ILLNESS OF ARTIST PREVENTS CONCERT
(Continued from first page)

line, it is clearly up to the student body to show its appreciation of good music by getting behind these recitals for the elevating of musical standards. In order that all students may have an opportunity to hear both Miss Braslau and the other number of the series, the Zoellner String Quartette, which will play February twenty-eighth, a season ticket may be purchased for only two dollars. Any person who attends the single concert will pay one dollar and a half, but a receipt for this amount will be given at the box office in the Auditorium and by the payment of fifty cents more, a ticket for the Zoellner String Quartette can be secured.

Second Prize Contest Now On

The contest for the sale of tickets for these recitals closed on November fourth, with Miss McGregor '20 winning the first prize of twenty-five dollars and Mr Parker '21, the second prize of ten dollars. A second contest is now on which will close December fourth, with a first prize of ten dollars and a second prize of five dollars for the highest and second highest number of tickets sold. In addition, a free ticket will be given to any person selling twenty tickets. Tickets may be obtained at Harlow's Variety Store any night.

ANNUAL CROSS COUNTRY WON BY FRESHMAN TEAM

As a result of the interclass cross-country meet last Saturday, five Freshmen and two sophomores have earned the privilege of wearing their class numerals, these men being the first seven to finish. The positions and time taken to cover the four and one-half mile course were:

1st Dudley '21.....21 min 13 sec.
2nd Studenroth '21.....21 min 20 sec.
3rd Read '21.....22 min 18 1/2 sec.
4th Catter '21.....22 min 18 1/2 sec.
5th Cooper '21.....23 min 6 sec.
6th Mantague '21.....23 min 24 sec.
7th Muck '21.....23 min 34 sec.

In finishing first Dudley added another laurel to his laurels, having come to college with a championship record won at Frankford High in Philadelphia. He finished with a lead of ten yards over his nearest opponent, having taken the front place over a field of sixty competitors early in the contest and held it to the end. The first fourteen men all crossed the line with little distance between men, Read and Catter almost being in third place. Finally, it was a contest between the two lower classes, there being very few upper class entries, these few being completely outdistanced by the first and second class men.

This Saturday the regular Freshman-Sophomore class scrap meet will be held. Both classes are exhibiting much interest in the contest, as is evident by the large number of entries. At this time it is not known at just what hour the meet will be scheduled. The course will be four and one-half miles.

PLANS MADE FOR CHEMISTRY CLUB

A committee representing the student body and faculty of the chemistry department of the business of the School of Natural Science met last week to originate plans for a chemistry club. A meeting was held last Tuesday evening at which time more definite plans for the constitution of said club, name, and so forth were decided.

The committee was composed of the following men: S. W. Cohen '20, A. R. Tye '20, A. Pond '21, G. W. Richards '21, J. Jennings '21, H. J. Weller '21, A. H. Croup '21, and H. G. Baumer Jr '22, with Dr. Pond and Mr. Dorn representing the faculty. Not much was definitely decided at the first meeting except that those present were unanimous in their desire to start such a club.

It is planned to bring noted outside chemists to speak, as well as to have lectures by the faculty, and discussion by the members. There will also be a number of social functions, at which even the mentioning of the word "chemistry" will be emphatically barred. Summing it all up, the idea is to promote interest in chemistry and good fellowship among the chemistry students.

REHABILITATION STUDENT OBTAINS COUNTY OFFICE

William H. Brown, rehabilitation student of the club and their families, serving county in the recent election. Mr. Brown has made no solicitation for office, but was elected on the Democratic ticket in a Republican county.

ENGLISH DEPT. WILL PRESENT FOUR PLAYS

Due to the fact that the Dramatic League of America is advocating American plays for this year, to encourage the study of our literature, the original plan of presenting two English plays has been changed, and instead four one-act plays by American authors will be staged.

It has now been definitely decided not to present the Second Shepherd's Play or the Christmas Carol on December twentieth, but instead the following plays: "The Wonder Hat", by Charles K. Goodwin; "Food", and "Dawn", by Percival Wild, and a fourth which has as yet not been decided upon. The first is a satirical fantasy, the second, "Food", is a tragedy of the future by the authors of such plays as "Strong Heart", and the third is a "poignant picture of domestic tragedy". Thus the program will be of well-balanced order, including tragedy, comedy, fantasy, and farce, insuring sufficient variety to please the taste of a college audience.

The settings of the plays will also be adopted, especially for Dawn. The costumes for the "Wonder Hat" are those of the old Commedia Dell'Arte, the quaint garbs of Pierro, Harlequin, and others.

The proceeds of the play will be used for entertainment and the needed conveniences for the college hospital.

STOCK JUDGING TEAM TO ATTEND EXPOSITION

Each year Penn State sends to the International Live Stock Exposition at Chicago, Ill., a team composed of Animal Husbandry students to compete with the teams of other colleges in judging livestock. Penn State teams have heretofore stood very high in the lists, winning several first and numerous second and third prizes on their judging ability. The team is composed of six Seniors and is made up of those students who in the judgment of the department have made the best record during their college course in the judging of cattle and those who have shown the most ability along that line. The personnel of this year's team is as follows: E. H. Wilson, E. H. Dale, W. W. Crow, C. L. Rumberger, G. L. Wright and R. W. Holt. One of these men is to act as alternate, but to date it is not known which one of these men will act in that capacity.

The team will leave State College this Thursday for Ravenna, Ohio, where they will first visit the farm of John L. Few & Sons, noted livestock breeders. From there they will go to Mansfield, Ohio, on Saturday where they will visit Maxwell Farm, the home of Carpenter & Row's noted Shorthorn cattle. Their next stopping place will be Lafayette, Ind., where they will inspect the herds of J. Crouch & Son, and J. W. Vandatta, and also those of Purdue University. On the evening of November twenty-sixth, they will visit the University of Illinois, and from there proceed to Chicago for the great International Show of all type of livestock. The livestock contest which the Penn State men will compete with the teams of numerous other agricultural colleges will be held on Saturday after Thanksgiving, and it is at this time that the true ability and mettle of the Penn State men will be tested.

THESPIANS APPEAR ON FRIDAY NIGHT
(Continued from first page)

clashes. The costumes in this show was also very effectively done, due to the untiring efforts of Miss Ruth A. Gilton.

The action of the play, "Stop Thief", opens with the Carr household in the act of preparing for the wedding of Judge to James Dugan. Unfortunately, a strike of domestic servants has gone into effect on the day preceding that of the ceremony, and Mrs. Carr is forced to engage as a servant, Nell, an ex-convict male and thief at present. Nell manages to introduce into the house, Jack Dugan, her fiancée and confederate in crime. Together they plan the theft of the wedding presents, family jewels and plate together with anything else of value that is available. Dugan covers his own crooked actions by convincing Mr. Carr and James Clancy that they are impostumes, which is borne out by his placing in the pockets of the two men stolen articles which he is unable to dispose of.

With the continued disappearance of valuables, the police are called in, who at once begin a search. Here an intensely humorous situation arises with the theft of the Police Sergeant's watch. Finally, Dugan and Nell are identified as thieves by Joe Thompson, self-styled "the best detective in Rhode Island", despite the fact that he too has fallen a victim to Dugan's cleverness. The sergeant is about to arrest the guilty pair when Dugan upsets one of the officers and flees with Nell into the street, pursued by a crowd yelling "Stop Thief!" When the room is empty, Dugan and Nell, who have hidden on the porch, re-enter and attempt an escape through the back door, but are stopped by Clancy and the Doctor. Here Dugan confesses to having "planned" the stolen articles on Clancy and Mr. Carr, reassuring them that they are not actually kleptomaniacs, but victims of a very clever crook. Mr. and Mrs. Carr are persuaded to agree to allow the two thieves their liberty and the Rev. Mr. Spelvin, who has appeared in the meantime, agrees to marry them at once. Mudge and Clancy, whose marriage has been delayed all this time, are united at this point, as are Dr. Willoughby and Joan. The play ending with a triple wedding. There is much clever farce supplied by the action of the play, and many amusing lines giving ample opportunity for expression and character acting.

\$500 REWARD

\$500 reward and no questions asked for return of Instructor's Note Book and two Library Books taken by student from first floor of Old Main to 14th, Return to Miss Adams, 109 S. Atherton St.

INTER-COLLEGE DANCE TO BE WELL ATTENDED

If present indications can be counted on, the informal Penn State dance which is to be held in Pittsburgh on Thanksgiving night will be a grand success. Invitations to the affair have been sent out to the student bodies of Pitt, Carnegie Tech and W and J and the chairman in these respective schools report that a large delegation will be present from each one. The ballroom of the William Penn, however is of ample size to accommodate a large number of dancers without the least bit of crowding.

A feature of the evening will be the presence of both State's and Pitt's football teams after a banquet to be held in their honor at eight o'clock in the hotel. The William Penn this year will be the headquarters of the Penn State team and will consequently be the center of activities for the followers of the Blue and White. Many alumni have also expressed their desire to attend the dance in order to meet the present student body.

Dancing will be from eight to one o'clock with the eight-o'clock William Penn orchestra furnishing the music. Tickets for the affair are selling at two dollars and a half and may either be obtained by calling at the P. J. Kappa Alpha house at 506 West College Avenue or by securing them in the foyer of the hotel on the evening of the dance.

FRESHMAN LITERARY CLUB HEARS PRESIDENT'S NAME

A very interesting meeting of the Freshman Literary Society, the Edwin L. Sparks Forensic Club, was held Friday evening at 6:30 o'clock in the Liberal Arts building. This was the first meeting since the permanent organization of this popular society. The membership of the Sparks' club is limited to members of the Freshman organization who have a very strong personality. It is the purpose of the Sparks' club to present weekly programs to consist of wide-awake debate-

able questions, declamations, four-minute speeches, and so on.

At the meeting held on Friday evening the by-laws and constitution were adopted, and the following officers were elected: president, H. T. Isher, vice-president, J. Hudson, secretary, L. W. Aycell, and treasurer, H. W. Minton. By a unanimous vote of the club, President I. L. Sparks and Dean T. C. Hatfield were made honorary members of the organization.

The first meeting of the club will be held on Friday, at 6:30 p. m. in room 14th and A. A very interesting program has been prepared.

Bevo

Satisfies the national demand for a wholesome, pure and appetizing beverage—at the soda fountain or with your meals.

Bevo will more than satisfy your thirst.

ANHEUSER-BUSCH ST. LOUIS

It must be Ice Cold

Buy it here; you'll get your money's worth

IF you're going to have a new suit or overcoat this fall, you want to get as much for your money as possible; you'll buy it here. We're making a business of seeing that our customers get what's best for them; we know that if we do that we're doing what's best for ourselves.

The best thing for you is a Hart, Schaffner, & Marx overcoat; because of the quality in all-wool fabrics, the very fine making, and the smart style. You'll find such an overcoat a great economizer.

GOODYEAR BELTS

One Belt, an Entire Plant—and the G. T. M

The proper study of power necessarily includes belts. No matter how competent the generative source of your power, the final results from a drive depend on the success of the transmission. A belt may even be in many respects a good belt and yet fail to deliver the power load economically because ill-adapted to the work required of it. The solution of the problem is the right belt for the particular need.

This is the idea underlying the service of the G. T. M.—Goodyear Technical Man. The basis of his recommendation for a single drive or an entire plant is careful study of the power problem involved. To this analysis he brings the force of experience, the example of hundreds of comparative studies, the judgment of a man grown expert in the operating and observing of many drives under many conditions. His plan is the scientific method.

After analysis, the right belt is prescribed. Is there heavy duty to be performed? That calls for one type, with the proper number of plies. Is light work at high speed the order? A belt of different specifications is required. All the factors of the drive—pulley dimensions, center-to-center distances, load, alignment and application—govern the selection of the right belt for the specific use. The G. T. M. plots these factors with the painstaking exactness of an engineer.

The plant installation here illustrated—Nast Brothers Lumber & Stone Co., at Knowles, Wis.—typifies the value of G. T. M. analysis and Goodyear Belt quality. Two years ago, the G. T. M. specified for the Nast plant at Marblehead, Wis., a 6-inch, 4-ply Goodyear Blue Streak Belt for the pulverizer drive—a belt-killing duty on which a new belt, with luck, sometimes lasted a year. The Goodyear Blue Streak for 22 months, now has stood up to the task so well—confirmed by performance the G. T. M.'s analysis—mistakenly—that today the whole Nast plant at Knowles is standardized on G. T. M. specified Goodyear Belts.

You may expect from Goodyear Belts the highest values of good belting. Flexible, they hold to the pulleys. Unstretched, they wear uniformly. They neither rip nor stretch. They outwear the average belt—their first cost is but little more. Proof of G. T. M. analysis and Goodyear Belt quality is at the command of every concern with a power problem. The G. T. M. service is free. The Goodyear Belt service is built into the belts.

Students and teachers of engineering who would like to know more about the G. T. M. method of drive and plant analysis may find much of profit to them in the Goodyear Mechanical Goods Encyclopedia. A request by letter to the nearest Goodyear Mechanical Goods Service Station or to Akron will bring one to you.
