

NINE COUNTY CLUBS PLAN EASTER DANCES

Students and Faculty in All Parts of State Will Hold Social Affairs During Vacation

No less than nine dances, sponsored by the various county clubs of the college, will be staged in various cities in all sections of the state during the coming Easter vacation.

The Lancaster County Club will hold its dance at Copeland's Hall, Lancaster, Penn., on Tuesday, the eighteenth of April.

At Williamsport, on the same night, April eighteenth, the Lycoming County Club of both Penn State and the University of Pennsylvania will stage a joint dance at the Park Hotel.

Another dance, which will be staged on the same night, is that of the York County Club, which will take place at the Coliseum Hall, York, Penna.

The first dance ever attempted by the Huntingdon County Club, has been engaged to furnish the music for the occasion. The committee in charge of arrangements has put several novelty numbers on the program and expects the dance to be one of the most successful ever staged by the Lancaster County Club.

The twentieth century club at Lancaster, Pa., will stage the scene of the Easter dance of the Philadelphia County Club, on Monday evening, April seventeenth. Pat Riley's Orchestra will furnish the music for the event.

The eighth annual dance of the Johnstown County Club will be held at the Penrose Academy of Dancing, on Tuesday, April 18th. The affair promises to be more brilliant than ever of this year, and will be one of the leading social events of the season. The dance will be formal.

The Blair County Club has completed arrangements for the annual Easter dance of the club, to be held at the Penn Alto Hotel, Altoona, Pa., on Tuesday, April eighteenth.

The Fantasy Six of Allentown, Penna., has been selected by the Lehigh and Northampton County Club to furnish the music for the annual Easter dance, which will be held at Hotel Traylor, Allentown, Pa., on Monday, the seventeenth of April.

The Easter dance of the Centre County Club will be held in the Bush Arcade, Bellefonte, Pa., on Wednesday, April nineteenth, 1922. Ernie Well's eight piece orchestra will furnish the music for the occasion. Everyone is invited, dancing will be from nine to one o'clock, while the admission charged will be two dollars.

TWO PENN STATE MEN WILL ATTEND FORESTRY MEETING

Two Penn State undergraduates, H. F. Irwin '22, and W. B. MacMillan '22, enrolled in the Forestry course at this institution, will represent the college at a conference of the Intercollegiate Association of Forestry Clubs, which will be held at Syracuse University from the twentieth to twenty-second of April, inclusive. The conference will bring together delegates from colleges and universities located in all parts of the United States and promises to be one of the largest gatherings of its kind ever staged. Irwin and MacMillan are being sent to the meetings by the Penn State Forestry Society.

PENN STATE GRAD GOES TO UTICA ICE CREAM CO.

C. A. Reed '21, who has been employed in the Dairy Department of the college as Technical Assistant, working in co-operation with the Department of Agricultural Chemistry, on ice cream problems, has accepted a position with the Utica Ice Cream Company, Utica, New York.

The Utica company operates nine large plants, and Reed will be employed in the company's laboratory to work on technical problems that arise in connection with the manufacture of ice cream.

Colgate's New Coach

RICHARD C. HARLOW

Next Saturday, April fifteenth, "Dick" Harlow leaves for Colgate to take up his new duties as head football coach at that institution. Harlow made his debut at Penn State fourteen years ago, when he coached the Freshman and Varsity grid eleven in the position of left tackle. Since his graduation "Dick" has coached Nitany teams in football and boxing.

SCIENTIFIC PROGRAM IS ARRANGED BY A. A. S.

A scientific program will be the feature of a meeting of the State College Branch of the American Association for the Advancement of Science to be held at 7:30 p. m. Wednesday, April twenty-sixth, 1922, in Room 200 Engineering D. At the meeting Professor E. A. Fessenden of the Mechanical Engineering Department will speak on Researches in Heat Transmission and Mr. H. W. Pope of the Botany Department will tell of his studies on the Effect of Ultra Violet Light on Plants. All members of the Association for the Advancement of Science and all prospective members are invited to attend.

N. Y. U. UNDERGRADUATES MUST PAY FOR EXPENSIVE SCRAP

The Fresh-Soph scrap at the University of New York proved to be a rather expensive one. The bill adds up to \$2400. This is the amount the proprietor of Inn where the fight took place demands. The Freshmen were holding a dinner there and the Sophomores endeavored to break it up.

DEAN KNIGHT WILL ATTEND WOMEN'S CLUBS CONFERENCE

Dean Knight will remain in State College during the Easter holiday recess, but will leave for Philadelphia on April nineteenth, where she will represent the Music section of the Woman's Club at a State Conference of Woman's Clubs. Miss Knight will also visit at her home in Columbus, Ohio, before returning to the college.

FOUR TOURS OFFERED STUDENTS THIS SUMMER

Organized for the Purpose of Enabling Students to Travel at Low Expense

A group of four International Students' Tours of foreign countries, membership in which is open to students and instructors in American colleges and universities, has been organized for the summer of 1922 under the auspices of the Institute of International Education. Each of the tours in addition to being under the general sponsorship of the Institute, is also under the special auspices of the appropriate international society in this country, as follows: Students' Tour to Great Britain, The English-Speaking Union; Students' Tour to France, Federation of I-Alliance Francaise; Students' Tour to Italy, The Italy America Society; Students' Tour to the Scandinavian Countries, The American-Scandinavian Foundation.

The International Students' Tours have been established as a non-commercial undertaking for the purpose of enabling American college students to travel in foreign countries at the lowest possible cost, under capable guidance and instruction, under dignified auspices, and under conditions which permit a full realization of the value of such an interchange of visits from the point of view of international relations.

The members of all four of the Students' Tours will sail from New York on July first, 1922, on the Cunarder "Ssonica," a single-class liner of 14,500 tons, which has been especially reserved to handle the movement of the International Students' Tours on both the eastbound and return voyages. Each of the groups will be accompanied by chaperons, proctors, and a trained nurse.

PHI BETA KAPPA HEARS POETRY AND LECTURE

The spring meeting of the Phi Beta Kappa Alumni Association of Penn State was recently held at the University Club. Before an audience of members and invited guests, the poem of the evening was read by its author, Dr. Crockett, and an address on "Student Life in the Middle Ages" was delivered by Dr. D. B. Shumway, Head of the Department of German at the University of Pennsylvania. The meeting was followed by a reception to members and guests. Endeavors are being made to form a Penn State Chapter of Phi Beta Kappa at the present time.

PRESIDENT THOMAS SPENDS WEEK-END IN NEW ENGLAND

President Thomas left State College on last Friday evening for Boston, where he spoke on Saturday night at the Engineer's Club. On Sunday he addressed the students at Wellesley College, Wellesley, Massachusetts. After spending several days in Vermont, he will return to Penn State tomorrow at Thursday.

PENN STATE Y*P INSTRUCTING FOREIGNERS AT BELLEFONTE

The Penn State Y M C A, in its efforts to be of service to many people, has recently started an experiment in Bellefonte, Pennsylvania, where classes have been established for the purpose of teaching the English language to foreigners and giving instructions in blue-print reading. Two Juniors, enrolled in the Pennsylvania State College are in charge of the work. These are R. E. Good, who is conducting classes in blue-print reading, and C. McConnell, who is teaching the English language to foreigners. The work of these men is being highly praised by citizens of the county seat and the success which they have attained with the experiment has caused the Y M C A to establish the classes permanently.

DOGS WILL BE BARRED FROM LAFAYETTE COLLEGE CLASSES

The students of Lafayette College were requested by Dean Albert K. Heckel to discontinue bringing dogs to classes and to exercise on campus. Dogs have always been permitted in class rooms but their presence has caused much annoyance.

COLLEGIAN NOTICE!

The next issue of The Penn State Collegian will appear on Tuesday, April twenty-fifth. The time of the Easter recess prohibits the publication of those three issues that would ordinarily follow this issue.

CLASSES GRADUATED IN ENGINEERING EXTENSION

Prof. N. C. Miller, head of the Department of Engineering Extension, visited Wilkes-Barre last week to attend the graduating exercises of the class in Engineering Extension at the school conducted by the Pennsylvania State College at Wilkes-Barre. This is one of the two extension classes which the college actually conducts, the local affairs being administered by a committee of citizens. Prof. P. A. Daniels is at Ridgway issuing certificates in Electricity, Shop Mathematics, and Drawing to the extension class graduated by the Y M C A. school there. Following the exercises at Ridgway, Professor Daniels will go to Pittsburgh in the interest of the Engineering Extension convention.

A program is in process of completion for an Engineering extension convention to be held here May next, tenth to nineteenth. Several of the sessions will be held jointly with the industrial conference which is being arranged by Dean Sackett for the same week.

Copies of Engineering Extension News have been placed in the hands of the members of the graduating classes of the high schools throughout the state in the interest of extension courses for those who cannot attend college. The paper contains a report on college credit by correspondence and a catalogue of the courses which may be obtained in this manner.

Text Prepared For Foremen

A series of unit texts have been compiled by the department during the past year for foreman training. The work comprises six units, the last of which has been recently completed. This text supplies a basis for men in the industries to train themselves to fill the demand for foremen.

TWO DEANS WILL ATTEND ENGINEERING CONFERENCE

As representatives of the Pennsylvania State College, Dean Sackett and Dean Stoddard will attend the second national convention on Commercial Engineering to be held on May first and second at the Carnegie Institute of Technology. This conference has been called by the United States Commissioner of Education and is intended to investigate business training for engineers and engineering training for students of business.

About two hundred colleges have been invited by Dr. Thomas S. Baker, Acting President of Carnegie Tech, to appoint delegates to this conference. Invitations to appoint delegates have also been sent out from Washington to engineering professional societies and to more than fourteen hundred chambers of commerce and trade organizations.

ASSOCIATION FORMED TO INCREASE BUILDING

Mt. Nitany Building and Loan Association Will Aid Fraternities

The Mt. Nitany Building and Loan Association, an organization which is being formed by prominent business men of State College for the purpose of increasing building and adding business, is at present applying for a charter. The building and loan association will be located at State College and will have a capitalization of half a million dollars with shares at the par value of two hundred dollars each.

The main purpose of the association is to aid people in securing homes, but a second purpose is also to serve as a means of saving money. If a man of fraternity wishes to invest in a share of stock of two hundred dollars, he merely pays into the association each month the sum of one dollar, until when the stock matures, he is paid back the par value of the stock. This plan offers an excellent opportunity for fraternities to place their savings and accumulate a building fund for the future.

Loans will be made at an interest rate of 8 per cent, and only share holders may borrow, limited to an amount up to the par value of the shares owned by the borrower, providing further that proper real estate security may be given the association in the form of a first mortgage. A borrower pays the same amount as a lender for his share of stock, but in addition he pays monthly interest on the money borrowed, which amounts to one dollar on every \$200.00 borrowed in this way. A lender pays one dollar a month per share, while a borrower pays two dollars a month per share.

Since the association loans only on first mortgages real estate security, it is the safest kind of an investment. Mr. Seymour Dexter in an address quoted in the Bureau of Labor Bulletin 12, pages 1499-1500, says concerning the safety of such an association.

"The true building and loan association (by which he means a local association such as this one) is a comparatively small affair, its operations are confined to the place where located, or the immediate vicinity; its shareholders can know what the association is doing from month to month, and upon what securities his money is being invested. The shareholders can attend the annual meetings, and vote in person for the officers of their choice. There are no official places with salaries of sufficient amount to entice the scheming and crafty, and no paid solicitors for business to mislead the ignorant and unwary."

CHAMBER OF COMMERCE WILL BOOST COLLEGE

(Continued from first page)

The college and turned the affairs over to Mr. Hrbshman.

President Thomas opened his talk with an entertaining outline of the duties of the modern college president and then spoke of the college and its relation to the people of the state. He emphasized the fact that the college is dependent upon the good will and generosity of the people. He said:

"If an educational expert were to visit Penn State and make a survey, he would tell us to cut down on our activities—cut the garment to the clothing and probably tell us to go back to teaching agriculture alone. But the law will not allow this—he would overlook the fact that we must teach the mechanics. The trustees will not throw away a thing. They will fight until we get the support necessary for adequate growth for the whole thing. That is why I made the suggestion that we change to the State University."

"If we have recognition is the Pennsylvania State University, we will have recognition throughout the matter has simmered down in the legislature. It we have had general support for agriculture, and the other schools get what they can. It will always be so until we are recognized officially as the State University. To illustrate that the proposition is sensible and has received general approval throughout the state, let me tell you of an experience I had while on a train recently when we were held up by a wreck."

"The big job at Penn State is to 'put across' to the people of Pennsylvania the great service which the college is now rendering and the far greater service which we might render with adequate state recognition. We are the only college in the State supplying trained leaders in agriculture, the importance of which is fundamental to the cities and industries."

"Many people seem to think that Penn State is a farm school only. To be sure, we have one of the best and largest schools of agriculture in the nation. We are proud of it and we pro-

pose to keep it up and to make it still larger and better. But only one student in four at Penn State studies agriculture. Counting the summer session only one-sixth of our students are enrolled in agriculture.

"Many people in Pennsylvania have no idea of our magnificent school of Engineering, far and away the largest in the State. We have three departments in that school, electrical, mechanical and civil, which are each larger than many colleges. Many do not know of our school of natural science, nor that our department of chemistry ranks as one of the best in the nation. The extension courses for teachers in services, which were started in Pittsburgh by Dean Chambers only last summer, already make up the largest extension service ever organized in Pennsylvania."

"It is for this reason that we wish to change our name to Pennsylvania State University. As a matter of fact, institutions in the United States doing the work which Penn State is actually doing today are called Universities."

"It is a good idea to call things by their right names, and Penn State is actually doing in institution of university scope and service. We propose nothing radical, nothing hostile to any other institution, but only that which is proper and necessary if Penn State is to fulfill its duty as a State institution of aid for the people."

"Every State west of Pennsylvania and every State south of us has a State University. That there is a demand for such an institution in Pennsylvania is proved by the unparalleled growth of Penn State in the thousands to whom we are compelled to refuse admission for lack of accommodations. Will Pennsylvania meet the demand? Shall not the great proud Keystone State give to its youth such a good a chance to attain the power which knowledge gives, as is offered today to the youth of Ohio and Michigan? I cannot believe that the answer will be in the negative if we can fairly get the issue before the people."

"If we can go to Harrisburg with the impetus of success in this campaign the effect will be wonderful. We must have a sentiment that will be irresistible. The will of the masses does not register in figures."

The Best Business Career

Is what every ambitious senior is thinking about at the present time. Life insurance is one of the best, one of the most desirable, and one of the most satisfactory as a permanent calling.

In assets and volume of business, life insurance is one of the three leading businesses of this country, yet the field is comparatively under-developed. Only 7 per cent of the economic value of human life in the United States is covered by insurance. This gives an idea of the big field still to be worked, especially business insurance for firms and corporations.

As to remuneration: Reports of college graduates who have entered business indicate that life insurance is at the very top as a source of income. Now is the time for you to consider what you are going to do after graduation. If you are ambitious and willing to work hard and are interested to know about life insurance, address
