

## COLLEGE BAND TAKES IN FIFTY NEW MEN

Time of Rehearsals Announced at  
Meeting—Band May Go To  
Georgia Tech Game

Sixty-seven new men reported for the try-outs for the first band last Tuesday evening of which approximately fifty were accepted for positions on the following night. The director of the band was well pleased with the material with which he has to work and is optimistic about the year's outlook. It is not improbable that the band will journey to New York with the football team to the Georgia Tech game this year, in addition to the trips to Pitt and Philadelphia.

Some misunderstanding has occurred concerning the time of the rehearsals. For the benefit of those men who are still in doubt, the first band will rehearse every Thursday evening at six-thirty in the Band Room—Old Main. The second band will rehearse on Tuesday evening at the same time and in the same place.

The material that reported for the orchestral try-outs was also good, although the men are unacquainted with the work. The orchestral rehearsals are held on Tuesday evening at six-thirty.

Later on in the season, the band and orchestra will alternate with the other musical organizations of the College in giving the regular Sunday afternoon concerts that were so successful last year.

### AGRICULTURAL NOTES

Professor W. H. Tomhave of the Animal Husbandry Department is in Springfield, Mass., looking after the

livestock department of the Eastern States Exposition of which he is a director.

Doctor Fletcher of the Horticulture Department announces that the orchard survey has been completed and is in the hands of the printers at Harrisburg. This survey was made last summer by the Horticulture Department for the Agricultural authorities at Harrisburg.

The Horticulture Department also announces that a new course in the by-products of horticulture has been installed. This will, for the present, consist of the forming of grape and apple juices.

## NEW OFFICER COMES TO MILITARY DEPARTMENT

Captain D. C. Pillsbury, of the fifty-fifth United States Infantry has been ordered by the War Department to come to State College and take up duties with the college R. O. T. C. unit. The captain will arrive within a day or two and his presence here will bring the total number of army officers connected with the college military department up to seven. Because of the larger amount of class room work that has been embodied in the military course this year, it has been found necessary to increase the size of the staff of the military department and it is for this reason that State

In addition to the seven regular U. S. army officers connected with the Military Department, the regiment has seventy-three cadet officers from the

Umbrella exchanged by mistake. Engraving on handle 'Mable Myers. Please exchange at Registrar's Office.

Senior and Junior classes and also has a total of thirteen hundred Sophomores and Freshmen in the ranks. Bandmaster W. O. Thompson expects the Regimental Band to be better than it has been in years, for a wealth of good material has been found among the members of the Freshman class.

The Commandant is expecting the Regiment to take an important part in the Inaugural Ceremony and he hopes to have the organization in such a shape that it will make a creditable showing at that time.

## TWENTY MEN PASS GLEE CLUB TRIALS

Last Monday evening trials were held for membership in the Glee Club. The men listed below passed the tests successfully and will report for rehearsals with the club every Wednesday night in the Auditorium at seven o'clock.

Nicklin, M. E. Krug, E. M.  
Miller, R. A. Weaver, J. M.  
Reckman, J. F. Duncan, J. J.  
Swab, E. M. Ritter, J. D.  
Mehney, M. A. Minkus, M. A.  
Willis, L. O. Johnson, H. F.  
Creasy, P. F. Purvis, R. E.  
Ness, W. E. Mintner, C. W.  
George, F. P. Rice, R. S.  
Speckharts

Meyers, J. Schlosser, M. E.

## JUNIOR CIVILS SPENT MONTH AT SUMMER CAMP

Only one entire day of work was lost by the civil engineers at their summer camp near LeVine this summer. The camp, which was located on the Washington Furnace Tract, listed from the sixteenth of June to the sixteenth of July, and was under the direction of Professor Raymond O'Donnell, Associate Professor of Hydraulics and Sanitary Engineering, who was succeeded during his illness by Professor Homer Kistner, of the civil engineering department.

The camp was attended this year by forty-six students and eight faculty members who lived in tents as usual. The work at the camp consisted of triangulation and topographical work and practice in running a railroad survey.

But work did not occupy the entire time of the civils. Ample provision was made for recreation in the form of baseball and swimming. The men report an interesting ball game with Tylersville, a nearby town, in which the State men were victorious by the decisive score of ten to five. Snake hunting was also a favorite sport and many fine skins were obtained for souvenirs.

Professor D. D. Walker was a frequent visitor at the camp as were Deans Sackett and Warnock.

## SOPHOMORES HOLD BUSY SESSION MONDAY EVENING

The class of 1921 engaged in a busy session on Monday evening when they held their first meeting of the year in the Bull Pen. Naturally the matter of a Poster Night was the thing first considered, and after a bit of discussion this was favorably decided on.

J. C. M. Mochiz, the varsity cheer leader, spoke a few words to the class, urging them to start this year with the same spirit they manifested last year. Afterward he led the class in several college yells which he expects to use this year. Among these were the Triple Cheer and the Locomotive Yell, which he believes to be second only to the College Yell.

Another matter for which arrangements were made, was the snake dance to be given on Saturday, Sept. 21. Along this line, it was decided to introduce a novel idea if it can in any way be made practical.

One other important feature of this meeting was the admission of twenty-five new members to the class of 1923. These men have come here from some of the best known colleges of the country, and are regularly enrolled as sophomores.

## ENGINEERING NOTES

Professor F. H. Armstrong of the Electrical Engineering Department resigned his position last June on account of his health. Professor and Mrs. Armstrong then left for the Pacific Coast on an auto trip. A recent card states that they are located in Los Angeles. They took camping equipment and cooking utensils with them and camped out all but three nights on the way to the coast. Professor Armstrong reports the trip as being very beneficial to his health.

Professor Bradford of the Electrical Engineering Department and Mrs. Bradford spent a month this summer camping and canoeing in the wilds of Northern Canada.

Professor Kocher of the Department of Architectural Engineering and Mrs. Kocher spent part of the summer at Bay View, Michigan.

Doctor D. C. Woodruff made his second trip to the coast this summer. From there he went up the Columbia River, down to the Yellowstone National Park and home. Doctor Sparks accompanied him on the 8000 mile trip.

Professor Cochran of the Mechanical Engineering Department also made a long trip out through the west this summer.
