

HIGHLIGHTS OF SOME FORMER PITT GAMES

When the strong Pitt eleven meets the Penn State gridiron warriors next Thursday on Forbes Field in Pittsburgh they will have behind them the record of having beaten this institution four times within the last five years.

Line plunging and wonderful interference on kick formation and on kick-offs featured Pitt's 20 to 0 victory over the Blue and White eleven five years ago. The Nittany men were well conditioned for the fray but injuries to Miller and Captain Wood in the first few minutes of play made it much easier task for Higgins, Peck, the All-American center for that year, and McLaren to score.

Fully 27,000 spectators witnessed the victory of the Pitt Panthers over the Blue and White Gridiron on Thanksgiving Day in 1916. The Pitt eleven had the better of the game all the way thru and when the last quarter ended the score stood 21 to 0 in favor of the Panthers.

The Blue and White's light eleven sprung one of the biggest surprises of the year on Turkey Day in 1917 when they held the mighty Pitt football squad to a 28 to 6 score. The Penn State men uncracked a brand of football that for two full periods completely bowled the Pitt players.

With an inexperienced team, Penn State gave Glenn Warner's machine the game of their lives two years ago, although the Pitt men were the victors by a 28 to 6 score. The Panther victory was due entirely to the lack of veterans in the Blue and White line-up and had it not been for this factor, the results would probably have been different.

For the first time in five years, Penn State decisively defeated Pitt one year ago next Thursday by a score of 20 to 0.

State decisively defeated Pitt one year ago next Thursday by a score of 20 to 0. The feature of the game came in the first few minutes of play when Hew, from behind his own goal line, hurled a forward pass into the waiting arms of Captain "Bob" Higgins, who ran almost the length of the field for the first score of the contest.

Canadian Student Addresses Chapel

The chapel services on Sunday were addressed by J. Davidson Ketchum, a Soyuzmore at Trinity College, Toronto, Canada, who gave a student to student talk on the satisfactions that are derived from life by making an earnest effort to find the fundamental character-istics contained therein.

Mr. Ketchum told of the way he first came to realize the power of Christianity. He was held as a prisoner in an internment camp, the site of which was that of a former race course. A large number of men, many of them students and professors, were housed in box stalls with nothing but evil influences surrounding them.

The speaker did not ask that everyone devote his time and energy to the study of the Bible but rather urged all to find their individual worth and use it in the proper manner. Let one find himself and he will get the real joy out of life in order for one to discover what is foremost in himself, he must analyze his work and determine whether it is to his advantage or disadvantage. One

will find that dissatisfaction in life will arise, but sooner or later he will obtain that complete satisfaction which comes after earnest endeavor. The joy derived from Christianity is sudden wealth. The secret of the whole life can be obtained if you want it.

PENN STATE-AIDS NATION IN GRAIN DUST RESEARCH

During the past two years the Engineering Experiment Station has been vitally interested in the question of grain dust and has been conducting a series of experiments on the explosiveness of dust from both grain and flour mills. The greater part of the work of the Experiment Station concluded recently with a study and test of preventive measures which will greatly aid in the reduction of fires and explosions in flour mills and grain elevators.

One of the most astonishing recent developments has been the discovery of the fact that aluminum dust explodes with an effect that is equally as destructive as coal dust. The study of such substances has been of great interest to the Experiment Station, which is en-

deavoring to serve the industries of the state and nation by investigation and research along scientific and technical lines. The national government has created a Development Division in the Bureau of Chemistry which is making extensive investigations into these subjects. Mr. D. J. Price, who is head of the Development Division has been at Penn State almost once every month during the past year to obtain information concerning the progress which Penn State was making in the investigation of grain dust.

PROFESSOR E. J. KUNZE VISITS OTHER SCHOOLS

Professor Edward J. Kunze, of the Department of Industrial Engineering has returned from Western Pennsylvania where he visited various industrial

concerns. On Thursday evening he addressed the foremen of the Penn Steel Company at Brackenridge, Pa. The following day, he visited and investigated the work which is being accomplished by the Mellon Institute, of the University of Pittsburgh, and the Bureau of Personnel Research of the Carnegie Technical Institute.

VENUS PENCILS FOR the student or prof, the superb VENUS pencils are all for perfect pencil work. 17 black degrees and 3 copying. American Lead Pencil Co. 217 Fifth Ave. NEW YORK CITY, Dept. W-19

First Then Miss Shepherd sang, "In the Glen." The New Edison stood on the stage by her side. She suddenly stopped singing. The New Edison took up her song, and continued it alone.

185 times - no difference!

Miss Betsy Lane Shepherd, famous concert soprano, has made this test 185 times. 185 public audiences, in 185 cities, have heard her compare her voice with its RE-CREATION by the New Edison. No one, out of a total of more than 100,000 listeners, has been able to tell when Miss Shepherd was singing, and when the New Edison—except by watching her lips.

What kind of music "gets" you?

Tell us—and we'll show you how all its emotional power is RE-CREATED by the New Edison

Is it the soulful violin?—a mellow contralto!—the scintillating flute?—a sweet, soothing tenor?—that draws the quickest emotional response from you. Let us play your favorite voice or instrument in a new kind of Realism Test. See whether you are touched by the RE-

The NEW EDISON "The Phonograph with a Soul"

Perfect realism is your one vehicle to the inner joys of music which you crave. Mr. Edison spent three million dollars in the research work which gave the New Edison perfect realism. He did this in order that the phonograph might transcend its former limitations and (here we quote Mr. Edison's own words), "bring into every American home, music so realistic and so perfect in its rendition as to be an unending source of benefit and pleasure." The instruments which proved this perfect realism in Miss Shepherd's 185 tests were all exact duplicates of the original Official Laboratory Model on which Mr. Edison spent his three million dollars.

L. K. METZGER 111-115 ALLEN STREET

FOR SALE A SINGER SEWING MACHINE. Can be seen at College Health Service

Quick and Efficient Service OUR MOTTO PENN STATE BARBER SHOP G. L. SMITH, Prop.

We have the VICTROLA You Want Whatever your taste, whatever the size you need, whatever the price you wish to pay, we can furnish an instrument that suits you. Styles to match your furniture in any of the popular wood finishes at a wide range of prices. All are Victrolas. All will play Victor records perfectly. Let us show you our assortments at THE MUSIC ROOM

Xmas Gifts Come in early and look over our lines of State Jewelry, Persian Ivory and Leather Goods for Xmas Gifts.
