses leading to A. M. and Ph. D. also offered under direction of the Graduate School of Cornell University. Applications for admission are preferably made not later than June. Next Session opens September 25, 1917. For information and catalogue, address THE DEAN, Cornell University Medical College, New York City.

L. P. A. Convention (Continued from first page)

dollar war fund. Will the government be forced to accept the great revenue derived from the liquor traffic, or will other means of raising money be found? That is the question which is to be noticed, according to ex-Governor Hanly. Other Speakers. Doctor D. L. Colvin, national president of the L. P. A., spoke to the freshmen in chapel on Sunday morning and in the afternoon he also led the conference of delegates. Professor Charles Scanlon, general secretary of the U. S. Presbyterian Board of Temperance, was the speaker in college chapel, at the Y. M. C. A. meeting in the evening and at a Union meeting of churches and college in the Auditorium later in the evening. At the business meeting of the association on Saturday night, the following officers were elected for the coming year: President, Lloyd Minjoka, W. & J. vice president, R. H. White, Gettysburg; secretary, M. W. Scanlon, Pitts; treasurer, G. B. Horner, Juniata, and reporter, C. W. Klapp, 18, Penn State. Grove City Orator Wins. George K. Bamford, of Grove City College, was awarded first place in the Oratorical Contest on Friday night. The subject of his oration was "The Food Within the Lines" and both the presentation and the subject matter were of high class. His delivery was polished and forceful, while his statistics and reasoning were very convincing. First place carried with it a cash prize of \$50 which was given by Charles L. Huston, a prominent prohibitionist of Coatesville, Pa. The second prize, of \$25, was equally divided between Lloyd Minjoka, of Washington and Jefferson College and Walter D. Mehring, of Franklin and Marshall. The former took for his subject, "The Conservation of the Race" while Mehring took up the question of "Who Must Recruit the Saloon?" The other speakers in the contest were B. G. Dixon, Juniata College; J. R. Milligan, University of Pittsburgh; L. A. Spencer, Penn State; and H. M. Reape, of Dickinson. The awarding of places was done by two sets of judges, Professor N. P. Benson, Lock Haven Normal School; Professor T. B. Davis, Superintendent of Schools, Blair County; and Professor F. L. Patton, Penn State, basing their judgment on the thought and composition of the orations; while F. W. Robbins, Superintendent of School, Williamsport, B. D. Furst, Esq., Lock Haven, the Rev. W. H. McKinney, Hollidaysburg, and Professor J. H. Holton, decided upon the manner of delivery. Then by mathematical calculation, the man with the highest score was awarded first place.

One Big Inning Wins for State (Continued From First Page)

safe on Adam's error, and on Shannon's tap, Howard threw to the stand trying to get Peters at the plate. Riden also scoring. Shannon took third on Clark's out and Bowser walked. On the double steal, Runetto's throw went to center field, Shannon scoring, but Bowser was out trying to make third. Adam's single, Hall's out and Blythes single permitted Adam to score in the seventh. The final score of three runs came in the eighth on a series of short hits and Susquehanna errors. TELLS OF BIRDS An appreciative audience heard Colonel G. O. Shields give his talk on Wild Animals and Birds in the Old Chapel last Thursday night. He came to Penn State under the auspices of the Agricultural Society, and told particularly of the destruction of crops by insects. He showed slides illustrating many species of birds that are to be found in America, and stated that the sparrow and the crow are the only ones that need be exterminated.

The Melodograph \$10 Clear, Loud, and Sweet as the highest priced Phonograph made—Uses any Needle and Plays any make of Disc Record, any size, any price—No Extra Attachments needed—Fully equal in Tone Quality to the most expensive Phonograph and will do everything that a Talking Machine can do—The MELODOGRAPH is a Master Machine for Only \$10. It speaks for itself.
