

FACULTY MEMBERS IN ARMY SERVICE

As far as the faculty is concerned, Penn State is exceptionally well represented in the national service. Although all of the different schools have furnished their quota, the largest number of men seem to come from the school of Engineering. The Penn State representatives are not confined to any one form of the service, but seem to be well distributed.

The following members of the faculty have been either engaged in military service or on some government work during the summer:

Prof. B. D. Walker, head of the department of Civil Engineering, is captain of Company A, the fifth regiment of Engineers, in the foreign field.

Prof. Hugo Diemer, head of the department of Industrial Engineering, is a major in the Ordnance Department at present stationed at Lowell, Mass., on the inspection of fire arms.

Prof. E. C. Woodruff, Captain in the Engineer Officers' Reserve Corps, was at Fort Niagara and later at Camp Bolvoit near Washington. He returns as Professor of Electric Railway Engineering.

J. J. Light, instructor in Experimental Engineering, has received an appointment as captain and will report shortly for duty. He was with the Interboro Railway of New York on Boiler Room Efficiency during the summer.

C. E. Steels, instructor in Civil Engineering, after being released from Fort Niagara, was notified to report at Washington September 5th for active service.

A. E. Bryans, instructor in Civil Engineering, who was at Fort Niagara, is in active service.

G. H. Mills, instructor in Electrical Engineering, is at the Navy Yard, Washington, on construction work.

C. G. Gaum, instructor in Engineering Extension for the Philadelphia district, has received an officers' commis-

sion and reported September 5th by Washington.

G. S. Long, instructor in Civil Engineering, was at Madison Barracks, and now is in active service.

Prof. D. N. Bates, of the Department of Mechanical Engineering has been investigating explosions in threshing machinery in Oregon and methods of prevention for the Department of Agriculture.

Prof. R. B. Fehr, of the department of Mechanical Engineering, has been in the Bureau of Good Roads, Washington, continuing a series of experiments of "Earth Preserves" begun here a few years ago.

Dr. W. R. Ifam, of the Physics department, has been commissioned as a captain in the Ordnance department of the army.

Prof. Thomas Schley has entered the United States Bureau of Mines.

1917 MAN ON JOB

W. E. Kroll '17, has been appointed State secretary for the Y. M. C. A. with headquarters at Harrisburg. His work will deal entirely with educational institutions throughout the State and at the present time he is at Penn State assisting in the work of the local association.

"Bill" is well known to members of the three upper classes, he having been popular in college activities and historian of his class. He was the Senior Associate Editor of the "Collegian" last year.

EXECUTIVE COMMITTEE MEETING

There will be a meeting of the executive committee of the Board of Trustees of the College next Friday afternoon. Ordinary business relative to the college opening and plans for the year will be transacted.

TO START THIRD CLASS IN ORDINANCE RESERVE

With the opening of college on September 12, a third class for training men for the Ordnance Reserve Corps will get under way. Already two of these courses of instruction have been completed here, the first during the just spring and the second during the summer session, both under the direction of Professor Hugo Diemer.

Prof. Diemer has been commissioned a major in the Ordnance Department and is stationed at the Frankford Arsenal, Philadelphia, so the present course will be in charge of J. O. Keller, his successor, assisted by S. R. Black and P. R. Hall.

After six weeks of instruction here the men will be enlisted as privates in the Ordnance Reserve Corps and will be transferred to some arsenal where they will receive the benefits of six weeks further training in the practical work.

At the end of this period, each man's record for the complete twelve weeks will be considered and selections for commissions made accordingly.

While all of those taking the course are not assured commissions, practically every one is sure of a non-commissioned office, according to those in

charge of the class. After completing the training at the arsenal, the men will be forwarded to an ordnance for active service.

In order to qualify for the course, the applicant must either be a college graduate or must have had some practical experience in store keeping for a large concern. A fee of twenty dollars will be charged to cover the expenses.

The course as it will be given here is practically the same as the one which has met with so much success at the University of Pennsylvania. It will consist of five hours a week of lectures and recitation in military lines, using army regulations and ordnance property regulations as texts; three hours a week of lectures and recitations in scientific management, special stress being laid on stores keeping, perpetual inventory, and inspection methods; three hours a week of conversational French under Professor Burrage; five hours a week of military drill; four a week in stores practice, and three hours a week of machine shop work, including forging and foundry work.

THE SUMMER SESSIONS VERY WELL ATTENDED

Although the enrollment for the summer session of teachers did not equal that of the past few years, yet the session proved very successful in every way. The total enrollment was \$16, with a proportionate increase in male students over the past years. Dr. Edward Smith was the director of the session, and the various departments were presided over by members of the faculty, and to these the success of the session is due.

Two new courses were opened to the teachers: The School for Continual Work, and the course offered by the International Conciliation Society dealing with international relations. The enrollment in the former was 28, and in the latter 45.

The following is a list of some of the men who addressed the summer teachers: Dr. E. Howard Griggs, of New York City, on "Dramas on Protest," Dean Holmes, of the faculty, Rev. Robert McGowan, of Pittsburgh, Dean

G. Walter Flisko, of Oberlin; Robert R. Reed, well known here, who he formerly served as a chaplain; Monsier Marcel Knecht, of the French Commission to America, who addressed the students on "The Effort of France," and C. B. Graham, of the Department of Agriculture.

PRESIDENT'S RECEPTION

President and Mrs. Edwin Earle Spauls will hold their annual reception to meet the new members of the faculty on Friday evening, September 11. The reception will take place at the President's residence on the West Campus culture.

Just in—Hart Schaffner & Marx Styles for Fall

The Clothes you buy this year
This year of all years, it's important to be sure of what you buy in clothes and to be sure of the merchant you buy them of. Cotton adulterated clothes will be plentiful but you don't want them; the real economy is in all-wool. The announcement that Hart Schaffner & Marx clothes for fall are here means all wool—and value.
You'll pick from the new stripes, the green colorings, the soft-toned grays and blues and browns; the choice worsteds and tweeds.

Belted overcoats
For men of affairs; for young men of spirit, the Hart Schaffner & Marx belted overcoats for fall are the thing. Belts all around, slip-ons, loosely draped models; they're very striking styles and the fabrics, quality and prices are right.

Sport Suits
You'll see the new sport suits in all variations; single and double breasted models, half belts, belts, belts all around, yokes, plaits, patch pockets; many with military touches.
You'll choose here from the finest all-wool fabrics in the world.

New fall arrivals in furnishings
The latest hat styles have come in; soft hats and derbies; the prices are low and the quality is high.
The fall patterns in neckwear are usually colorful and bright; the silks are of high quality; many new designs and effects.
Shirts, hosiery and all of the other things a well-dressed man needs are ready and they're guaranteed to satisfy or your money back. That's the kind of a store this is.
