

**PENN STATE CLUB WILL HOLD POST-PROM DANCE**

**"Seven Virginians" Will Perform at Friday Evening's Social Event**

Owing to the fact that a large number of out-of-town guests will be in town on the week-end of the Junior Prom, the Penn State Club is rapidly completing its arrangements for a dance to be held in the Armory on the Saturday night following the annual affair of the Junior class. The dance is being held primarily for those upper-classmen who will have girls from out of town for the Prom, and who are other non-fraternity men or men whose fraternities are not holding dances that night. For such men, this dance will afford an opportunity to complete a pleasant week-end. Arrangements will probably be made also whereby Freshmen will be permitted to attend the dance.

The committee in charge, R. E. Cornish, J. A. Umboltz, and W. J. O'Donnell, has been working with Dean D. Wenger, social chairman of the Club, and plans to have the affair complete in every detail. The "Seven Virginians," who play for the Prom have been secured to furnish the music, and the lighting and decorating effects used for the Prom will be retained in an effort to make this the most successful dance of the Club this year. Tickets may be secured from any of the officers of the Club.

**Father's Day Smoker**

The Penn State Club is also formulating plans for a smoker to be held on the occasion of Father's Day. A novel and interesting program will be worked out for the entertainment of those fathers who will visit the College at that date.

**May Day Dance**

The Club has also secured Wright's colored orchestra of Columbus for the May Day Dance to be held in the Armory on May 13. This will be the first Penn State Club dance ever to be held on May Day, and it is hoped to make this date the occasion of an annual affair.

**EXPERT WILL TALK ON REFRIGERATION TONIGHT**

All who are interested in the refrigeration industry, and its application to cold storage and ice making, will have an opportunity tonight to hear Mr. Thomas Shipley, who has been associated for twenty years as Vice-President and General Manager of the York Manufacturing Company, which is devoted exclusively to the manufacture of refrigerating machinery and which is the largest plant of its kind in the world.

Many of the recent advances in refrigerating machinery have been made under the direction of Mr. Shipley. He is a man of strong personality, and is clear and forcible speaker. His talk will emphasize the value of a technical education in meeting the problems arising in the refrigerating industries.

He is much interested in the growth of State College as many of our engineering graduates have been, or now are, in the employ of the York Manufacturing Company.

This address will be given before the Student Branch A. S. M. E. in Room 200, Engineering "D" tonight at 7:30 p. m.

**RADIO NEWS ON GARDENS FURNISHED BY AG. DEPT.**

The Westinghouse Electric Company of Pittsburgh has recently requested the Department of Agricultural Extension of Penn State to send them gardening information which they will broadcast by means of the radio-phones.

Professor W. B. Nisley of the Vegetable Gardening Extension section sends the company weekly articles dealing with the various stages in vegetable gardening. The purpose of the articles is to instruct amateur gardeners in the steps of vegetable growing, as the season progresses, and they may thus secure up-to-date information on the subject, by means of the radiophone.

**Spring Tonic**

Tone up your system with a good Spring Tonic.

Gilliland's Hypophosphites

Gilliland's Beef, Wine and Iron

They build up and put the "Pep" in your system.

RAY D. GILLILAND, Druggist.

**CRABAPPLE CLUB PLANS PICNIC THIS WEEK-END**

The members of the Crabapple Club will hold their annual Apple Blossom Picnic in the experiment orchard the latter part of this week, when the trees will be in full bloom. All who are interested in Horticulture are invited to attend the gathering.

J. D. Bash, president of the club, has arranged for several speakers, among whom are "Prexy" Thomas, D. Fletcher, Dean Watts and Mr. Tyson of the Board of Trustees. Besides the baseball game and other athletic events planned for the occasion, sandwiches and toast winners will be provided on the "Dutch Treat" system. The exact date for the picnic will be announced soon.

Last year's Apple Blossom Picnic was held in the old orchard and was a decided success. The same speakers were present, and a large number of "Horts" joined in the festivities. It is hoped that this spring's affair will meet with the same good fortune.

**TWO NEW PROFESSORS IN AG EXTENSION DEPARTMENT**

Two new members have been added to the staff of the Agricultural Extension Department. Dr. D. L. VanDine, a Cornell graduate who has been with the United States Department of Agriculture for twenty years, and is now at the Government Laboratory in Louisiana, will come to Penn State as Assistant Professor of Entomology Extension. H. R. Eby, who graduated in 1920 from the course in Dairy Husbandry, has been appointed Assistant County Agent of Allegheny County. Eby has been with the Nestle Food Company, in Dairy Manufacturing work.

**HORTS PURCHASE FORDSON TRACTOR FOR ORCHARD WORK**

The Department of Horticulture has purchased a Fordson tractor with plow and disc harrow, which outfit will be used primarily in cultivating the Department's orchards.

Each Horticultural student who remains at the college for summer practice this year will be given extended practice in the use of the tractor under commercial conditions.

**Nittany Two-Miler**

CHARLES J. COOPER

While on the recent Southern trip, Cooper won the two mile run at both Washington, D. C., and Blacksburg, Va., where the track teams of Georgetown University and the Virginia Polytechnic Institute were met. Cooper's time in the Georgetown meet was 9 minutes and 51 seconds. He also took fourth place in the Indoor Intercollegiate which were held in New York City last month. He is a Senior and was Captain of the 1921 Cross Country team.

**PHOTOGRAPH EXHIBITION OPENS IN HORT GALLERY**

The gallery of the Division of Photography on the fourth floor of the Horticultural Building opened Monday, April twenty-fourth, with a one man exhibit by Nicholas Murray. There are twenty-five pictures in the exhibition containing some of the best work of this New York artist. The pictures are all portraits or figure studies and include several noted dancers, stars in the "movies" authors, and artists. The gallery is open on school days from 9:00 a. m. till 4:00 p. m. and on Saturday from 9:00 a. m. till 12:00 p. m., but it will not be open on Sunday. The exhibition remains here until May first.

This is the first of a series of one man exhibits which the Division of Photography intends to hang in its gallery in the Horticultural Building. The second exhibit will consist of the work of Floyd Wall, F. R. P. S. and will be on view from May first to this date.

**UNDERCLASS GIRLS HAVE BUSY SOCIAL WEEK-END**

The past week-end was a busy one in the social calendar of the underclass girls when they held their first class dances of the year in the Woman's Building parlors. On Friday evening, April twenty-first, the Sophomore girls entertained. The rooms were artistically decorated with spring flowers and Griffith's orchestra played. A new feature in the usual procedure of a dance was the presentation of a one act play entitled "The Perfect Woman," written by Mr. Gordon Amend and acted by several of the Penn State Players. Mrs. R. L. Sackett was the choristess.

The Freshmen held a tea dance on Saturday afternoon, April twenty-second. This affair was a coming-out party for the 1922 class and was a great success. Miss Ruth Stanwood, director of Physical Education, choristess and Griffith's orchestra furnished the music for the occasion.

**AUSTIN SCHOLARSHIP IS AWARDED TO PENN STATE MAN**

Carl E. Maquardt, Associate Professor of French, has been assigned an Austin Scholarship in the Graduate School of Education at Harvard University. The Austin Scholarships were established in 1893 for the benefit of teachers in colleges or secondary schools, or for superintendents of schools, and are awarded on the basis of distinguished academic work.

**RAILROAD SUPERINTENDENT FROM WEST VISITS COLLEGE**

Mr. F. W. Thomas, of Topeka, Kansas, Superintendent of Apprentices for the Atkinson, Topeka and Santa Fe Railroad, visited the College last Thursday to interview Railway Mechanical

Engineering students who may enter the employ of this railroad. He talked to members of the Motor Power Club in the afternoon.

**TOPIANS TO GIVE DANCE FOR FORESTERS AND ARCHITECTS**

The Topians, the society of Landscape Architects, will give a dance for all students in the Forestry and Architecture courses in the Armory Friday evening, May fifth. The dance is a subscription affair, the assessment being set for a dollar and fifty cents. Special efforts are being made to include several unique numbers in the way of novelty dances in the program. The decorations and lighting effects will suggest landscape scenes. A six piece orchestra has been secured for the occasion.

**FOR ONE CENT**  
We have obtained a large quantity of **KLENZO TOOTH PASTE** that we offer to you on **APRIL 27th and 28th**  
Makes Your Breakfast Taste Better  
**PRICE One Tube 25c Two Tubes 26c**

Your breakfast tastes better after you use Klenzo. Get a tube to try today. There is a new sensation awaiting you—the Cool, Clean Klenzo. Feeling on your teeth and tongue it isn't merely a taste. It's a freshness of cleanliness that is imparted to the tiny, little taste nerves, freshening them of stale secretions that make your mouth feel hot and sticky.

These goods have been purchased especially for this offer and we offer at this price to introduce this wonderful paste and a little bonus to its old friends.

**You appreciate the wisdom of maintaining an open mind.**

Life Insurance has been kind to those men and women, who refuse to bury their heads in the sand the minute the subject was mentioned.

This country is honeycombed with keen men of large vision, and monstrous ambition who are riding the waves of success, because they investigated for themselves the possibilities of Life Insurance selling, and acted upon the result of these investigations.

The Edward A. Woods Company of Pittsburgh, Pa., the largest Life Insurance Agency in the world, seeks opportunity to lay before the judgment of college men and women, the present and potential opportunities of Life Insurance Salesmanship as a career.

**THE STATUE OF LIBERTY**  
Most of the famous structures of the world are equipped with Otis Elevators.

**WHAT structure is better known or is more typical of America than this Statue at the gate of New York.**

Countless thousands from the old world pass under the uplifted arm that holds a light which means to them worlds more than to us, though our millions know it and love it for the symbol it is.

It is fitting that an Otis Elevator should carry passengers up through the base to the foot of the Statue. For though the activities of Otis are world-wide, the beginnings, the creation, the basic ideas and the great developments of vertical transportation were made by Otis in America.

**Harry Phillips Davis**

Those who have given their lives and their hearts to the service of the electrical art have early learned that success with larger things is assembled out of devoted care to the lesser details. Indeed, they will go further, and demonstrate that the little achievements of today are the fundamentals that become the big things of tomorrow. Just as Willie Hoppe, the great billiardist, will tell you that there is no such thing as an easy shot in billiards, so electrical specialists have found that frequently the seemingly big conceptions have depended on the perfection of details that those unfamiliar with electrical history would often mistakenly regard as unimportant.

Thus the growth of Westinghouse, and of the great industry of which it is a part, has been compounded of many ingredients; of vision that saw present needs and future requirements, of engineering genius that could bring forth practicable designs to fill them, of courage that never failed to try once more, of enthusiasm, and integrity, and faithfulness to the little and the little-known jobs as well as to those that were bigger and more pretentious. Westinghouse has always had a need, and a welcome, for men who could supply such qualities.

It is the daily expression of qualities like these that earns a man the regard, as well as the respect, of those who work with him.

Perhaps the foregoing may suggest some of the causes that lie behind the success, and this appreciation, of Harry Phillips Davis, Vice President in executive charge of all Westinghouse production and engineering activities. During the thirty-odd years of his service he has contributed consistently to electrical progress, not only by his work on arc lights and meters and transmission apparatus, but by his effective and loyal attention to the detailed requirements of the many activities with which he has been associated.

Mr. Davis has a reputation for getting things done, regardless of difficulties. His constructive abilities have carried him far, his contributions to the electrical art have greatly aided in the maintenance of the engineering supremacy which is the Westinghouse ideal, and he is recognized, with particular emphasis, as one of those to whom is due the development of methods for the quantity production of first-grade electrical apparatus.
