

MODERN METHODS OF METALLURGY DISCUSSED

Head of Metallurgy Dept. Points Out Improvements Made in Uses Of Metals

Doctor D. F. McFarland, head of the Department of Metallurgy, gave a lecture last Tuesday evening in Old Chapel on the subject, "Everyday Uses of Metallurgy."...

Dr. McFarland began by briefly reviewing the pioneer methods of making iron and steel on account of the use of a cold blast in these methods, many valuable materials and by-products were lost, thus making the iron and steel very expensive.

The ingenuity of American metallurgists has caused many changes in the melting of different ores and, in recent years, the production has greatly increased while the cost of steel production has decreased.

Dr. McFarland also mentioned the importance of steel alloys in everyday life. In the case of steel produced in this way steel allows greatly lessened the problems of the industrial world.

According to Dr. McFarland, the latest thing along the line of iron and steel is the use of the X-Ray in finding the constituents of a piece of steel.

FORMER FORESTRY HEAD PAYS VISIT TO COLLEGE

Doctor Hugh P. Baker and his wife were visitors at the College this last week. Doctor Baker spoke to the Forestry School and to an informal meeting of the faculty at the University Club.

Doctor Baker was head of the Forestry Department here from 1907 to 1917. After leaving here, he was Dean of the School of Forestry at Syracuse University for twelve years.

VASSAR GIRL DECLINES PHI BETA KAPPA KEY

Having her refusal on her opinion that the awarding of high or low grades to students was not right, Miss Caroline Whitney refused the honor proffered her by the Vassar chapter of Phi Beta Kappa.

PENN STATE GRAD EMPLOYED BY BROWNSVILLE DAIRY ASSN.

John L. Clark who graduated at mid-year from the course in Dairy Manufacturing, has accepted a position with the Farmers' Co-Operative Dairy Association, at Brownsville, Pennsylvania.

PRELIMINARY EVENTS FOR NEXT GLEE CLUB CONTEST

New plans, which will go into effect next year, have been established for the future Intercollegiate Glee Club Contests and results preliminary events to be held in Chicago to determine the clubs eligible for the final contests.

With these new plans, clubs from the west as well as those from the east, will be able to compete thus making the contest bigger and better than ever.

In the contest that was held this year, Penn State finished among the first four out of a small number of points being the winner. When the judges made their decision, they awarded Penn State the highest grade for the manner in which they sang the light number, "On the Sea," by Buck.

CO-EDS ARE BEFRIENDED BY COLLEGE NEWSPAPER

The Co-ed's of many universities have rebelled against the censure of their male classmates. Many are the articles which are levied at the present Co-ed, all finding fault in some way.

"Poor modern Co-ed! There is no peace for her. Landslides of criticism fall upon her. The hosts of Phony charge upon her from every side. Unfortunate, misguided co-ed, what has she done? Her critics are innumerable.

The Co-ed is censured for many weighty reasons: 1 She has bobbed her hair. 2 Many have touched cigarettes as often as once in three months.

3 She has ceased to speak only of the weather and mentions things less than that. 4 She condones the hip-pocket flash, and more. 5 She reads "The Shell" and neglects her Grimm's fairy tales.

WIRELESS CONCERTS GIVEN EVERY NIGHT

Students May Hear Speeches, Concerts, etc., in College Station - Must Arrange Date

The wonders of the wireless telephone, America's own gift to the nations, are being demonstrated to students every night between the hours of seven-thirty and ten o'clock at the college wireless station, where high class concert music, records and great speeches from all over the country can be heard entirely free of charge.

By means of the amplifiers brought into play, the effect produced is like a giant phonograph which can reproduce music, speeches and news from all parts of the world. The receiving range of the college apparatus is practically unlimited as it is possible to receive messages from all over the United States and from French, German and Italian stations in foreign countries.

The station is a member of the American Radio Relay League and is a unit of Trunk-Line B which extends from Boston to California. It carries on relay work. On an average of two hundred messages per month both in and out, are handled entirely free of charge under the direction of the Electric Engineering Department.

The station is a member of the American Radio Relay League and is a unit of Trunk-Line B which extends from Boston to California. It carries on relay work. On an average of two hundred messages per month both in and out, are handled entirely free of charge under the direction of the Electric Engineering Department.

Accommodations at the local station are extremely limited on account of the small size of the building in which the apparatus is located and it is impossible, therefore, to accommodate more than ten persons comfortably at one time.

Although the apparatus at the college station is somewhat limited, new devices are being obtained gradually, and there is every indication that it will be increased to a considerable extent in the next few years.

tested by relaying messages from the governors of every state in the Union to the President Harding at Washington, D. C. The college wireless depot was officially appointed together with the stations at Parkersburg and Pittsburgh as one of the three Pennsylvania stations to take an active part in the trial.

INVITATIONS SENT OUT FOR CONSERVATION CONFERENCE

The conservation conference which will be held here on the thirtieth and thirty-first of this month will be a meeting of state-wide importance. Several hundred invitations have been sent out, and many well known speakers have been secured.

RESULTS OF GALLERY COMPETITION GIVEN

The gallery competition held by the military department for ROTC students has been completed. The total score of the winning team was 53.09 that of the second team, 52.62. Each team was composed of fifteen men, and the individual scoring averaged 3.54 for the first team and 3.51 for the second.

On March 15th, several speeches, which, the network of radio stations throughout the United States and Canada was

RADICAL CHANGE MADE IN GRID REGULATIONS

Goal After Touchdown Abolished By Rules Committee—Try From Scrimmage Replaces It

The most radical change in the game of football since the adoption of the forward pass in 1906 occurred last week in New York City when the National Football Rules Committee abolished the goal after a touchdown and replaced it by the try from scrimmage.

The establishment of this change was postponed only after strenuous argument on the part of leading football officials for several years and, as a whole, has been accepted with little comment. The majority of college coaches are hotly in favor of the ruling inasmuch as it does away with the individual effort required to secure the extra point and permits team effort to enter largely into the situation.

ARCHITECTURAL SOCIETY BRINGING EXHIBIT HERE

A remarkable exhibit of more than sixty sketches, chosen from a large exhibit recently held by New York City, will be on display in the Art Museum in the Old Main Building from March twentieth to March twenty-fifth. The exhibit will be held under the auspices of the Senior Architectural Society.

CORNELL CREW CANDIDATES HOLDING OUTDOOR PRACTICE

Five crew combinations, including three Varsity boats and two Freshmen eights, made their appearance on the inlet at Cornell last week for the first time this spring. The Varsity boats performed in regular mid-season style and should soon be in shape for a hard season.
