EDITORIAL

Are you in college? Do you know what's what about this campus every minute of the twenty-four hours of the day? Yes, you student with that Collegian under your arm, you've caught the idea. You know just how and where you are going to get a line on all the action about this old place. You have learned what school, your school, with its traditions that promote its extension and growth far beyond the classroom on so-called "to-the-minute" stuff, right to your door.

Every activity, social, athletic or scholastic, is your activity. Every phase of school, athletic or scholastic, routine is part of your college training. Because of the necessity and demand for information in detail every minute of the time you spend in college, your college paper exists. Each in the minutes when the Collegian became a part of the scholastic world in this community, every fellow dug down to keep the new attempt alive. It lived. Why? Each and every individual student participated in the institution did his share. No man was expected to do his roomies job of supplying the college dope. "Lend me your Collegian" was a sure invitation for a ducking in the main barrel.

Schedules of thirty to forty hours allowed for a subscription of over sixty per cent of the student body during the past two semesters. Surely, with only fifteen or twenty checks on your roster, the seventy-five per cent mark can be reached. Don't loiter that fellow who is busy keeping alive and in touch with all the "Big Doings", with questions about the Collegian calendar. Have your own in your pocket and know what the activities of the minute about town are. Activities are increasing with the growth of the institution, and since the Collegian was first established, many new phases of college life have been permanently recorded in it. It is only with the sincere cooperation and enthusiasm of every member of the student body registered here this season that a true and faithful record of the term can be kept.

Help the Collegian—your publication—grow. Let it be the paper you personally support and boost. Don't individualize this session by making this publication fall below its previous records in subscription and material. Write if you will, new talents are often brought to the fore through a college paper. Have real Penn State pride and spirit. Let that Collegian you are reading be YOURS! Get into college.

CIVIL ENGINEERING CAMP

WILL BE HELD AT LAMAR

Between the Sophomore and Junior years of the college course in Civil Engineering, each student must spend several weeks at a summer camp of practical instruction in Civil Engineering. For several years this course was conducted at Eagles Mere, one or two others at State College, while recently the camp has been held in Clinton County near Lamar. The camp is situated along the well known trout stream, Fishing Creek, in one of the beauty spots of this section of Pennsylvania. Last summer about sixty-five students attended the camp and every one attested to the wonderful time that they experienced while there. This summer about fifty students are attending and according to all reports are enjoying camp to the fullest extent. While at camp the men partake in most all of the practical work a civil engineer will encounter throughout his work, such as national surveying, including reconnaissance, preliminary and location surveys, triangulation work for map drawing, hydraulic work, including measurements of flow by means of weirs, and stream gauges. Astronomical observations are also taken while at camp, making a very complete course for one intending to follow civil engineering as a life work.

PENNS CAVE EXCURSIONS

The regular Penns Cave Excursions by automobile, will start Saturday, July 9th, and continue throughout the Summer Session. Two trips will be made each Saturday, one leaving at 8 o'clock and returning at 12 m. The other at 1 o'clock and returns at 5 p. m. Excursions will start from west end of Main Building. Persons wishing to go on the excursions will leave their names at Room 206, Main Building before 5 p. m. Friday. Special trips, at other times, can also be arranged for by calling the Industrial Engineering Office, or 154-R, Bell Phone. Prof. Reider will be in charge of the excursions. Automobile fare \$1.50. Entrance to cave, 75 cents.

DR. ARMSBY AGAIN HONORED

Degree of Doctor of Science Conferred Upon Him for Second Time

At the commencement of the Worcester Polytechnic Institute on June 10th, the class of 1871 celebrated the fiftieth anniversary of its graduation. Dr. H. P. Armsby, of that class, received the honorary degree of Doctor of Science, this being the first honorary degree ever conferred by the Institute. This is the second time the degree of Doctor of Science has been conferred upon Doctor Armsby, the other being at Yale in 1920, when he was the only one to receive that honor. Dr. Armsby is director of the Institute of Animal Nutrition at The Pennsylvania State College and is a leading authority on animal nutrition. It will be remembered that after the armistice was signed, he was chosen by the U. S. government to go abroad in the commission concerned with the food problems of Europe.

FIRST ARMY DANCE DRAWS BIG CROWD

The first of the season's Army dances, held last Saturday night, was a huge success. The music was extraordinarily good, the crowd was congested and the new Army floor passed all expectations. Geig's Orchestra furnished the harmony and they fully lived up to the reputation they have made for themselves here in the past. They looked to play return engagement in the Army on Saturday, July 16.

The plan of making the admission per individual, and inviting both girls and men to come alone worked well. There was a slight scarcity of men, but after the news of the good time the ones had that were there gets out, that accident won't happen again. There were probably three hundred and fifty people there, and the crowd grew livelier as the evening progressed. A little excitement was created when some rude person spread a lot of powder caps over the floor, but no harm was done.

On Friday night of this week there will be another dance held at the same place. Geig's Orchestra is finishing the music and as the management is placing a new sounding board behind the orchestra platform and is giving the floor some extra treatment it should be a good party.

Dance Alpha Zeta, Friday July 8th

NEW DEAN OF WOMEN FOR SUMMER SESSION

Miss Margaret Ritenour, a member of the faculty of the Uniontown high school, has been appointed to the position of Dean of Women for the summer session at the Pennsylvania State College. She will have supervision over the social and other activities of the approximately 1200 women enrolled for the session. Miss Ritenour's office hours are from 7:00 to 12:00 A. M., at her office in Old Main.

LOST! Pocketbook

Containing between \$50 and \$75, and a check for \$3.50 payable to N. A. Shope. Was left on writing desk at First National Bank. \$10 reward will be paid for its return to the Collegian office.

DEMONSTRATION SCHOOL TO BE HELD THIS SUMMER

In connection with the regularly scheduled summer school work to be carried this summer, the Summer Session has arranged for a very complete course in Demonstration School work. This school will run from Wednesday, June 29th, to Wednesday, August 3rd, and will give anyone desiring to take the course a very good chance for observations of the various types and methods of the modern teachers in each line of work.

The Demonstration School is intended to supplement the courses in the observations and will meet in regular conferences with the instructor in charge of the class. Students with or without teaching experience, are admitted to such observation classes. When classes in any of the grades are not being taught by one of the instructors in Methods, they are assigned to different members of the corresponding observation classes, who will have the opportunity to teach for a period of one week under the supervision of the instructor in Methods. Such classes are not open to visitors and are intended solely for those whose work is being supervised. No effort has been spared to secure instructors who are specialists in their lines and are prepared to make their work practical and helpful in every particular.

All model classes are held in the rooms on the first floor of the new Liberal Arts Building, next to the Library. The number of observers in any one class is limited to thirty. Students registering for work in the Demonstration School are recommended to select a related course in methods found on Page 82 of the summer catalogue.

All student observers report for the first class Thursday morning, June 30th. The periods for practice teaching begin on Wednesday of each week, the first period beginning Wednesday, June 29. All observations close on Friday, August 5, as well as the course in Ed. K.

SEVERAL BOY SCOUT CAMPS DURING JULY

The Department of Agricultural Education is making preparations again for the annual camp of the Boy Scouts that are held on the campus during the summer. The camp this year will cover three periods and groups, from July 5-12, July 13-20, and July 21-28. As in former years the sleeping quarters will be provided by the college authorities, and all the college equipment necessary will be thrown open to the use of the Scouts. Classes will be offered in the various merit badges tests so that the boys will be able to pass some of the requirements for the different grades of Scouts. Members of the faculty under the supervision of T. I. Mairs, Special Field Scout Master, will give them instruction in these branches. These classes of the Scouts up to the present time have been highly successful, and this year is probably going to be a banner one, although at the present time it is not known how many will partake in the encampment this year.

SUMMER SESSION ATTENDANTS WED

Monday afternoon, June 27th, at the Reformed parsonage, Bellefonte, Pa., Mr. G. Dewey Rupp of Lehigh, and Miss Grace Irvin Peters of the same place, were married by the Rev. Dr. Ambrose M. Schmidt. Mr. and Mrs. Rupp are attending the summer school here.

MANY WILL TEACH

One-fourth of the 465 men and women who were graduated from the Pennsylvania State College a few weeks ago will become school and college teachers. Many will enter the vocational school field.

INDUSTRIAL DEPARTMENT OFFERS RARE OPPORTUNITY

During the summer season for teachers the Department of Industrial Education will conduct a demonstration and practice teaching class in order that teachers enrolled can acquire experience in teaching industrial work, and are desirous of securing a class of twenty boys between the ages of fourteen and sixteen years. The work will consist of high wood and metal work with a possible chance of some time being devoted to automobile repair. The class work for boys will begin Monday, July 11th, and continue to the end of the six weeks summer school. The class period will be from 9 to 11:15 A. M. Boys interested in taking the course will send their names, as soon as possible, to Professor G. H. Reider, Industrial Engineering Department. This will afford an excellent opportunity for the boys of town to acquire a knowledge of the use of tools and how to do things, and those who take the course will in after years learn that the time has been well spent.
