RHETORIC DEPARTMENT ANNOUNCES ELECTIVES

Students who are pursuing the course in second year rhetoric are being given a splendid opportunity to choose some branch of work which they prefer for their second semester's credits in the subject. The Rhetoric Department is offering for the first time a four branch course which gives the student a choice of seventeen types of advanced English. The subjects comprise English Literature, Rhetoric, Public Speaking, and English Literature for all students of Liberal Arts who have the preparatory work. There are no restrictions on the first three of the above branches and any student is at liberty to choose the subject that is most desired.

The work in English Literature 250 will be taught by various instructors of the Rhetoric Department. The student is permitted to choose between English and American Literature, either of which gives a rapid survey of the literature of both countries. In the Rhetoric section, Professors Gibbons and Cloetingh will supervise the study of the Short Story, Journalism, Advanced Composition and Play Writing. The first division deals with the study of structure, the rise, the nature and the writing of the short story. The course in Journalism treats with the elementary work in newspaper technique, news writing, covering stories and interviewing. The aim of Advanced Composition is to give the student a greater power in written expression. Those who desire a course in Play writing will receive instruction in the technique of drama, combined with the dramatization of stories and the writing of plays.

Miss Ruth Jackson will be the teacher in the study of Public Speaking. Seven sections are offered to the second year students four of which require preparation in other English subjects. The three courses offered are in Oral Eng-

Play Production and a General Course in Oral English. Each of the branches is highly desirable.

Dr. W. S. Dye and Dr. F. L. Patton course, each of the four divisions being open only to those students of Liberal Arts who have had preparation in English Literature 101. Dr. Patton will teach American Literature of the Nineteenth Century which deals with the works at the time of Emerson. Dr. Dye will teach Later English Drama and Early English Literature. The instructor in Latin English Literature has not been definitely decided upon. This subject will deal with the writings of 1870 to the present time.

The Department of Rhetoric had previously limited the student to the choice between the English Literature course and Public Speaking and a large number will undoubtedly take advantage of the opportunity to choose one of the Rhetoric courses. Mimeograph copies of the courses offered are being distributed in the various Rhetoric sections so as to enable the department to determine the number of students who are to take the instruction in the branches offered.

at Penn State held a meeting in the Liberal Arts Building last Friday evening in order to formulate tentative plans for a society which can discuss the problems that arise in connection with their courses. All of the students in attendance were heartily in favor of such a society and arrangements were completed whereby an organization will be effected. Another meeting is to be held sometime during this week at which time officers will be elected and a committee appointed to draw up a constitution.

While the proposed society is intended primarily for Pre-Legal students, the work which will be carried out will no doubt be of interest to all these students who are taking up work in the History and Political Science Department. A feature of the new society's program is the securing of prominent and interesting speakers to address the members. Dr. J. Tanager of the Political Science Department is the sponsor of the club.

SCHOOL OF ENGINEERING RECEIPT OF TWO GIFTS

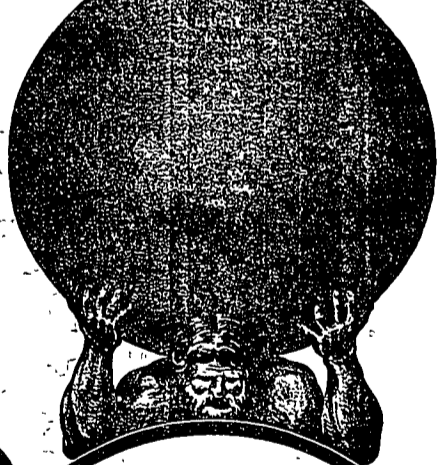

An industrial truck of special factory type has been given by the Lewis-Shepard Co for use in the Industrial Engineering Department. The gift comes through the interest of J. E. Freeman '14, who is with the Company.

A T Ward, a former student at Penn State, who is now with the Oxwold Acetylene Co of New York, called at the College during vacation to propose the gift of Oxy-acetylene Welding Apparatus, to the School of Engineering. This apparatus will be used in the regular instruction in the forge shop and also a thesis will be conducted by senior mechanical engineers on welded joints. Mr. Ward is a Bellefonte man who is now in charge of foreign sales for the Oxwold Company. He spent some time in South America.

A Brother to Atlas

The Ancients hailed Atlas, the giant who upheld their world, as the greatest embodiment of power. But Atlas was a myth. Science has produced a fit companion for Atlas, not a myth but a gigantic machine of iron, steel, and copper, with such tremendous power that it is fitting to call it "A Brother to Atlas."

Atlas performed his duty by upholding the world, and Westinghouse engineers are performing theirs in keeping the wheels of industry revolving. They are continually striving to create electrical apparatus that will conserve the energy of man and make our world a more desirable place in which to live.

Mrs. Fox was bragging one day about the large number of her cubs.
"How many cubs do you bring into the world at one time?" she asked the LIONESS.
"Only ONE," replied the Lioness—"but it's a LION."

MURADS COST 20 CENTS for a BOX of 10—BUT THEY'RE MURADS!

MURADS would be lower priced if we left out all or part of the 100% Turkish tobaccos of the purest and best varieties grown—or if we substituted inferior grades of Turkish tobacco.

But they wouldn't be MURADS—they'd only be Foxes!

"Judge for yourself—!"
