**ERIE CAGE TEAM TO PLAY FRESHMEN**

One of the hardest games on the Freshman basketball schedule will be fought this Friday evening at seven o'clock in the Armory when the fast Erie High School five will be the yearling's opponents. The Erie aggregation is composed of speedy men, several of whom were on the famous football team last season. Erie having successfully contested each game thus far in the season, the game next Friday will undoubtedly prove one of interest in that the local yearling team must put up its best front to compete with the visitors for honors. The lineup of the Erie team is as yet not known, but the Freshman lineup will be practically the same as has been seen in play on the home court.

**MEMBERS OF FACULTY ANNOUNCE ENGAGEMENT**

At a dinner given by Miss Ethel Sparks at the Woman's building on Tuesday evening, announcement was made of the engagement of Mr. R. B. Nesbitt, of Philadelphia, instructor in Civil Engineering, and Miss Esther Mixer, of Springfield, Massachusetts, instructor in Chemical Agriculture, both of the college staff.

**GRAIN DUST LECTURE TO BE GIVEN FRIDAY**

Mr. D. J. Price, engineer in charge of Grain Dust Explosion Investigation and Prevention, of the Bureau of Chemistry, Washington, D. C., will lecture on the evening of Friday, February 27th, in Old Chapel, on the subject of "The Relation of the Engineer to Dust Explosion Prevention". He will have with him a number of films and will, by the aid of moving pictures, give actual illustrations. The lecture begins at 7:30 and everybody is invited. This lecture should be of especial interest to millers, threshermen and farmers as well as to students of the college.

Executive secretary of the recent gathering at Des Moines, will be present to represent the Student Volunteer Movement. A number of foreign speakers and missionaries will also be at the sessions, among whom is P. Kamimori, of Japan, who with a group of Japanese students in 1875, took the stand for Christianity against all odds. He is today the only living member of that group of students.

Super-Heat Degs. F. 0  
Vacuum In Hg..... 27  
Lbs. Per KW. Hr. 22.0  
Efficiency Ratio .. 64.1

**ENGINEERING ACHIEVEMENT**

Westinghouse Success Is Based on its Pioneer Work and Development in Mechanical and Electrical Engineering

A comparison of the Rankine Cycle Efficiency of the first commercial turbine-generator installed in this country in 1899 and the modern turbine-generator shows a remarkable advance in the art of steam turbine building.

It is a noteworthy fact that this first commercial installation opened a new era in the generation and application of power--bringing into being the central station with its now indispensable service to humanity. The steam turbine has cut the world's fuel consumption by millions of tons yearly. It has effected incalculable savings in labor and transportation.

The steam turbine as a prime mover was introduced and developed in this country by George Westinghouse.

Write for Circular 1591, "An Historical Review of Steam Turbine Progress", by Francis Hodgkinson, Chief Engineer, Machine Works.

**Westinghouse Electric & Manufacturing Co.**  
East Pittsburgh, Pa.

Three 50,000 kw. 750-1500 r.p.m., cross-compound Turbine Generator Units.

**PERFORMANCE**

Load KW..... 28505  
Steam Pressure Lbs..... 233.1  
Super-Heat Degs. F. 184.3
