

College Cattle Win Many First Places

Penn State livestock captured high places in recent state fairs held in the east, placing them near the top of the list of prize cattle in this country. Four firsts, six seconds, three thirds and two fourths were the results of the New York State fair at Syracuse and eighteen firsts and one second at the Eastern State's Exposition at Springfield, Mass.

The extraordinary showing of the animals reflects greatly on the good work done by the college herdsmen and those in charge of the Animal Husbandry work. Prof. Tomhave, head of the department is a well known live stock judge, having performed in that capacity in a number of the most prominent cattle made a good record for themselves last year, both at state fair and at the International show at Chicago, but the showing this year far eclipses that of any other year. Consequently great hopes are entertained on their showing at the principal livestock show of the United States, the International, this year. Competition at the New York State Fair was very keen, this fair being one of the most prominent in the east, but the Eastern States Exposition was even greater. Prof. Tomhave is a director in the organization of this fair and has been active in its interests since its beginning. "From a small fair, embracing but a few of the eastern states, this fair has grown by leaps and bounds until it bids fair to out rival the Ohio State Fair, considered by many as the best state fair in the country. The list of prizes obtained at these fairs follows:

Two year old Shorthorn bull, second premium.
 Senior Yearling Aberdeen Angus bull fourth premium.
 Senior Yearling Angus steer, second premium.
 Junior Yearling Aberdeen Angus steer, second premium.
 Senior Aberdeen Angus Steer calf, first premium.
 Junior Aberdeen Angus steer calf, first premium.
 Senior Yearling steers, second, third and fourth premiums.
 Junior Yearling steers, second, third and fourth premiums.
 Senior steer calves, second and third premium.
 Junior steer calf, first premium.
 Steer hords, first, second and third premium.
 Eastern States Exposition
 Two-Year old Shorthorn Bull, first premium.
 Senior Champion and Grand Champion Shorthorn Bull first premium.
 Senior Yearling Aberdeen Angus bull first premium.
 Senior Yearling Aberdeen Angus steer, second premium.
 Junior Yearling Aberdeen Angus steer, first premium.
 Junior Aberdeen Angus steer calf, first premium.
 Aberdeen Angus steer herd, first premium.
 Senior Yearling Hereford steer, first premium.
 Junior Yearling Hereford steer, first premium.
 Champion Hereford steer.
 Hereford steer herd, first premium.
 Senior Yearling Shorthorn steer, first premium.
 Junior Yearling Shorthorn steer, first premium.
 Senior Shorthorn steer calf, first premium.
 Shorthorn steer herd, first premium.
 Grand Champion Hereford steer.
 Grand Champion Hereford steer herd.

WORK BEING RUSHED ON MECHANICAL LABORATORY
 The college has just let a contract to the Austin Company of Cleveland, Ohio, for the completion of the new Mechanical Engineering Laboratory with the expectation that this building may be enclosed before the severe winter weather sets in. This company will put a large force of men on the job and will endeavor to make all the speed possible.

MASS MEETING SHOWS OLD TIME SPIRIT

The first of a series of mass meetings, which have been called for the purpose of boosting the football team, was held in the Auditorium on Friday night, and was characterized by an exceptional amount of pep on the part of the student body. F. H. Louschner, Editor of the "Collegian" urged the students to show the players that every Penn State man was back of the team, and E. N. Sullivan '14, urging the same thing, assured the students that a large number of Alumni will be on hand to lend moral support to the team at the Dartmouth game. After short speeches by Captain Harold Hess and George Brown, Bezdek gave out some real dope on the condition of the team stating that many of the men were inexperienced and that they did not look like the champions of last year, but believing that a miracle can happen this year as it did last year, providing the student body backs the team with the necessary pep.

TWO NEW INSTRUCTORS IN DEPT. OF EDUCATION

Two men have been added to the teaching staff of the department of education and psychology since the current semester opened—B. W. Dally, associate professor of education and B. Y. Moore, assistant professor of psychology.

Professor Dally is a native of Kansas, an alumnus of Baker University, Baldwin, Kansas, was granted the degree of M. A. by Teachers College, Columbia University in 1915 and since then has studied in the same institution for nearly two years.

Dr. Moore was born in Indiana and secured both B. A. and M. A. degrees from the University of Indiana. He studied for a year at Teachers College, Columbia University and during the last year completed work for the degree of Ph. D. at Carnegie Institute of Technology.

Both these men have had successful teaching experience in public schools as well as in colleges and universities.

Cosmopolitan Club Elections
 At the last meeting of the club the following officers were elected:
 Pres.—N. G. Morrill.
 Vice-President—G. P. Nater.
 Secretary—P. O. Ouna.
 Treasurer—T. H. Ho.

DAIRY JUDGING TEAM MAKES GOOD SHOWING

The Pennsylvania State College was represented at the Eastern States Exposition held at Springfield, Massachusetts, on September twentieth by a Dairy Cattle Judging Team consisting of C. E. Rubner, Leroy Hoffer, W. H. Davis, and C. L. Mowrer. The team secured fifth place, which is a very good showing, considering the small amount of coaching which it was possible for them to get after college opened just before the men returned to college this fall. It was decided to visit this show as a preliminary to the collegiate judging contest to be held at the National Dairy Show in Chicago on October ninth, when fifteen college teams are expected to compete for scholarships and trophies, generously offered by the dairy cattle breed associations and several manufacturing concerns.

The experience gained at Springfield will be of great help to the team at Chicago, as over five hundred cattle of the four major dairy breeds were on exhibition, including many former prize winning animals at both the Eastern State's Exposition and the National Dairy Show.

SILAGE EXPERIMENTS BEING CONDUCTED AT DAIRY BARN

During the past week, the experiment silos at the Dairy Barn have been filled with different kinds of silage material which will be fed for experimental purposes the coming year. One silo was filled with soy beans and corn in proportion of two parts of corn to one part of soy beans. Much interest has been manifested throughout the State

in the feeding value of corn silage, which has been supplemented with soy beans in the foregoing manner. Feeding trials with this corn-soybean silage were conducted last winter, and it is planned to continue the experiments the coming winter.

Another silo was filled with a mixture of sunflowers and corn. The feeding of this material will be of special interest to the farmers of Northern Pennsylvania, where the seasons are short, and it is difficult to ripen corn. It is claimed that the sunflowers will grow more tons per acre, will thrive on poorer ground, and will stand frost better than corn. It is expected that a considerable amount of valuable information will be gained concerning the feeding value of sunflowers and corn grown together for silage.

NEW SIRE PURCHASED FOR THE DAIRY HERD

Among the new arrivals on Ag Hall is an exceptionally well bred Holstein bull calf, which the School of Agriculture has been fortunate enough to secure for the College Dairy Herd. This young sire was selected by F. S. Hysard, a member of the Board of Trustees and Editor of the National Stockman and Farmer, in conjunction with Professor A. A. Borland, the head of the Dairy Husbandry Department. The bull was selected from the famous Bull Farm Herd at Corapolis, Pa., and is an individual of remarkably good type and high producing ancestry. His mother has a record of nearly thirty pounds of butter in seven days as a four year old, while his sire is King Valdesa Pontine, the record of whose dam and sire's dam average over forty-one pounds of butter in seven days.

Modern Motive Might

MOUNTAINS, miles and minutes give way before electricity, the magic motive power. Properly applied, it drives giant locomotives across the continental divide, tows ocean liners through the Panama Canal, or propels huge ships.

Through good light, safe signals, and illuminated highways, it is making travel better and safer and also is increasing the usefulness of transportation methods on land, sea or in the air.

In short, electricity is revolutionizing transportation, making it quicker, safer, more economical and reliable in all sorts of weather.

And back of this development in electric transportation, in generating and transmitting apparatus as well as motive mechanisms, are the co-ordinated scientific, engineering and manufacturing resources of the General Electric Company, working to the end that electricity may better serve mankind.

GENERAL ELECTRIC COMPANY

For more than twenty years, Sims' has always been known as a store where one could find desirable merchandise at fair prices and be assured of exceptional service.

Most Central Pennsylvania people know this and we doubt if any store has a more loyal clientele of customers—regular customers year-in and year-out—than ours. But hundreds of people come to State College yearly and we wish to emphasize the fact that

Sims' is not only a very desirable place at which to shop but an economical place as well.

Some folks have the idea that in a store such as ours prices are high. Such is not true. We do not handle cheap merchandise, but on trustworthy, dependable goods, one's dollar buys just as much or more than elsewhere. Our business grows steadily larger as more and more people find out the advantage of trading here.

Instead of fewer cigarettes how about less Turkish?

SMOKERS are learning that straight Turkish cigarettes, delicious as they are, are so rich that they soon tire the taste. They contain too much Turkish tobacco.

But smokers are learning also that instead of cutting down the number of cigarettes per day, they can cut down on the proportion of Turkish tobacco in each cigarette.

They can do this by switching to part-Turkish or Turkish Blend cigarettes.

However, many are "and that ordinary Turkish Blend lack taste—they contain too little Turkish."

And so more and more smokers, as shown by sales-reports like that above are turning to Fatima. For Fatimas are part-Turkish—not all-Turkish like straight Turkish cigarettes. Yet they contain more Turkish than any other Turkish Blend.
