

COLLEGE AUTHORITIES PASS ON NEW RULINGS

Council of Administration Adopts New Mode of Procedure in Regard to Separation

The Council of Administration has recently formulated and adopted a uniform mode of procedure in dealing with the separation of students from college in any reason whatsoever.

The Council has authority to deal with matters of discipline and to give or withhold final approval of the recommendation of a school for the dropping of a student for unsatisfactory scholarship.

Letter of suspension or dismissal shall be sent out to students and parents by the Secretary of the Council, signed as such The Registrar of the College shall make a record of the action on the student's academic record card.

The following shall be the ordinary forms of suspension or dismissal: 1. Registration cancelled—This action shall be taken upon the discovery of facts which, if known previous to the student's registration, would have prevented such registration.

2. Dropped for poor scholarship—This action shall be recommended to the Council by the school faculties. It shall be understood that a student thus dropped may expect to be reinstated unless the action specifies permanent dropping.

3. Dismissal—This action shall be taken in cases involving moral delinquency of such a nature as to make the student forever undesired in the College.

4. Suspension—This action shall be taken in cases of moral delinquency or serious violation of the College regulations in which a limited penalty seems just.

5. Request to withdraw—This action may be taken upon the recommendation of a College Administrative officer in cases where official suspension or dismissal seems impracticable or undesirable for special reasons.

Which will next year's captain wear? IT DOESN'T need much wisdom to predict that next year's nine will be captained by a '23 man or maybe a '24 man. This is no affront to underclassmen. Years of steady plugging must go before you can handle the man-sized responsibility of running a team. That this is just, seniors will be the first to assert. They have seen how well it works for team and college. Then let the seniors keep this point of view, for soon they will find how closely the principle applies to themselves in the business world. Captains of industry are not made overnight. Don't expect to step into a managership right away. Before you can lead, you've got to serve in the ranks awhile. This is best for your organization and best for you. The time and energy you put in working up from the bottom, taking the bitter with the sweet, getting the uphand over your job, will stand you in good stead when you have won through to executive position. When you have learned how to handle detail work, you can begin intelligently to direct other men to do it, and thus free yourself for creative planning. You who intend to be captains, have patience. Your year will come and so will your chance. Western Electric Company. Since 1869 makers and distributors of electrical equipment.
