work thus begun.

"It is interesting to note that the Rotary clubs of the State and probably other business groups and men will join to work co-operatively in arousing public interest in State College. To discuss ways and means, representatives of all Rotary clubs in the State will meet at York early next month. Dr. Fox will meet with these Rotary delegates.

"The situation at State College has been discussed many times before, but no support has been led by outside sources. Now the businessmen of the State are aroused as to the necessity and are ardently supporting a constructive program which will probably go to the legislature next winter."

The following appeared in Harrisburg papers on Wednesday:

"Meeting the very day before Pennsylvania State College opened, the special committee of the Pennsylvania State Chamber of Commerce, which is studying the critical situation at State College, yesterday sat in session in Harrisburg and thoroughly considered a survey which has been made of this institution.

"Meeting the very day before Pennsylvania State College opened, the special committee of the Pennsylvania State Chamber of Commerce, which is studying the critical situation at State College, yesterday sat in session in Harrisburg and thoroughly considered a survey which has been made of this institution.

admission to the Freshman class of State College will be rejected. This is a situation which has been continued for a number of years, and realizing the gravity of it, the directors of the State Chamber last spring appointed a special committee to make a study of State College and analysis of its needs. This committee visited the college in May and later instructed the director of the State Chamber's Research Bureau, Dr. Leonard P. Fox, to make a detailed survey. Dr. Fox spent some time at the college and has made quite a complete analysis of the situation. This was thoroughly gone over by the committee yesterday and certain findings were adopted to be presented to the business section of the State Chamber's annual session, which will be held at the Penn-Harris Hotel, September 27-28."

**MANY STUDENTS REFUSED ADMISSION**  
(Continued from first page)

years, after which they will commence to specialize in the various courses of food. Consequently, it is impossible at this time to tabulate them according to departments. The same is true of the School of Mines, in which are enrolled 43 Freshmen.

According to the figures given out by the Registrar, 61 will take courses in the School of Natural Science. Of these, 17 are enrolled in the Natural Science, Entomology, and Pre-Medical courses. Twenty will study Chemistry, and 27 have elected Industrial Chemistry.

Added to the conditions which limited the number of men students, are the lack of dormitory and boarding accommodations on the campus in the case of Freshman women. Consequently, only 76 new women students have been admitted to the college for the present year, of which 27 are enrolled in the Department of Home Economics.

There is a considerable decrease in the number of matriculants in the Two Year Course in Agriculture, only 81 new students being enrolled in that branch of college work. Thirty nine students of other colleges have come to Penn State this year and are enrolled in the Sophomore and Junior Classes. Special students to the number of 15 registered during the first part of the week, while five persons will spend the coming months at Penn State in the pursuit of graduate studies.

Thus the total of new Penn State students for the semester which has just begun is 851. Doubtless the figures will be slightly increased as the college work gets under way, but substantially this is the summary of the enrollment through the Registrar's office. It is too early as yet to tabulate the registration of the three upper classes in the various schools and departments, but the figures are being collected and centralized as rapidly as possible and will be forthcoming within a short time.

**FOOTBALL SQUAD BEGINS INTENSIVE TRAINING**

backers: Hills and Laque, guards and McMillon at center. In the backfield are Rios at quarterback, Hugh at full and Knab and Lichtner at the halves. While the positions on either eleven are in no wise certainties, these are the combinations which have been used against each other the past few days.

**ANNOUNCEMENT MADE OF NEW CHAPEL SCHEDULE**  
(Continued from Page One)

attendance must be filed before September twenty-ninth.

Another change from the old plan is the matter of absences. Only five week-day absences and three Sunday absences will be allowed a student without incurring a penalty.

**NEW METALLURGY HEAD**

Dr. David F. McFarland, formerly connected with the Engineering Experiment Station of the University of Illinois and also Associate Professor of Applied Chemistry and Metallurgy at the same institution, has been appointed Professor of Metallurgy and will head that department in the School of Mines. Dr. McFarland has received the B. A., M. A., M. S., and Ph. D. degrees, obtaining the first two from the University of Kansas and the latter from Yale. Dr. McFarland is well known in industrial fields in the middle west. The new Metallurgy head has been engaged in teaching for a number of years and has written many scientific papers upon various subjects.

**BASEBALL AND TRACK TEAMS HAVE STERLING LEADERS**

At the elections held last spring by the members of the baseball and track teams for the 1921 season, H. L. Halmes '21 was elected captain of the baseball team and C. P. Morrill was chosen to lead the varsity trackmen. Both men are athletes of the finest type in their respective sports and brilliant records are expected from the teams under their leadership.
