

MASS MEETING CALLED TO DISCUSS HONOR SYSTEM

(Continued from first page)
It of honesty and fair play should not be limited but fostered in all work. This is the principle of the true Honor System and nothing can be substituted for it.

Other Important Changes
Another important change that deserves particular mention is the one increasing the number of Honor Committees and limiting the scope of their work.

In the past it has been the custom for the instructor to leave the room as soon as the questions are read known to the students.

ENGINEERING NOTES
Equipment for the new Engineering Laboratory is being received from time to time and is being installed as rapidly as possible.

MELLINGER FANS FOURTEEN BATTERS

(Continued from first page)
officers. He fanned at least one batter in every inning except the fourth. The line-ups follow:

Table with columns: Penn State, AB, R, H, O, A, E. Rows list players like Yearke, Killinger, Ullery, etc.

Table with columns: Lebanon Valley, AB, R, H, O, A, E. Rows list players like Cohn, Roman, Matheison, etc.

Struck out, by Wolfe 6, by Mellinger 1. Double play Killinger, McArthur, and Ullery.

SENIOR CLASS TO ENDOW PENN STATE

(Continued from first page)
again this Saturday evening to check over the list and to see that no student in the class has been missed.

The selling committee is composed of: R. K. Williams, chairman; S. S. Sherman, H. M. Sheffer, H. S. Fisher, C. D. Mowbray, L. S. Cooper, A. D. Pingle, T. H. Dullison, G. A. Goodling, L. G. Baker, O. P. Smith, R. P. Bartholomew, C. A. Goldstrom, F. H. Leuschner, J. F. Hughes, P. T. Hammonds, D. Mattner, F. G. Church, H. S. Davis, J. R. Skeen, D. B. Dahl, J. A. Glenn, E. J. Bannoy, A. E. Zimmernan, N. R. Korb, F. W. Glading, W. C. Menzies, G. T. Horner, A. W. Pond, W. J. Jennings, R. K. French, A. B. James, K. J. Blankenhiller, J. S. McElvaine, G. W. Supplee, W. O. Teufel, G. A. Deard.

MONEY NEEDED TO ERECT MEMORIAL

(Continued from first page)
and the day following have been set aside for this task.

The tablet to be inscribed and designed by the committee of which F. G. Church '21 is chairman, will be a credit to the students of the college for its one of great beauty and attractiveness, set off by simplicity of style.

Engineering, all of whom were asked to submit some original design for the memorial. The winner of the contest proved to be C. V. Dett, who is to be commended for his excellent work. The tablet is to be of bronze, twice as long as it is wide, and to be of the shape pictured in the photograph. A suitable inscription at the top of the tablet will serve to introduce the hundred names that will appear in alphabetical order below.

STRONG TEAMS TO GO TO PENN RELAYS

(Continued from first page)
that he out ran Baron in the Harvard meet last week. In addition to Thompson, Baron will meet several strong western hurdles. The swiftest among these are Krohn of Wisconsin, Galtner of Kansas and Yount of Redlands California.

Besides these vainglorious men in the "speed" events, Penn State is also represented by a Freshman. L. E. West, by name who has been doing exceptional work in the discus and javelin throwing, in which events he will take part.

All over the United States athletic interest will be centered this week and the records of the various colleges representing colleges and universities from California to Maine will compete for honors. Nearly every year one or two records are broken at these events and from the calibre of the stars who have entered the games, this year should prove to be no exception.

In addition to the American entries, an exceptionally strong team, representing the University of Paris, will take part in the carnival. These men have won considerable fame on the French track and will meet the Nittany runners in the distance and middle event.

CATTLE FEEDER'S DAY PLANS BEING FORMED

The Annual Cattle Feeder's Day has been set for May fifth—an all-day session. Professor Tomhave has arranged a well rounded out program which will include short speeches by President Thomas and Dean Watts, to open the morning session at ten o'clock, followed by a discussion of experimental cattle feeding at the Indiana Experiment Station, Purdue, by F. G. King. At one thirty the results of this year's feeding tests will be explained after which the meeting will be adjourned to the steer pen for an inspection of the different lots of steers.

Novel Suggestion Made by Student

To the Editor:
High up on the bare slope of the Wawatch Mts; immediately behind Salt Lake City is an enormous white capital letter "U" that is visible from every point in the Great Salt Lake Valley.

Further west, on the hills overlooking Berkeley and San Francisco Bay, the golden "C" of the University of California is to be seen. In size, it is sixty by thirty feet and made of concrete.

Near Ogden, Utah a great "V" adorns a steep slope in honor of Brigham Young College, and Livingston, Montana grows out of a huge white letter "L". The Montana State Agricultural College boasts of having the largest in the country, for its is two hundred feet wide by fifty feet high.

The University of Arizona has the letter "A" one hundred and sixty feet, built of masonry on Sentinel Peak. At night on special occasions, this letter is outlined by burning piles of oil-soaked waste.

Why not bring this idea East? Old Mount Nittany or Bald Top would make a fine place for a large letter "S". A fine college custom for the Freshmen could be introduced, also a good substitute for the one time bon-fire could be found in a large white concrete "S" the largest in the county, would be a fitting honor for the students of Penn State to confer on Old Mount Nittany.

OIL PAINTINGS ON EXHIBITION THIS WEEK

During the present week there will be an exhibition of oil paintings on display in the galleries of the Fine Arts Museum, including a rather extensive showing of landscapes and figure studies, painted by Miss Margaret Law, of Baltimore, Maryland. The exhibit is especially interesting due to the color courage of the artist, who uses pigments of brighter hues than usual in order to accurately interpret the moods of nature and of man.

Miss Law has chosen a field of endeavor which is largely her own at the present time. Like few other painters she has gone into the South to study subjects. Her growing color compositions picture such scenes as Dinky Camp Meetings, Negroes Laboring in the Cotton Fields, and dozens of similar subjects which show as with

photographic vividness, glimpses of the picturesque daily life. Miss Law received her art training in both Europe and America. She has been a pupil of the noted artists, Chase, Hunt, Morn, and Hawthorne. She is a member of the Society of Women Artists of America, the Baltimore Water Color Society, and various other organizations. The work of this artist has been very closely followed by Dean Knight of this college, and it was thru her suggestion that the exhibit has been brought here.

PENN STATE PROFESSORS ELECTED TO M. E. OFFICES

The recently organized Central Pennsylvania Section, American Society of Mechanical Engineers, will hold its first meeting at State College on May twenty first. Important engineering problems of the day will be discussed by engineers of wide reputation.

The following speakers have been announced: Mr. Fred J. Miller, Past President, American Society Mechanical Engineers, will speak on "New Duties of Engineers"; Dean R. L. Sackett, will deliver an address on "New Opportunities of Engineers"; Dr. Lin A. Hollis, President of Worcester Polytechnic Institute, and a Past President, American Society Mechanical Engineers, has chosen for his subject "Elimination of Wastes in the Industries." The complete program will be published later.

The following officers of the Central Pennsylvania Section were recently elected: chairman, A. J. Wood, State College; vice-president, Lyford H. Fry, Burnham; secretary, P. P. Henshal, State College; chairman membership committee, C. W. Bell, Milton; chairman program committee, J. W. Henszvez, State College.

OIL EXPERT WILL TALK TO ENGINEERING STUDENTS

Dr. David White Chief, Geologist of the United States Survey will deliver an illustrated lecture on the "Origin of Oil Shales and Gneiss," this Friday. This is a live subject today in the minds of many scientists and engineers since oil shales must supply most of our petroleum and similar oils when the oil wells are exhausted. Dr. White is one of the foremost geologists and paleontologists in the country and it is an unusual opportunity to hear a man of his standing on such an important subject. The lecture will be given at 1:30 p. m. in room 209, Old Mining Building and everyone is invited to attend.

MOTHER'S DAY

Comes on May 8th this year—only twelve days off

We can supply white carnations and will send them for you direct to her.

You may prefer something from our attractive line of gifts. Let us suggest something.
