

MISS MORGAN GIVES DRAMATIC READINGS

Shakespearean Actress Proves Ability As Portrayer of Characters in Two Hour Program

ACTRESS BROUGHT HERE BY PENN STATE PLAYERS

The dramatic moments and famous scenes of several Shakespearean plays were presented by Miss Mona Morgan on Thursday evening in the Auditorium.

Miss Morgan proved her ability as a portrayal of the characters of the great dramatist by holding the interest of her audience for two hours as the great figures of English literature, Woolsey, Romeo, Juliet, and Henry the Fifth became alive and vital through the art of a great actress.

The services of Miss Morgan were secured by the Penn State Players. The talented actress has been associated with the best Shakespearean actors, playing for several years with Walter Hampden until she entered upon her present work of presenting Shakespeare in a simple and unadorned way to the colleges and high schools of the country.

A burst of applause greeted Miss Morgan as she appeared on the stage. She began her performance with several unexpected jokes on prohibition, soon rising from the ridiculous to the sublime.

Miss Morgan then told the tragic romance of Romeo and Juliet. Portraying the famous scenes of the play and at the same time giving a sketch of the story, the talented actress held the audience enthralled with the tale of the two most tragic lovers of literature.

INDUSTRIAL ENGINEERS DISCUSS PA. DAY PLANS

The Industrial Engineering Society held an interesting meeting last week and transacted important business, especially in reference to the Pennsylvania Day stunts.

A discussion of the I. E. booklet was taken up and arrangements made for its publication. This booklet is sent to a great many manufacturers for the purpose of placing all I. E. graduates in good positions at once upon graduation.

Arrangements were made for a dance to be held in the near future, followed by a discussion of the I. E. stunts for the Pennsylvania Day program. Committees have been appointed and the work is well under way.

COLLEGE ADDS TO FLOCK OF PURE BRED SHEEP

Six yearling Shropshire ewes and a Cheviot ram have lately been purchased by the Animal Husbandry Department of the College, bringing the total number of pure breeds in the college flock to approximately two hundred head, including the spring crop of lambs.

WISCONSIN CO-EDS BARRED BY PUBLIC DANCE ORDINANCE

Co-eds of the University of Wisconsin are up in arms, because a new city ordinance classes the famous Junior Promenade and the military ball, the most important social events of the school year, as public dances.

Another point at issue is the closing of all student dances at midnight instead of one o'clock. Professors have complained that students come to Saturday morning classes, bleary-eyed, tired, yawning and lacking in knowledge—all because they attend a one o'clock party on Friday night.

The Left Hind Foot of a Rabbit Caught in the Dark of the Moon. It is claimed to have much influence for good. If caught in a graveyard its power against evil is unlimited.

ALASKA MISSIONARY ADDRESSES CHAPELS

Dr. John W. Chapman, a medical missionary from Anvik, Alaska, spoke at both chapels last Sunday on the work that is being done among the natives at Anvik. Dr. Chapman has maintained his post at Anvik with the Indians for thirty-five years, coming back to the States only once in seven years.

At the time of his arrival in Alaska, Dr. Chapman could not understand the Indians nor could they understand him. With the aid of his predecessor, Dr. Parker, a school was started where, little by little, the Indians learned to use simple English terms until now they all talk English fairly well.

The purpose of Dr. Chapman's mission is not entirely to save souls but there is a people there to be preserved, physically as well as spiritually.

AG EXTENSIONISTS MAKE PLANS FOR WINTER WORK

Conference of Specialists Hear Reports on Campaign Progress of Agriculturists

Plans for the coming winter conference together with the administrative work of the Agricultural Extension Department, formed the principal discussion at the conference of agricultural specialists and county agents which was held at the college last week.

A report on the dairy cattle which have been donated to Penn State by the cattle breeders of the state was made and much discussion was given to the Building Fund Campaign, the agricultural campaign, the Poultry Raisers' Dormitory undertaking, and the Potato Growers' Hospital project.

The date of the coming Farmers' Week for this winter was set for December eighteenth to twenty-first. It is believed that enough cattle, donated by individual breeders, will be on hand during that week to form an interesting exhibit for the farmers who visit Penn State at that time.

GRANGE HOLDS OPEN MEETING AND PROGRAM

The Penn State Grange held an open meeting last Thursday and also carried out an interesting program to furnish an evening of entertainment.

C. V. Geiger '23, the Master, gave a talk on the workings of the Grange and its expansion program for the year. Mr. John Dale spoke along a similar line and told how the Grange was organized and of its aims.

RULES FOR LIVESTOCK MEN'S ESSAY ANNOUNCED

Annual Medal Contest of Saddle and Siroloin Club Open to Ag. Students

For the first time in the history of Penn State, students in the agricultural school will take an active interest in the Saddle and Siroloin Club's Medal Essay Contest this year.

All the seniors in the department of Animal Husbandry have agreed to submit essays and several Juniors and Underclassmen have also voiced their intention of taking part.

The decorative feature of the medals which are offered as a reward for the best essays is a figure of Ruth, the gleaner. To win the contest is regarded as one of the highest honors open to agricultural students and the leading essays will be widely published.

The rules of the contest are as follows: This contest shall be called the "Saddle and Siroloin Club Medal Essay Contest."

It shall be open to all undergraduate students in agricultural colleges in the United States and Canada. The subject for the 1922 contest shall be "The Principal Factors in Successful Livestock Production."

Essays must be written on one side of paper only and should be typewritten, though this is not required. Papers submitted should not bear identification marks, name and address of contestant being written plainly on a separate sheet.

All essays will be judged by a committee of competent men, and awards announced at the time of the "International."

All essays must be in the hands of the Committee by November 1, 1922. The first prize will be the "Ithaca" gold medal; second prize sterling silver medal; third prize bronze medal. Essays must be submitted to the Chairman of the Committee.

Winning essays will be submitted to the leading agricultural papers for publication.

TRAVELER AND AUTHOR TO GIVE "Y" LECTURE

J. Campbell White, former president of Worcester College, Ohio, will speak of Worcester College, Ohio, this evening on the subject "Does the World Need Laymen, and for What?" as the fifth number of the weekly-lecture series that are being given under the auspices of the Student Fellowship for Life Service and the Y. M. C. A.

These lectures are being given every Tuesday evening by the "Y" with the idea of enabling the students to get together, much as they did in the old-time mass meetings.

CORNELL CONTINUES WEEKLY DANCE CUSTOM

The students at Cornell University have again started their program of weekly dances for the year. These dances are held in the Armory from nine until midnight and an admission fee of one dollar a couple is charged. The fellow who comes alone has to pay a dollar and a quarter. The purpose of the dances is to afford a recreation for the students of the University.

SERIES OF LECTURES WILL BE GIVEN SENIOR ENGINEERS

The first of a series of lectures similar to last year's popular series will be given to senior engineers on Friday afternoon, October twenty-seventh, in Room 200, Engineering D. The speaker will be Mr. C. W. E. Clarke, Power Engineer of Dwight P. Robinson and Company. He will give an interesting illustrated lecture on the Cofax Station of the Duquesne Light Company of Pittsburgh. All senior engineers are urged to attend.

Dr. West's Tooth Brushes

Special sale this week at 35c each, regular price 50c. Recommended by leading Dentists in the country.

BIBLE STUDY GROUPS INCREASING IN NUMBER

Under the direction of the Penn State Y. M. C. A. the number of Bible discussion groups in fraternity and rooming houses throughout town is rapidly increasing. These groups have for their purpose the discussion and study of the Bible and the social principles of Jesus.

The leaders of these groups meet every Wednesday evening and are coached by Dr. F. L. Pattee. They are using for their discussion Rauchenbusch's "Social Principles of Jesus," a book containing questions and answers on the social principles of Jesus.

It is the ultimate aim of the Y. M. C. A. to have discussion groups in every fraternity and rooming house in State College and every student who has any desire to take up the work of a group leader is urged to come to the Wednesday evening discussion in Room 319 Old Main.

DAIRY HUSBANDRY CLUB HOLDS INITIAL MEETING

Plans for Pennsylvania Day Exhibit and for Financing Judging Teams Are Approved

The members of the Dairy Husbandry Club of Penn State held the first meeting of the year last Thursday evening in the Dairy Husbandry lecture room, 219 Dairy Building, and from all appearances the coming season is destined to be a successful one for that organization.

Business was not the only matter before the dairy students last night, as some talks of unusual interest, concerning the recent National Dairy Show held at St. Paul and Minneapolis, were given by Professors W. B. Combs and A. A. Barkard, Head of the Dairy Department and by W. D. Swops.

They also outlined the progress of the state-wide campaign among the breed-

ers and dairymen of Pennsylvania, to replenish the depleted dairy herd at the college. A considerable number of cows of the four major dairy breeds have already been presented as has been announced from time to time in the COLLEGIAN, and it is reported that the dairymen of the Keystone State are coming more and more to the realization of the necessity and value of donating valuable animals to the state institution.

The general exhibit usually staged on Pennsylvania Day by the School of Agriculture, will not be held this year, it is reported, but the Department of Dairy Husbandry, through the Dairy Husbandry Club, will provide for an interesting educational display.

It is reported, but the Department of Dairy Husbandry, through the Dairy Husbandry Club, will provide for an interesting educational display. An exhibit that cannot fail to attract "Ags" on account of its technical interest will also be so arranged that it will interest all other classes of students and visitors.

STRANGE CONTEST OPEN TO COLLEGE STUDENTS

(By Intercollegiate News Service) Captain D. H. Smith of the famous convict ship, "Success," now on exhibition at Warren Bridge, Boston, has put up \$250 in one of the strangest competitions ever offered college men.

The "Success," the oldest craft afloat, is the sole remaining relic of the old British felon fleet. Aboard her are preserved in their original state the cells, dungeons, and torture instruments used a century ago.

Solitary confinement would entail occupying a narrow lightless cell twenty-three hours a day, in chains, dragging a heavy ball and chain across the deck for the remaining hour, and subsisting only on rations of bread and water issued twice a day.

PRE-MEDS PETITION FOR ANIMAL INSPECTION TRIP

In accordance with their custom of previous years, the junior pre-medical students have petitioned the faculty to give them a week's leave of absence for the purpose of making their annual inspection of the medical schools in Philadelphia. The pre-meds hope to have their petition granted so that they may visit Philadelphia during the week of the Penn State-Penn game and thus combine business with pleasure.

The junior pre-medical students have taken trips similar to this for a number of years past and have secured an insight into the work which they are taking at the various medical schools in Quaker City. They plan to extend their inspection trip this year so that it will include visits to the University of Pennsylvania, Jefferson Medical School, and the Hahnemann Medical School.

Engineering for the Buyer

It is not enough that electrical apparatus should be carefully conceived, skillfully designed, and exactly manufactured. Engineering, to fulfill all its functions, must go beyond these necessary steps and do a still more enlightened service.

behavior of apparatus, old and new; it is a bridge over which information passes freely in both directions between Westinghouse and its thousands of clients and friends.

This function of Westinghouse application engineering covers many fields, and charges itself with many responsibilities. It is engineering that concerns itself with almost every aspect of business, central station, transportation, industrial, mining, electro-chemical, etc.

Be glad that you are to live and work in times when the spirit of service dominates commercial operations. The greatest change that has occurred in business in the last few decades has been in the minds of men. No longer need the buyer beware for it is now known that the seller's obligation reaches beyond the completion of the sale; and that it is both wise and right that every reasonable effort be made to give the buyer full value in both product and satisfaction.
