One-Hundred Eighty Men To Train In Airplane Work—Night Work For Students Necessary

Latest information from the War De autment, as the result of several tele rams duling the past week, indicate hat about 180 National Army men wil e sent to State College on April first istend of the one hundred and twenty be sent to State College on April first, instead of the one hundied and twenty-five as announced last week. These men will be here pushally for eight weks to take a course of training in electrical, and industrial work connected with the Ahplane Division. The college authorities had suggested taking only sixty-five men on April first, from which number, assistants might be picked to help when the larges numbers come later. The government, however, has asked Penn State to take a hundred and eighty as the first quota.

This decision of the government and eighty as the first quota.

This decision of the government neaves the officials less than three weeks in which to make preparations. The only possible plan that could be deviked in order to meet the government, courted in the shops and electrical laboration in the evenings and on Saturday arternoons. This will be imperative, as the government requires that the enlisted men who are coming, shall upend practically eight hours a day in the shop or laboratory.

practically eight hours a day in the shop or laboratory. The matter was presented to the Council of Administration, and while it calls for a heavy builden on the faculty and disturbs the student schedules, it was folt that when the government asks for such services, extraordinary steps should be taken to carry out its desire. The Council, therefore, approved the plan and the consent of the President of the Board of Thustrees was also obtained.

Night Work News.

Night Work Necessary
Night work in the electrical laboratory will be stated at once for the
electrical students, in addition to their
regular daily work, and will be continued until April first, after which time,
they will not be required to take labolatory work. After April first, all student instruction in the machine shop,
forge reom, and joinery room, in additon to work in the electrical laboratory
or students not taking the E. D. course,
will be at night.
Mr. W. I. Hamilton, of the Federal
fload of Vocational Education, came
last Friday and Lleutenant Garcy somewhat later, for further conference concarping the decided.
