

Silver Bay Pleased These Nittany Students

PENN STATE GROUP AT SILVER BAY, JUNE 1921

Twenty-three men from Penn State favorably reported the annual student Y M C A Conference at Silver Bay, N. Y., last summer and the local "Y" is now driving for a delegation of forty from State College for the nine-day conference from June fifteenth to June twenty-third this year.

Fourteen men have already signified their intention of going this year. They are H. E. Park '23, C. B. Dickerson '23, E. R. Tomb '23, J. W. Alken '23, J. S. Adams '23, J. S. Wiant '24, W. R. Auman '23, L. Roy Wyckoff, Special, N. S. Hilbman '24, C. T. Douds '22, Secretary F. I. Olmstead, Dr. I. L. Foster, Harry Kimmel and James Lunk.

MANY ATTRACTIONS AT SILVER BAY THIS YEAR

Under the direction of H. E. Park, '23, plans for Penn State's part in the Silver Bay Student Conference to be held June fifteen to twenty-three at Silver Bay, Lake George, N. Y., are rapidly being brought to a completion. A number of men have already signified their intention of attending the Conference, and a still greater number will also probably fall in line soon, in order that Penn State may be adequately represented.

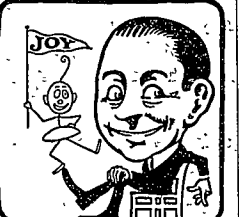

The Conference is held under the direction of the Student Department of the International Committee of Y. M. C. A. Associations, with the cooperation of the State committees in the territory it covers, and is for students from the normal schools, colleges, universities, and professional schools of the New England and Middle Atlantic States. The moral and spiritual problems that confront the college man on the campus, in the community, and throughout the world will be faced fearlessly and squarely, and solutions to these problems will be discussed. The large number of delegates from foreign countries will give the Conference added impetus and students will learn to know their fellows of other races and nations, and their partial and prejudiced views of life will give place to the acceptance of a common task of making the world better.

Silver Bay, the site chosen for the Conference is an ideal one for places in America as so well-equipped for recreation and out-door sports. A number of leaders and speakers have been secured and include some of the foremost men in the country. The expenses, though not great, include a program fee of five dollars and a board and lodging fee of twenty dollars, and must be met by the individual. The mode of transportation will be varied, some going by train or automobile while a considerable number will make the trip by hiking. It is the desire of the Penn State Y. M. C. A. to have as many students at the Conference as possible, and all prospective delegates should get in touch with the "Y" in order that reservations may be made for them.

HURRAH!

For the first time in seven years—or seventeen—I've got relief from my pesky corns. I feel like a colt turned out of pasture. Why I'm a new man—feel as if I could lick my weight in wild cats—

Good Bye Corns

If you want to feel like I do—do what I did and get rid of your corns. Just drop into our Drug Store and ask the clerk for a bottle of our own corn remover. It certainly does the work, and only costs a quarter.

FORESTERS PREPARE FOR SUMMER PRACTICUM

Forestry Students Will Leave on Annual Camping Trip in the Middle of June

With the approach of the summer vacation the Freshman and Sophomore Foresters are focusing their interest on plans for spending the summer months in camp. Already several men in the course have been assigned to stations for placement training while two others are receiving valuable experience in the production and milling phase of the industry.

The Freshmen will camp at the junction of Detweiler runs and Stone at the foot of Fifth Mountain in the Seven Mountains. The Sophomore Summer camp will be at Kinzoo, Pa., on the holdings of the Pennsylvania Lumber Co. The Sophomores will study logging and milling operations at the company's new mill at that place.

The Forestry Department has received a large number of black walnut trees to be planted on the state forests by hunters and fishermen. The clearing of immense tracts of bottomlands, the natural habitat of that species, has brought about the near elimination of black walnuts from the woodlands of the state and a subsequent shortage of squirrels, which are dependent upon that source of food.

NITTANY BATSMEN LOSE TO BUCKNELL

(Continued from first page) situation by placing a hit along the third-base chalk line and reaching second before the ball could be recovered. The runner was then admitted by Lightner's single for the first tally of the game. Koehler registered the second

of the inning by a weak grounder that forced Lightner out on the second bag. The inning ended with the score 1 to 0 when Beden's fly to right field was nabbed.

The next three innings were uneventful with neither side able to register hits. Sparks reached first in the sixth frame on an error at short stop and was enabled to take another bag when Caskill's wild peg to the Lewistown first-baseman was missed. The Nittany chances of scoring, however, were spoiled when Palm was thrown out on first after grounding to shortstop.

Bucknell Gets Two Run Lead

The seventh frame proved to be a lucky one for Coach Cook's nine when two errors at shortstop notted the visitors as many runs. Julian opened the massacre with a clean hit over Traphoner's head. Kopp followed his example with a single, advancing the Bucknell catcher to second. Calhoun filled the bases when he was hit by one of Mally's deliveries. With two strikes and three balls called, DeCoursey, the next in line, rounded a grounder to Koehler on shot. Koehler muffed the drive and permitted Julian and Kopp to score on the error, while Calhoun got to the third bag. At this point, Mellinger was retired in favor of Miller. Gaskill connected with one of Miller's twirlers for a clean sacrifice peg to Hare but the ball was knocked out of the Nittany receiver's hands when the runner bumped into him in crossing the plate. Hare was hurt in his fall and Ludwick was sent in for the remainder of the battle. The inning ended for the Bucknellians when Linker was struck out.

Ullery, Retaliates With Homer Captain Ullery did his best in the home nine's half of the inning by wall-popping the horsehide to the farthest corner of the football bleachers for a circuit. But the Blue and White team was unable to pull itself together and failed to hit. Tarr in the pinches.

Bucknell chalked up its fourth tally in the first of the ninth when DeCoursey reached first on an error by Koehler and was admitted to the plate later in the inning on another error. The Lions fell consecutively before the almost perfect control of the Bucknell twirler and the inning ended with the score standing 4 to 2.

DEAN MOORE PUBLISHES TEXT BOOK ON COAL

The following article appeared in "The Coal Review," the organ of the National Coal Association, Washington, D. C., April fifth, 1922.

"The newest discoveries in the studies of coal and the latest advances in the various phases of the industry are taken into full account in a new standard work entitled 'Coal, Its Properties, Analysis, Classification, Geology, Extraction, Uses and Distribution,' written by Elwood S. Moore, Dean of the School of Mines of the Pennsylvania State College, and published by John Wiley & Sons, New York.

"The author's aim has been to write an up-to-date text that would satisfy the demand for a handy volume on coal, and he has confined his material to 450 pages, illustrated by one and forty photographs and drawings, and twenty plates, and enhanced by frequent references to other authorities and sources of data on the subject.

"While the volume, on account of its thorough scientific treatment, will make a strong appeal as a book of ready reference to the man who is concerned with the technique of the industry, it is written in such a readable and comprehensive form as to bring it within easy range of the general reader who desires to be informed at large upon coal."

Mining Experiment Station Publishes First Bulletin

The first of the series of monthly bulletins published by the Experiment Station of the School of Mines was issued recently by that school. The bulletin is made up chiefly of "An Investigation of the Properties of Smelting Coals."

The problem of determining what the properties of a smelting coal should be was suggested by a number of coal operators in Pennsylvania who are mining this type of coal and the problem was turned over to Mr. H. J. Sloman to undertake the experimental work on the subject. The results of Mr. Sloman's work is given in the bulletin in a full and exhaustive manner. Previous to the publication of this work, very definitely known about smelting coals.

DAIRY HERD PRODUCES MILK OF HIGH QUALITY

Low Bacterial Count, High Fat Percentage, Cleanliness, and Low Cost Commended

The Pennsylvania State College dairy herd maintains its position in the forefront for clean milk of high quality. The March report of the examination of the College herd milk has just been received from the Altoona Department of Health, as follows: color, yellowish white, odor, normal, taste, normal, sediment, none, specific gravity, 1.033, butterfat, 4.2%, solids not fat, 9.09%, total solids, 13.29%, bacteria, 400 per cubic centimeter.

The excellence of the College milk may be noted from the fact that its odor and taste are normal, that it contains no dirt, that the butterfat content is four and two-tenths per cent, and that it contains but four hundred bacteria in each cubic centimeter.

The legal standard for grade "A" milk which is the highest quality of ordinary market milk requires that the bacterial count be under one hundred thousand per cubic centimeter, as compared with only four hundred in the College milk. Grade "B" milk must not contain over one million bacteria in each cubic centimeter, while grade "C" milk contains over one billion bacteria per cubic centimeter. The greatest precautions must be observed in adhering to the laws of sanitation if milk such as the College Dairy produces is to be turned out regularly.

Not only is the milk produced by Penn State's dairy herd of high quality but its price is also lower than the average, in fact, so far as known, no certified milk in the United States is sold for a lower price than that set by the Penn State Dairy Department. The price of certified milk at Philadelphia and New York is twenty-eight cents a quart, in Buffalo, Cleveland and Washington, thirty cents. The price in State College, however, is but eighteen cents a quart.

SENIOR DANCE WILL BE GIVEN THIS MONTH

In line with the rest of the social events, the Seniors will hold their dance on Friday evening, May twelfth, in the Armory. Dancing will continue from nine to one o'clock. The affair will be formal.

The fourth year men have secured Wright's Saxophone Orchestra from Columbus, Ohio, to furnish the music for this orchestra will prove a novelty, as no combination of this kind has appeared at Penn State before.

The committee composed of G. H. Lytle, '22, chairman, J. O. Chambers, '22, N. H. Lane, '22, H. H. Hubbard, '22, J. Hughes, '22, J. B. Sayer and H. J. Schlosser, '22, has been working hard on the program and have the details practically completed.

The committee has decided upon using the same style of decorations that were used at the Sophomore Hon. That is, there will be various streamers of all colors intermingled with Japanese lanterns to secure a unique lighting effect.

THEY MAY TAKE IN THE BOARDWALKS NEXT TIME

These Mountaineers they have no fears—so reads the old nursery rhyme, they don't take my chance. Which is clearly evinced by the report from the summer camp of the Senior Foresters near Blue Ridge, Virginia. When the local delegation arrived in camp here, the back woodmen looked them over and decided they were genuine agents. Accordingly three skills in the neighborhood of the camp were removed immediately. The natives may have been wrong in their surmise as to the identity of the Foresters but they must certainly be commended on their good judgment.

FRESHMEN NOMINATE OFFICERS AT MEETING

At a meeting of the Freshman class on Thursday evening, April twenty-seventh nominations for class officers for the coming year were considered. In outlining the nominations President Delaney explained the action taken by the Student Council requiring the election of a committee of seven men to handle the election of seven men to the appointment of five tellers by the president. The committee elected to handle the election consists of W. C. Calhoun, chairman, D. Keller, T. W. Ayres, A. D. Wade, E. C. Ramsey, F. L. Loran, and B. Ayers. The election of officers will take place at the next meeting. At its eleventh numbered ballots will be passed out to each individual at the door.

In speaking in behalf of the coming March Day celebration, May 20, J. S. Adams, '22, stated that its object was primarily to give the fathers an insight into the daily program of work and pleasure of college life. He urged the freshmen to make up for the deficiency in the number of visiting fathers which would result from the proximity of Father's Day and Commencement.

Candidates for the Freshman Tennis team were urged to play off the first round of the tournament before Saturday to avoid delay in picking a team to play in the meets which have been scheduled. Matches have been arranged with Dickinson Seminary at Williamsport, Alton High School at Altoona, and Bellefonte Academy at Bellefonte.

UNIV. OF CALIFORNIA HAS "TEMPLE OF BASKETBALL" The University of California has started work on a \$20,000 "Temple of Basketball" at its new campus. The project has been planned for a long time and was started after the prompt acquiescence of the Board of Trustees.
