CONSTITUTIONS!

CONSTITUTIONS!

The work of the committee appointed by the Student Council to bring the Interclass Constitution and the Constitution of the Student Council up to date and to draw up constitutions for the Student Tribunal and Student Board, has been finished and enables these organizations to have a real working basis. The fundamental laws and principles governing these various organizations, as drawn up or revised by the committee, appear in another column of this issue, and a comparison with existing constitutions and practices will show that no radical changes of any great nature have been made.

Already, the constitution as drawn up for the Student Board and Student Tribunal have been adopted by the Student Council Previous to their adoption, these two organizations had no constitutions at all and had to be guided by precedent in whatever action they wished to undertake This often caused delays and hampered the efficiency of the organization

The amendments to the Interclass Constitution and By-Laws and the revision of the Constitution of the Student Council each present one or two changes which are worthy of comment. By far the most important is the one affecting the method of electing class officers Last year, there was considerable dissatisfaction concerning this question and during the past semester, the Student Council spent several months investigating the matter. Their findings are largely embodied in the amendment to section 2 of article 5. Some change in the manner of holding elections was necessary, and the changes suggested—carry with them a minimum amount of red tape and a maximum amount of efficiency. Among other things, the amendment provides for the use of a standard ballot, numbered consecutively, and distributed by members of the supervising committee, thereby eliminating the possibility of repeating. It also provides for the use of the preferential system of balloting, three choices being made by each voter, and thus eliminates the necessity of holding two or three separate votes for the on

bership of Student Council, in case they are defeated for the presidency.

Probably the greatest change that has been made in the Constitution of the Student Council is the increase that has been made in the number of Sophomore representatives According to the new provision the Sophomore Class, which always ranks among the largest in the college will have five representatives in the Council, instead of two. Since the Sophomores represent such a large portion of the student body it is felt that they should have a larger representation. The new provision will bring them into closer contact with the actions of the Student Council.

Since the amendment to the Interclass Constitution and By-Laws and the revised Constitution of the Student Council have already been approved by the Student Council, all that is needed before they become effective is ratification by the three tipper classes. Meetings for this purpose will be called before the Easter vacation.

The 1921-1922 Student Council has been one of the most progressive that Penn State has had, and the completion of this work, whereby all of the student government organizations of the college have been given a definite working basis is another step forward. The revised constitutions will very likely be a memorial, by which the 1921-1922 Student Council will be remembered in the future.

AN APPRECIATION

AN APPRECIATION

The band concert that was given last Sunday and which marked the close of the winter series of Sunday afternoon concerts was a fitting climax to the several entertainments that have been given by the Military Department and the Music Department. The COLLEGIAN expresses the gratitude of the entire student body, when it assures these departments that their efforts have not been ungratefully received. The Military Department especially deserves no little commendation for the part it played in the series since it was responsible for five of the six numbers

THE INTER-SCHOLASTICS

Penn State welcomes the members of the interscholastic basket-ball teams who are visiting the college over the week-end. Following the example of last year, those teams that have been able to survive elimination games for the leadership in this sport in their section of the state are eligible to play for the state; inter-scholastic championship here today and tomorrow. Penn State wishes these teams "good luck" and hopes that the various members of the teams will enjoy their visit here at the college.
