

MANY CHANGES MADE IN PERSONNEL OF FACULTY

Large Number of Instructors Resign from Faculty—New Appointments Announced

The opening of the new college year will witness many important changes in the staff of instructors and professors of the various schools and departments of the college. Resignations prompted by retirement or acceptance of positions at other colleges will call away many, some of whom had been regarded as permanent fixtures in classroom and campus activities. Gertrude M. Adams, Instructor in English... H. K. Anderson, Instructor in Agricultural Education... J. N. Bastrass, Instructor in Civil Engineering... F. C. Bechtel, Instructor in Chemistry... Adelle J. Bliss, Instructor in Home Economics Extension... Elizabeth Champion, Instructor in Engineering Extension... Rachel Davis, Assistant in Home Economics Extension... W. H. Davis, Assistant in Dairy Husbandry Extension... Arthur Deering, Instructor in English and Public Speaking... A. W. Demmler, Instructor in Electrochemical Engineering... Mary E. Duthio, Assistant in Home Economics Extension... E. A. Ecker, Assistant Professor of English... W. E. Edington, Assistant Professor of Mathematics... E. A. R. O. T. C. UNIT ENJOYS GOOD YEAR AT CAMP

If success can be determined by the number of medals won, Penn State was extremely successful at Edgewood Arsenal Camp this summer. The rifle team took first place in the Intercollegiate match which was held at the conclusion of the regular target practice. The team was presented, with medals by the National Rifle Association and also with a large loving cup, by the Third Corps Area. R. C. Bender '23 won the cup given for the highest aggregate score in the Intercollegiate Team Match, his score being one hundred eighty-seven out of a possible two hundred. Both cups are now on display in Gingham and Sons' window. Practically every man who attended the camp from Penn State qualified with rifle or pistol and in many cases both. The R. O. T. C. has come to occupy an important place in colleges all over the country and although the work at Penn State is improving, it should be still better. It is Major Wolty's aim to be upon the distinguished list this year. Camp was not all work for there was swimming and various other athletic events, weekly dances and other amusements.

J. ORVIS KELLER NEW I. E. DEPARTMENT HEAD

Penn State Man Who Succeeds E. J. Kunze Has Good Record—Was Assoc. Professor Here Professor J. Orvis Keller, Associate Professor of Industrial Engineering, has been placed at the head of the Department of Industrial Engineering by the Board of Trustees, to take the place of Professor E. J. Kunze who resigned and who has not yet announced his plans. Professor Keller graduated from Penn State in 1913, and at the time of his recent appointment, was Associate Professor of Industrial Engineering here. When Professor Hugo Diemer was head of the Industrial Engineering Department, Keller served as his understudy and became acting head of the department when Professor Diemer left to do war work. During this period Professor Keller did excellent work in training men for the Ordnance Department of the Army, and largely on account of this work, he was himself commissioned to the Quartermaster's Corps where he served until the signing of the Armistice. Following his return from the war service, Keller decided to do graduate work at the Iowa State College, where he was also connected with the Industrial Engineering Department. He returned to Penn State about a year ago, and following Professor Kunze's resignation, was selected head of the Department.

AG CHEMISTS SPEAK BEFORE AMERICAN CHEMICAL SOCIETY

Several of the members of the Department of Agricultural Chemistry attended the meeting of the American Chemical Society, which was held at Pittsburgh this week. Dean C. W. Stoddard of the School of Liberal Arts was also present at the meeting and delivered an address. Professor R. Adams Duthier, Head of the Department of Agricultural Chemistry, presented a paper dealing with a phase of the study of vitamins, while Walter Thomas, Assistant Professor of Experimental Agricultural Chemistry, spoke on the subject of Nitric Nitrogen in Soils.
