

BRYAN LECTURES ON THE POLITICAL GAME TOMORROW

(Continued from first page)
pound upon the great accomplishments...

Opposes Delay

Regarding the ratification of the treaties drawn up at the Disarmament Conference he said, "Why should the Democrats object to a treaty that carries out the ideas of a Democratic treaty?"

Speaks on Politics

In speaking of politics, Mr. Bryan has stated that the weakest point in the present Republican administration is its economic policy.

Favors Prohibition

In speaking of the eighteenth amendment, the silver tongued orator recently said, "Prohibition is here to stay. There will be no repeal of the Volstead act and no weakening of it."

Carries His Own Radishes

One of the peculiarities of the Commomner is that he has an extreme fondness for radishes. "I carry them with me," he recently told a reporter.

Assails Darwinism

Last year when Mr. Bryan referred to the Darwinian theory of evolution, he assailed it severely, saying, "Scientists try to tell us that man was not made in the likeness and image of God."

that he "evolved" out of a few germs of life on this planet some millions of years ago. They tell us man's eyes were not created by God, but came out because of the sunlight playing upon the skin.

"When I undertook to disprove the Darwinian theory, I thought someone would be grateful to me. But I find it otherwise. Some people prefer to have a monkey numbered among their ancestors."

Speaks on Eve of Birthday

Mr. Bryan's speech tomorrow night will be delivered on the eve of his sixty-second birthday, which he will celebrate on Thursday.

His title of "Commoner" comes from a political magazine of that name, of which he was for many years the editor. In 1906 he made a trip around the world, and in 1908 he again ran for President, this time losing to William Howard Taft.

From March 4, 1913 to June 9, 1915, he was Secretary of State in the cabinet of Woodrow Wilson. During that time he negotiated thirty treaties with governments representing three-fourths of the world's population.

BOTANY STUDENTS SEEK FIRST SPRING FLOWER

Department Runs Floral Calendar, Keeping Records for Ninth Consecutive Season

The Botany Department will open the annual Floral Calendar soon, and all students, particularly those in the Botany Department, are urged to keep on the watch for the first wild and native flowers that appear in this region.

This spring will mark the ninth season in which the Department has run the calendar, the first one having been started in the spring of 1914.

The places in the exhibit are open to any student in the college who turns in the work. Sketches are being accepted in any medium. Some of the work received by the committee in charge so far both from Penn State students and the students of the other colleges that are entering the exhibit is of high calibre.

The last chance to enter work will be during the early part of next week so that any Penn State student who wishes to enter must do so at once.

Dr. Edwin Sparks, former President of the Pennsylvania State College, will give a lecture tonight at the State College of Washington.

PENN STATE GRAD SECURES POSITION AT OHIO STATE

Mr. Donald Bell '21, has recently obtained the position as assistant in Animal Husbandry and has been given charge of the experimental work with sheep at the Ohio Experiment Station.

BUCKNELL ADDING ATHLETIC IMPROVEMENTS TO CAMPUS
Many improvements in athletic equipment will be made soon at Bucknell, along with the erection of a new stadium and a new Gymnasium.

SCARAB EXHIBIT NEARLY READY TO TOUR COUNTRY

In order to stimulate greater interest in sketching and painting, the local temple of the Scarab Architectural Fraternity has started a circular exhibit of paintings and sketches.

This plan which is being fostered by the Penn State Temple is to collect under the auspices of the Scarab organization, all the paintings and sketches possible and combine them into one large exhibit sending them to all the colleges that have Scarab organizations.

The places in the exhibit are open to any student in the college who turns in the work. Sketches are being accepted in any medium.

Dr. Edwin Sparks, former President of the Pennsylvania State College, will give a lecture tonight at the State College of Washington.

MANDOLIN CLUB PLAYS CLASSICS AT CONCERT

W. J. O'Donnell '23 Stars in Tenor Solo—Auditorium Again Crowded

The Penn State Mandolin Club rendered one of the most unique concerts ever heard in the Auditorium when they appeared as the fifth number on the winter program last Sunday afternoon.

String music, with the blending of mandolins, guitars and banjos, was something new in the line of Sunday afternoon concerts and appealed greatly to the audience.

The club has been working hard since last fall under the direction of the leader, P. P. Shope, '22. The high class entertainment which they provided last Sunday indicated that they have one of the best trained musical organizations in the college.

The following numbers appeared on the program: 1 "Tri-Mountain," March, by Weekman. 2 "La Petite Etangere," Valse Lento, by Metalk.

Mr. Donald Bell '21, has recently obtained the position as assistant in Animal Husbandry and has been given charge of the experimental work with sheep at the Ohio Experiment Station.

COLLEGE MILK PRODUCTION FAR ABOVE PENNA. AVERAGE

If authentic and accurate information on the subject, "Milk That Needs No Washing, and How to Produce It," were desired, the logical man to approach would be Mr. P. D. Jones who has charge of the College dairy herd.

It will be noted from the above report that the flavor and odor of the milk are normal, that it contains no sediment, tests four and one-tenth per cent butterfat, and contains only one thousand bacteria in each cubic centimeter.

Not has quantity been allowed to suffer in the management of milk production in the College herd, for according to the 1920 census, the average production of milk for Pennsylvania dairy cows was 4,344 pounds, while their average yield of butter fat amounted to one hundred and seventy-five pounds.

TECH WILL PLAY ONLY COLLEGIATE OPPONENTS
At a recent meeting of the Athletic Council of Carnegie Tech a new rule regarding athletic sports was passed.

AGS HEAR INSPIRING SPEECHES AT BANQUET

Dean Watts and Secretary Rasmussen Report Bright Outlook for Agriculture

The second Annual Banquet of the students of the School of Agriculture was staged with gratifying success last Thursday evening in MacAllister Hall.

At the close of an appetizing dinner Professor Bressler introduced the Hon. Fred Rasmussen who is now Secretary of Agriculture for Pennsylvania and who formerly served as Head of the Dairy Department of Penn State.

Beginning with an account of the establishment of the first Agricultural educational institution, in New Hampshire, and relating the steady development of the various departments that have sprung from this basic industry, the speaker showed that there are manifold opportunities in the great field of agricultural research, in co-operative association work, in lines of business connected with agricultural interests, and so forth.

Dean R. L. Watts of the School of Agriculture spoke on the subject of the supposed decadence of Agriculture in the United States. To demonstrate his point that Agriculture is by no means on the decline but has on the other

hand, a very bright outlook, the Dean quoted some figures from the 1910 and 1920 census reports, showing the marked increase of farm and rural prosperity in the last decade.

Princeton's varsity baseball team is scheduled to meet the New York Giants at the Polo Grounds on April eleventh. This will be the first time since 1888 for a Princeton team to play the Giants, and is the first time for any Princeton organization to meet a team holding a world's professional championship.

William Stanley and the Alternating Current Transformer
There is nothing that compares with electricity for the economical transmission of power. As a matter of fact, energy in any other form can be economically transmitted only for the shortest distances.
