**MOTIVE POWER CLUB OF
PRE-WAR DAYS REVIVED**

After a lapse of three years the students in Railway Mechanical Engineering, as a result of several interesting meetings, have definitely decided to re-organize the Motive Power Club. The organization finally adopted was along the lines similar to that under which the Motive Power Club of pre-war days existed. Any student interested in railroad work may become a member and take part in all meetings as before but he cannot hold office. All officers must be elected from students regularly enrolled in the Railway Mechanical Engineering course.

It is recognized that the problems pertaining to railroad work are not of the same character as those encountered in other engineering fields, but, on the other hand, are of paramount interest to all engineers. For this reason it is expected that there will be quite a number of engineering students and students taking business courses who will become affiliated with the club. A complete program is being planned to cover all meetings of the second semester. This program will consist of talks on railroad subjects of the day, given by members of the faculty and prominent railroad officials. It is also planned to have everyone of the student members take an assigned part at each meeting in the presentation of a paper or magazine review that will enable them to become accustomed to presenting technical papers before engineering societies and similar organizations.

At the last meeting B. B. Watson '21 gave a very interesting account of railroad conditions in Siberia. Professors O. K. Harlan and A. J. Wood explained the detailed working and theory involved in the fuel saving appliances now being tested on the Bellefonte Central Railroad. This subject was of interest to those present because one of the tests was carried out only the day previous by a number of students in the department.

Such a club is one that will no doubt aid largely in preparing the students in the Department of Railway Mechanical Engineering, in an all around way, for entering their profession, but attendance at its meetings is not confined to these particular students. The meetings are open to everyone who is interested in the subjects that will be discussed in them.

**COLLEGE ATHLETIC PLAN
CHANGED SIX YEARS AGO**

Just six years ago Penn State's Athletics underwent an almost revolutionary change. At that time the Alumni Advisory Committee, after an extended investigation of local conditions and methods in force in other institutions, decided on a system of football coaching that was to become effective in the fall of 1916, at the same time that the one year residence ruling was to become operative. In its form of organization the new system provided for responsible supervision and direction not only for the playing season but for the entire college year. It afforded the benefits of having Penn State graduates on the coaching staff, and, by having as one member of the staff a graduate of broad football experience from another college, it would operate to bring to Penn State's style of play the best ideas of other football systems.

The new system provided for a coaching staff made up of a head coach, who was in charge of football activities throughout the year; an advisory coach who was to assist with the varsity squad; and a Freshman coach. It was also planned to occasionally call in for

AID TO MINE SCHOOL**

"Dick" Harlow, Penn State '13, was chosen to fill the position of head coach, with Lawrence (Bud) Whitney, a three letter Dartmouth man of the class of '15, as advisory coach. A short time after these selections "Dutch" Herman '12 was elected to fill the Freshman coaching position.

periods of a week or more, prominent Eastern football authorities to consult with the coaching staff.

Whereas, the work already done under unfavorable conditions indicates that much can be accomplished for the Mining and Metallurgical industries if proper facilities be provided; and

Whereas, the State School of Mines is dependent upon the State for its maintenance and it has not received sufficient support in the past to properly conduct its work and to perform its duties to the mining and metallurgical industries of the State, and has been housed in the worst buildings of any State Mining School of the United States thus handicapping, limiting and endangering its work and equipment; therefore

Be It Resolved, by the Central Pennsylvania Coal Producers' Association that we request and urge the Governor and Legislature of this great Commonwealth to grant the request of the Pennsylvania State College for funds which will permit it to properly conduct its work and make it a credit to this, the greatest of all mining states, which created it.

JAS. H. ALLPORT, President.
CHAS. O'NEILL, Secretary

doing under great handicap must be curtailed to the great injury of the institution and the hurt of the rising

generation unless the Legislature provides the necessary funds; therefore be it

Resolved: That it is the sense of this meeting that Pennsylvania State College merits the fullest and most serious consideration at the hands of the Legislature, and that the appropriation for the coming two years be in such amount not only to permit the College to continue its present work unrestricted, but that a program looking toward the enlargement of the institution and the widening of its scope of usefulness with an initial appropriation for new buildings be adopted for the guidance of future legislation; and be it further

Resolved: That copies of this resolution be forwarded to the Governor, to the presiding officers of the House and Senate, to the Chairman of the Appropriation Committee of the Legislature, to the members of the House and Senate in this and neighborhood counties, to the press and to all the Rotary Clubs in Pennsylvania.

**GROFF DISCUSSES
CHINESE SITUATION**

(Continued from Page Two)

tion, it would be well advised to invite foreign technical and agricultural experts to China to undertake an investigation of the agricultural condition together with Chinese experts who are well acquainted with it."

The New Day
"When the proposed institutions are finally established in China, Chinese students will find fitting centers in which to receive their training for rural leadership. Working hand in hand with the Chinese and Western experts who are giving full time and attention to the outstanding problems of industry, a large group of native leaders will be raised up that alone can meet the ultimate need. It will be an inspiration to this leadership to feel that the problems with which they are grappling are not only China's problems but world problems; and that solutions as worked out in China will have their reflex influence upon the agricultural development of other parts of the world.

"At present effort toward famine relief in China is only temporary. That there will be recurrences of the unfortunate calamity is to be expected until such time as China's rural life comes into its own. Meanwhile China's industrious, self-sacrificing peasantry is stoically facing death and awaiting that leadership which shall in turn enable them to banish famine from the earth."

**SEVERAL FINE GIFTS
PRESENTED TO COLLEGE**

(Continued from first page)
ment of a fellowship in Engineering Research.

Another gift of \$1,000 came from the Daughters of the American Revolution of Brookville, Pa., for the support of a scholarship in memory of George T.

Rogers '13 of Brookville, Pa., who was killed in France during the recent world war.

Officers Elected
The officers of the board for the ensuing year were chosen at this meeting, with the following result.

President, H. Walton Mitchell, Pittsburgh
Vice-President, James G. White, New York City
Acting Secretary, Ray H. Smith, State College
Treasurer, D. K. Peet, State College

The executive committee of the board was also re-elected as follows: H. W. Mitchell, Chairman; E. S. Bayard, J. P. Shields, E. R. Pettibone, E. L. Orvis, Vance C. McCormick and M. W. Lowry.

The Rotary Club of Harrisburg entertained the Board of Trustees and the Penn State Alumni Club of Harrisburg at a luncheon in the ballroom of the Penn-Harris Hotel last Monday noon. The affair was quite enjoyable to all in attendance and Lieutenant-Governor Beldeman, Judge Mitchell and Secretary of Agriculture Hasmussen were the principal speakers. Approximately two hundred guests were at the luncheon and were entertained, among the features of which were moving pictures showing the college at work.

**ALUMNI EVENTS WILL BE
FEATURE OF FESTIVITIES**

(Continued from first page)

Annual Meeting of the Board of Trustees will be held at this time also. Phi Kappa Phi, the honorary scholastic fraternity will follow its usual custom again this year and initiate new pledges into the organization at eleven o'clock, and in addition hold the annual business meeting of the society. At one the Penn State Alumnae Club will stage a luncheon in the Women's Building and indications point to a large gathering of alumnae to this event. The varsity baseball team will play its second game of the week in the afternoon and at seven-thirty the Thespians will entertain the alumni, visitors and students with one of their characteristic productions.

Although in former years the festivities continued over until Wednesday night the new program calls for the ending of Commencement Week at midnight on Tuesday. Tuesday will accordingly be the last day but several events promise to make it one of the biggest days and one which will in all probability be remembered longest by the members of the graduating class. The Auditorium will be the scene for the Commencement Exercises which are scheduled to be held at ten o'clock and which will be preceded by the usual

procession. At two in the afternoon delegates will meet in Old Chapel and in some room of Old Main and the election of trustees will be carried on. The reception to college guests at five o'clock on the president's lawn will close the week of festivities arranged by the college.

**BELLEFONTE FIVE WILL
BE MET IN RETURN GAME**

(Continued from first page)

that exists and have thus acquired greater speed and endurance. They are the pick of a squad of over twenty men and constitute a well balanced team.

The team that will start the game tomorrow will be the usual five, namely Turner and Frank as forwards, Schoenfeld at the pivot position, and Wilson and Cornwall as guards. If need arises substitutions will be made during the contest and the men who have made the strongest bids for positions will be given a chance. Up to the present time Bolt and Douglas have shown up better than the other guard candidates while Fixter is making a good fight for the center position and Warner has exhibited fine ability as a forward.

The five who will represent Bellefonte Academy will probably be the identical ones who faced the Freshmen in the game. They are fast on their feet and are excellent shots. King and Me-

Bride especially will command close attention on Saturday as it was they who created havoc among the Yearling town two weeks ago and almost brought victory to the Academy quintet. The line-ups are as follows:

Freshmen
Turner.....guard.....Belleville
Frank.....guard.....DeWaters
Schoenfeld.....Center.....Alwine
Wilson.....forward.....McBride
Cornwall.....forward.....Kaplan

**COUNTY AUTO SHOW
BEGINS TOMORROW**

(Continued from first page)

der the direction of Mr. C. A. Fessenden, head of the Department of Mechanical Engineering. On next Friday afternoon at three o'clock Professor R. U. Blasingame of the college will give a special lecture on the subject "The Care and Maintenance of Farm Tractors." Professor Blasingame has a national reputation as a farm tractor expert and his lecture will be of the same nature as one which he will deliver before the delegates to the National Tractor Association Convention at Cleveland, Ohio, in the near future.

All in all, the show promises to be a successful innovation and it is quite probable that it will become a yearly feature as interest increases in the project.

**But a good wheeze-
I'll leave it to you**

I LOVE the ladies.
BUT LIKE most men.
I OFTEN guess wrong.
ON WHAT will win.
A SMILE from them.
I ALWAYS say.
IT'S BETTER to laugh.
THAN EVER to worry.
SO ONCE, when.
THE DAM broke, and.
A FLOOD hit town.
I THOUGHT I'd just.
CHEER UP my wife.
AND SO I said.
"IF THE worst comes.
YOU CAN float down.
THE RIVER on.
THE FAMILY music-box.
AND I'LL accompany you.
ON THE piano."
WHICH WAS all wrong.
POOR HUMOR, she said.
WAS OUT of place.
IN TIME of danger.
SO KIPLING was right.
"A WOMAN is only.
A WOMAN, but a good cigar.
IS A smoke;" only.
HE SHOULD have made it.
MY CIGARETTES because.
YOU'RE BOUND to get.
A SMILE from them.
THEY ALWAYS "satisfy."

TAKE the silky, tender leaves of choicest Turkish; blend them with the best Domestic tobacco that money can buy—blend them in the exclusive, can't-be-copied Chesterfield way—and you get a "smoke." Yes, and something more—you get a cigarette that honestly "satisfies."

In packages of 20 protected by special moisture-proof wrapper. Also in round AIR-TIGHT tins of 50.

They Satisfy Chesterfield CIGARETTES
