

New Beaver Field When Completed

The diagram shown below represents the appearance of New Beaver field about the gridiron when all improvements shall have been made. The football field will be almost entirely surrounded by stands which will have a seating capacity of ten thousand. These now standing, with the additions near completion, will seat seven thousand and seven hundred. It is not known just how soon the erection of the north and south stands will begin, probably not for some time, but temporary bleachers will take their place. The stands now under erection will more than triple the capacity of the old bleachers. It is three hundred and four feet long, twenty-four rows high, and has a seating capacity of fifty-five hundred. Although it will not be ready for occupancy for the Gettysburg game, it is expected that it will be used to seat the huge crowd which will undoubtedly be present to witness the Dartmouth game on October ninth, when the alumni come home. The old stands on the west side of

New Beaver will seat twenty-two hundred, the grandstand accommodating five hundred and the bleachers on each side having a capacity of eight hundred fifty each. In addition temporary bleachers will be erected on the south end of those already standing and these will seat seven hundred. The large bleachers on the north side of the gridiron will seat twelve hundred, and are being used temporarily to seat the Sophomores. On the south side of the new permanent bleachers, a small temporary stand will be erected which will face from the south west. This will provide seating room for forty hundred more. Thus Penn State is in a position to adequately care for the great number of visitors expected to attend football contests this fall. The seating arrangements used for the Muhlenberg game will be in force for the Gettysburg contest, but will be superseded by new arrangements on October ninth. The new arrangements will be those used for the remainder of the season.

SOCCER MEN CROWDED FOR PRACTICE GROUND

Soccer is booming this year at Penn State. This type of football is more popular than ever and Coach "Jimmy" Crowell stated that conditions are so crowded that he has been forced to limit a great number of men to two practices a week. About fifty second year men and seventy Freshmen have already elected this sport in preference to gym work. This is more than have ever reported as candidates in former years and steps are now being taken to increase the facilities for these men in connection with this soccer fields are to be constructed on the drill grounds to the rear of the Armory. Even with this increased amount of practice space, candidates will be forced to come out at different hours. It is the plan of Coach Crowell to have four teams playing on the two fields continuously so that when one group has finished practice another one will immediately take its place. In this manner the coach hopes to give every man a fair chance and the same number of hours of play as the other candidates.

not been decided upon but will be announced later. Professor J. J. Kuzko, head of the Department was at this meeting and told briefly of the two weeks course that was offered this summer, by the Industrial Engineering Department, to factory executives. Forty-two factory executives attended this short course.

Lacrosse Meeting In Armory Today

The fall practice of the lacrosse team began on Monday with the sole purpose in view of fitting the men for the spring's work. Of last year's team, nine of the regulars and two substitutes have returned to college. The loss of Captain Eaton, Wert, and Gibb will be keenly felt but the call for candidates should bring some good men into this sport. The lack of equipment has been a serious handicap in the past year but this will be overcome in a short time as the clubs are due here soon.

The men of the varsity of last season who have returned are Captain Leuschner, Campbell, Miller, Vickers, Croup, Chidding, Brown, Agnew and Parley while Warner and Shaw, who were first substitutes, are also back. Nothing definite can be said of the schedule at this time but it will comprise thirteen or fourteen games. The teams that are to be met during the season will make the schedule the strongest in many years. There will be a mass meeting of all who are interested in lacrosse in the Armory this afternoon at four-thirty. Many freshmen and Sophomores are wanted for this sport and it is hoped that all that are interested will turn out at Tuesday's meeting. Practices will be held daily at four-thirty p. m.

FACULTY COMMITTEE ELECTS NEW OFFICERS. The Faculty Committee on Student Organizations and Publications has reorganized with Professor D. D. Walker as chairman and Professor S. W. Fletcher as secretary. The members for the current year are Professor I. L. Goster, Professor D. H. Dusham, Dean Margaret Knight, and Dean A. R. Warnock.

I. E. SOCIETY TO HOLD OILER FEED. A oiler and pretzel feed with smokes also on the menu was planned at a meeting of the Industrial Engineering Society as a means of making the Freshmen in this course feel that their fellow I. E.'s have an interest in them. This event for the first year men is being planned for the evening of October first. It will take place to the rear of the stands on New Beaver Field in the wood lot. Every arrangement is being made to give the new students a royal reception and to make them acquainted with all the others in the department. The definite hour has

On The Corner

- HOW MANY STUDENTS. Do you Think. Know All the Grades. Of Penn State? How Many Are at Home. In the Great Outdoors. That Surround Us. Here. In the Nittany Hills. Take a Walk. Some Moonlit Night. Through the Wooded Walks. And Rolling Hills. And Breathe in the Cool. Magic Air. Let the Mystery of Night. Take Hold of You. And Get Close to Nature. Silently Tread. Through the Stately Allees. Of Shadowy Forest Monarchs. And Know. How Insignificant. Is Man. Imagine. The Dim Silvery Moon. And Its Soft Beams. Filtering Through the Quiet Leaves. And Picking the Silvan Path. With Intermittent. Spots of Light. All is Quiet. Your Feet Talk no Account. Of Time or Distance. Are You Pass. Over the Springs. And the Quiet of Nature. At Peace. Prevails. But Nature Has Scattered. Her bounties Widely. She is at Her Best. In the Nittany Hills. At Twilight.

CHEMISTRY DEPARTMENT ELECTS NEW INSTRUCTORS. Five new instructors have been added to the teaching staff of the Department of Chemistry due to the resignation of some of the former faculty and also the increased demand for more teachers in this line of work. Four of the new members of the faculty are Penn State graduates and are T. C. Bechtel '17, W. B. Gray '18, W. L. Brooke '20 and D. C. Gardner '20. The other new instructor is Mr. W. J. Sweeney, who is a graduate of the Massachusetts Agricultural College in the class of 1919.

BAND AND ORCHESTRA INCREASE IN NUMBERS

A busy schedule has been arranged by Drummajor Thompson this year for the musical organizations of Penn State that are under his direction. More extensive plans than in previous years have been made by these student organizations for this season and the students of the college are assured that the same high standards of these musical organizations will be maintained as in the past. Time has been set for practice for the drum corps, orchestra, and band and are as follows: Drum Corps, Monday, 6:30, Wednesday, 6:30, Band (new men), Wednesday, 6:30, Band (old men), Thursday, 6:30.

Orchestra Has New Plans. The orchestra especially is introducing some innovations this year in their plans. Formerly, the work of the orchestra consisted in merely playing Sunday afternoon concerts. A fall concert and one in the spring are planned by the members of this organization. A western trip during the Easter vacation has been definitely arranged for the orchestra. This year the program includes, namely: Greenburg, New Kensington, Kittanning, Butler, New Castle and Franklin. Although definite arrangements have not yet been made, the orchestra also plans to make a week end trip to the East which will likely include Williamsport and other places in that vicinity.

The size of the orchestra will be greatly increased this year. In the tryouts for new men which was conducted, much promising material was uncovered and the outlook of the orchestra in the future is naturally bright. The College Band has also been active and many arrangements have been made by this popular organization for the coming year. It will maintain its position of being the most active in the college, with regular meetings, mass meetings and at other times when needed. As in the past, the band will give concerts at Pennsylvania Day, at Commencement, and at various other occasions and will accompany the football teams to Penn and Pitt. At the first business meeting, held last Thursday, by the request of the members, Mr. Thompson appointed L. H. Kimmel '21 as student leader. He will serve in this capacity during the present school year. After two careful tryouts forty new men were finally selected and accepted as members of the organization. These members will practice separately on Wednesday nights while the old band men will hold their rehearsals on Thursday evenings. The old band system as inaugurated last year will be continued. The more advanced and skillful players will be placed in the first band while the others will be known as the second band. The final selection of the members of the two organizations will be made after Thanksgiving and until that time the old and new members will practice separately.

DEBATING SEASON OPENS TOMORROW

The debating season opens Wednesday night when all students interested in intercollegiate debating and forensics are directed to be present at the first meeting of the year 6:30 p. m. Room 11, Liberal Arts Building. This meeting is for the purpose of organizing a class in the forensics art. Regular college credits, three in number, will be given to all who complete the course regardless of whether they win a place on the intercollegiate debating team or not. The course will cover Public Speaking 400 and Public Speaking 450 as outlined in the catalogue. Main attention, however, will be given to the subject of fallacies, analysis, speech construction, and the presentation of evidence. While all who take the course may not make the varsity debating squad, however only its members are eligible for the team. The team will be picked entirely from the membership of the class and will compete on trips to be taken during the fall months to be chosen and work started upon it.

The following men have been chosen to fill positions on the club and will report for to-night's rehearsal: H. J. Jordan '24, M. J. Sizer '22, R. A. Myers '23, J. D. McCoid '21, B. H. Potolger '22, R. D. Scheerer '22, R. B. Crane '21, D. E. Zickler '21, Harpo Dall '22, O. G. Nomench '21, William Helm '24, M. J. West '21, D. Austin '21, H. M. Hoover '21, Fred Hitter '24, Elliot E. McKean '21, R. C. Kramer '22, R. H. Robertson '22, H. H. Thompson '24, J. R. McGee '22, W. J. Mitchell '23.

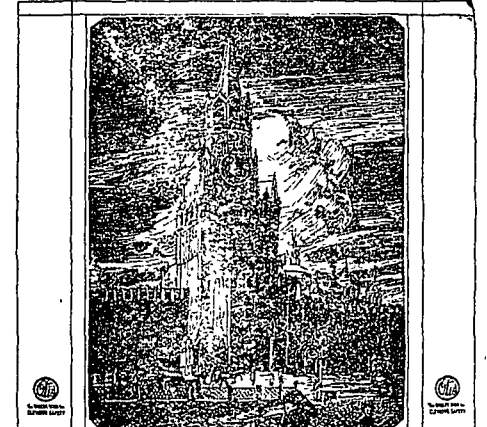

Last year's team under the direction of Professor Marshallman had a fairly successful season. The first debate was held soon after the opening of the second semester with Ohio Wesleyan and resulted in a victory for Penn State. In the next contest the debaters were not so fortunate losing to Colgate after a hot struggle. In the debate with Bucknell which followed Professor Marshallman's protégé came back and achieved the second victory. The next argument was staged with Dickinson, but did not result in a Penn State victory. Next a dual debate was held with Lafayette simultaneously at State and at State College, and at each place the quim rested with the Penn and White. All things considered the debaters had a good season, although it is hoped that this winter work will result in a tale of successes.

MANDOLIN CLUB ENLARGES PERSONNEL

A large number of candidates for positions on Penn State's Mandolin Club reported for trials last week and after a great amount of consideration, made necessary by the wealth of talent present, twenty-one men were chosen.

Looking Backward

Fifteen Years Ago. California Normal eleven went down to defeat before the victorious onslaught of Coach Hollenback's proteges. The game was characterized by many blunders and fumbles but the old split was present all the time. Score 25-0. Ten Years Ago. Inspection of the Cadet Corps, then numbering six hundred and fifty-seven was conducted by Captain P. H. Harts in his report to the War Department he mentioned the courtesy shown him while here and he stated that "the men seemed to be well maintained and their work was very fine as their coat and capcases displayed." "Jack" Hollenback pitted the strength of his 1910 football squad against that of the Harrisburg Tigers, who were forced to admit defeat by the convincing score of 58-0. The grandstand was nearly completed although by the time of the contract the time of completion was not as January 1911. Five Years Ago. Due to the growth of the college it was found necessary to have some means for caring for the sick and injured, so the College Health Service was established. Dr. R. L. Sackett was appointed to succeed Dr. J. P. Jackson as Dean and Director of the School of Engineering.

THE KREMLIN, MOSCOW Most of the famous buildings of the world are equipped with Otis Elevators. THE KREMLIN is the center of Moscow. The walls of the triangular enclosure were built in the year that Columbus discovered America. Much of the history of Russia—a dark tale of intrigue, mystery and bloodshed—was enacted in the Kremlin building. The present Grand Palace dates back only to Napoleon's day, for his soldiers burned the old palace. There are two Otis Automatic Path Button Elevators in the Grand Palace. There is another Otis Elevator in the Nicholas Palace. This is a significant of the world-wide scope of Otis activities. From the first crude hydraulic elevators to the modern marvel of automatic vertical transportation, Otis has led the way and even now is continually developing new and better methods and machinery. OTIS ELEVATOR COMPANY Offices in all Principal Cities of the World
