UNIT BASKETBALL TEAMS START PLAY TOMORROW

Many Units Expected To Enter Quintets in League—Games Announced

Prospects look bright for a real unit basketball organization for this season as everything possible is being done to arouse the interest of the non-fraternity men in an inter-unit basketball league. It is practically assured that every unit west of Allen street will be represented in this league and it is hoped that the whole twenty-five units of the borough may be scheduled.

A tentative list of eight men to represent each unit will be turned in by unit managers not later than the night of the first game. This list will be subject to change at any time during the season as legal substitutions may be made with proper notification by the managers of the different units. It has been definitely decided by the Athletic Association that all Freshmen and Sophomores playing on the unit teams will be given full credit for gym work. Lockers will be assigned as soon as the various lists of names have been received and checked. All names of players and any other information relative to unit basketball should be sent to W. F. Hileman, 142 Frazier street, as soon as possible. Three lockers will be given for the use of each unit team so that the fellows may have every convenience for practicing whenever they have any spare time. It is up to each individual unit to get as much of their practicing as possible done in the daytime as the games will be played at night and there will be very little time then for preliminary practice. A complete unit schedule of all games for the 1922 season will be published in Friday's Collegian and a similar list will be posted on the bulletin board in Old Main. The eastern part of the town has been rather slow in getting in reports and it is urged that some of the upperclassmen in these different units take the responsibility upon themselves to get a list of eligible players and turn the names in to Hileman as soon as possible. "Bez" is very desirous of having a real unit organization developed and expressed a desire just before he left for Washington that the fellows get together and produce teams.

Basketball Schedule

Wednesday, Nov. 30	20 vs 13
20 vs 7	
Wednesday, Dec. 7	25 vs 5
9 vs 6	
Wednesday, Dec. 14	21 vs 3
19 vs 4	
Wednesday, Jan. 5, 1922	17 vs 15
18 vs 16	
Monday, Dec. 5	21 vs 1
19 vs 2	
Monday, Dec. 12	23 vs 10
22 vs 8	

All games will be played between 8 and 9 p. m. Teams must be ready to play at scheduled time. The managers can secure the required forms at the Athletic Office upon which to report the names of the players.

EDDY IS SUCCESSFUL IN THIRD CAMPAIGN

(Continued from first page)

In the two years which have passed since he last visited Penn State he has traveled all over the United States conducting similar campaigns in other institutions and last summer he went back to Europe in order to make an extensive study of religious, political and economic conditions on that continent. Previous to that time Eddy spent a great amount of his time as student secretary among the students of the orient, in which capacity he had charge of practically all the Christian work in the institutions of higher learning of India and China. During the war he was sent to France to put his message before the soldiers. Books could be written on the experiences which Dr. Eddy met in his travels through India, China, Europe and the United States. Everywhere he went he took his message.

His travels during the past summer, which was spent studying economic, social and political conditions in Europe, have enabled him to bring a true message concerning the suffering masses of humanity on the other side of the Atlantic. Much of his time was spent among the leaders of thought and politics in these countries and enabled him to get a particularly keen understanding of European conditions.

The World Situation
Dr. Eddy used this background as the basis for his first lecture, "The Challenge of the Present World Situation." In which he explained the terrible conditions existing among students of Europe and discussed conditions in almost every country in Europe. Dr. Eddy's understanding of these conditions and his travels throughout the world also put him in a position such that he was able to present a discussion in favor of the limitation of armaments movement, the like of which has never been heard at Penn State.

Disarmament
In discussing the Arms Conference at Washington, Dr. Eddy used as his text that portion of the sermon on the mount in which Christ said, "Blessed are the peacemakers." Dr. Eddy believes that the Washington conference is the greatest step forward that the world has taken in years. He explained the dark and terrible conditions in Europe and yet looked at the exciting conditions there in an optimistic fashion, likening the present gloom there to the intense darkness before dawn. He believes that the manner in which Europe is now divided into countries makes future wars inevitable there unless some adequate action is taken by the Limitation of Armaments Conference to prevent it.

Economic conditions and conditions of international bankruptcy make it essential for the armament movement to be faced fairly just as the slavery problem was faced years ago, in order that the men who died in France shall not have died in vain and in order that we may have peace on earth. Such, in short was the message that Sherwood Eddy brought in his message last Sunday morning when he spoke at

Campus Problems

On Saturday evening Sherwood Eddy discussed campus problems at Penn State. Previous to the war it had been his custom to give this lecture to men only. However, since Mrs. Eddy was unable to accompany him on this trip and speak to the women of the college and since conditions the world over have changed considerably within the last few years, the lecture was given to both men and women. Dr. Eddy talked directly from the shoulder and delivered one of the most interesting lectures of the entire series at this meeting.

In the final meeting of the campaign which was held Sunday evening, Dr. Eddy discussed the meaning of life and gave a resume of the entire series of lectures. He said that Penn State could well be proud of its baseball team and its football team and that it could be even prouder of its spirit, stating that there is hardly a college in the United States where so many fellows would turn out to listen to a series of lectures such as was given here during the past week end.

THE SPIANS HOLD TRIALS FOR WINTER OFFERINGS

Mr. M. H. Harris who has charge of the Spians, states that the try-outs for the mid year performance are now being held. It is hoped that those who are to participate will have been chosen soon, so as to permit of intensive preparation for the production of the entertainment, which, it has been promised, will be of the same high order as heretofore.

SYRACUSE FRESHMAN GIVES DINK TO GENERAL DIAZ

A freshman at Syracuse University gave General Diaz his freshman cap when the Italian hero visited that place. As the General was leaving the gymnasium the freshman presented his dink with a smile. The Command-in-chief of the Italian armies donned the cap and rode away from the campus.

CERAMICS CLUB ORGANIZED AT RUTGERS COLLEGE

A Rutgers Ceramic Club has been organized for those students interested in the manufacture of pottery and allied trades at Rutgers College. Because of the increasing number of students taking the course in ceramics it was thought advisable to bring the men together who were interested in the same occupation.

NEW YELL ADOPTED FOUR YEARS AGO BY STUDENTS

The "New" yell which has become so popular was first tried at a student rally held in the Old Chapel, November fifteenth, 1917. It met with such great enthusiasm that it was used at a football game the following Saturday. Not long after, it was adopted as a college yell.

MOSEMAN'S PEANUT BUTTER

Has the chaff and Embrio removed. That is why it has the real nut flavor, sweet and smooth.
Ask your dealer for Moseman's, Lancaster, Pa., Peanut Butter and be convinced, or mail your order.

COLLEGE COWS PRODUCE HIGH YEARLY AVERAGE

Recently Compiled Records Show Great Superiority in Annual Milk Products Yield

The data recently received from the College dairy barn certainly shows that Penn State's dairy cows have by no means been loafing. A very gratifying record for milk production was made during 1920, and Mr. Jones, who is in charge of the dairy herd, and all others who had to do with making this admirable record are to be sincerely congratulated.

Fifty cows were in milk during 1920, with an average number of thirty nine and seven tenths cows for the whole year. The average production of these cows was 5,302 pounds of milk and three hundred and twenty-three pounds of butter fat, the average age of the cows establishing this high record being three years and eleven months.

According to the 1920 census, the average production of milk for Pennsylvania dairy cows was 4,334 pounds, while their average yield of butter fat amounted to one hundred and seventy five pounds. Thus it is seen that the cows in the college are producing almost twice as much milk and butter fat as the average herds in the state of Pennsylvania. In fact, if all the 385,855 cows over two years old in this state were to produce an average as much milk as the cows in the college herd, 3,515,072,640 pounds more milk would be produced in addition to the amount now being produced yearly in Pennsylvania. If the dairyman and farmers of this state were to produce this extra three billion pounds of milk each year, and if they should sell it at the rate of two dollars a hundredweight, they would take in the enormous sum of seventy billion dollars over the above what they now receive for their product.

This is but one more fact to be added to the conclusive evidence that scientific dairying, practiced in a sane, practical manner by interested and thinking persons, will yield an abundant reward.

BUTLER COUNTY CLUB TO HOLD IMPORTANT MEETING TOMORROW

The Butler County Club will hold an important meeting at 306 West College Avenue, tomorrow night, at 8:30 o'clock. Every member should be present.

WORK ON 1923 LA VIE PROGRESSES RAPIDLY

Completed Personnel of Staff is Announced—First Part Nearly Ready for Press

Work on the annual publication of the Junior Class, La Vie, is now in full swing and rapid progress is being made toward the completion of this volume. The staff is leaving nothing undone in their efforts to make this publication of the La Vie one of the best editions that have ever been written by the Junior class. I. S. Adams, editor-in-chief of the La Vie Staff, states that according to the progress being made at present on the work that he expects to have one-half of the book in the printers hands before the Christmas vacation.

The various phases and departments of the work in compiling the material for the La Vie are in charge of departmental editors and their assistants. A great deal of responsibility rests upon these men and in order that their work toward the completion of the volume may be successful it is necessary that they have the entire cooperation of the students.

Business manager H. T. Axford reports that all the pictures of the members have been taken and are ready to be printed. However it is necessary for all clubs and fraternities who desire to have group pictures taken that they have appointments made as soon as possible with the Penn State Photo Shop, before the Christmas vacation.

The lists of activities that accompany each member's photo is in charge of W. C. Roxby. The method of securing these activities will be practically the same as has been carried out in previous years. Printed blanks on which the lists of activities are to be filled in by each member will be distributed among the several buildings on the campus. Here the members of the Junior Class will fill in the blanks and deposit them in a box. As yet, however, the blanks have not been received from the printer. Notice of their arrival and the buildings in which

they can be found will be announced in a later issue of the COLLEGIAN.

The proofs for the La Vie pictures are now here and Miss Shapen, the representative, will be at the "Y" hut for the remainder of the week. The proofs are secured by the number corresponding to the number on the photographer's receipt. Numbers from 300 to 100 will be taken at the "Y" hut all day Tuesday, 400 to 500 on Wednesday 500 to 600 on Thursday. It is important that all Juniors select the picture that they desire to be printed in the La Vie. Orders will also be taken for extra pictures at this time.

Discrimination

Who can discriminate more carefully than the college man? To his natural equipment are added the resources of culture and the association with great minds of all ages. Such discrimination leads naturally to the choice of Melachrino, the One Cigarette Sold the World Over.

Remember that Melachrino is a master blend of the finest Turkish Tobaccos as originated by Miltades Melachrino Egyptian cigarettes are simply those that originated in Egypt. But the tobacco is what you want to know about—and if it's Melachrino—it's right
