**MISS RAY IS CHOSEN
NEW DEAN OF WOMEN**

Is a Graduate of the University
of Pittsburgh—Succeeds Miss
Margaret A. Knight

Announcement has been made of the appointment of Miss Charlotte E. Ray, of Pittsburgh, as Dean of Women at Penn State to fill the vacancy caused by the resignation during the summer of Miss Margaret A. Knight.

Miss Ray, who for the past two years has been assistant dean of women at Penn State, was appointed acting dean. She is a graduate of the University of Pittsburgh and before coming to Penn State a teacher of history in the Westinghouse high school of Pittsburgh. She also taught in the grade schools of Allegheny County and in the Lattimer Junior high school at Pittsburgh.

The resignation of Miss Knight became effective at the close of summer session on August seventeenth. She will join her parents at Columbus, Pa., where her father is head of the American History Department at the Ohio State University.

During Miss Knight's term of office the three hundred girls enrolled at Penn State took a place on the campus never before enjoyed by the group.

A special feature inaugurated by Miss Knight was a personal service in which she assisted every girl student in choosing and preparing for her life work. To further this effort, two vocational conferences were held at which prominent business women gave advice to the girls.

During Miss Knight's stay, a physical instructor was secured for the girl students and the Women's Student Government Association was organized on a more active basis. The girls' athletic association also took on new life and the custom of awarding letters for athletic supremacy was begun.

Miss Knight is a graduate of Vassar College and the Ohio State University. She also served two years overseas during the war with Base Hospital number twelve.

**PENN STATE TO DEFEND
HONORS AT DAIRY EXHIBIT**

The Dairy Department of the college is rapidly completing arrangements to send two teams to the Eastern States Exposition which is to be held at Springfield, Massachusetts from September seventeenth to twenty-fourth. It is planned to send a Dairy Products and a Cattle Judging team to this exhibit.

The Intercollegiate Dairy Products Student Contest, in which the team will take part and which is part of the Eastern States Exposition, boasts of teams from the leading colleges of the east. Suitable trophies and prizes will be awarded to the best teams in the different contests, and the team scoring the highest number of points in all of the events will be given a large banner in addition to individual prizes.

The Dairy Products Judging Team consists of V. N. Heckle '24, M. Sponis '24 and W. F. Bortz '24. They will be called upon to judge different kinds of butter, milk, cheese and ice cream.

The Cattle Judging Team which is made up of L. L. Egan '24, W. Seigist '24, John Coldren '24 and L. V. Stark '24 will soon leave for Philadelphia for practice contests. They will be accompanied by Professors Borland and Comb of the Dairy Department. General tryouts were held last spring at which time the team was selected. The team will leave for Springfield on Saturday.

**PROFESSOR BECHDEL RETURNS
TO DAIRY DEPT. FACULTY**

Professor Bechdel, a former instructor in the Dairy Department returned to Penn State this week after studying for his doctor's degree at the University of Minnesota. Immediately upon his return he was placed in charge of experimental work in dairy cattle feeding and management.

**CHANGES ARE MADE IN
MINING SCHOOL FACULTY**

Changes in the faculty of the School of Mines are considerable, due to the resignations of former professors and the appointments of new men to fill their places during the coming year. Some of these have been published, but there are additional changes in the faculty personnel of this school which have not yet appeared.

During the summer, Assistant Professor A. M. Roger resigned his place on the faculty of the School of Mines, to take up a position with an American-owned mining firm in Chile, South America. His place will be filled by Mr. P. B. Bucky, a graduate of the University of Illinois. Mr. Bucky has had considerable experience in professional work in West Virginia, Illinois and other important mine fields.

Mr. F. G. Straub, a former instructor in metallurgy, resigned to become a research metallurgist in New York City. Mr. A. E. Dewey, an instructor in geology and mineralogy has resigned, and is being succeeded by a teaching fellow, Mr. C. K. Graeber. Three new graduate assistants have been placed on the faculty of the School of Mines. R. M. Beatty '23 in geology, N. L. Weles, M. T. '23 in mining, and R. W. Snyder, Michigan Agricultural College.

**PHYSICAL DEPARTMENT
STARTS REGISTRATION**

Gym Classes Will Not Start Until
October First—Physical
Exams Begin Soon

The Physical Education Department is at present engaged in registering freshmen and having them sign up for their favorite sport for the fall term. Starting today, registration will continue for a week.

According to "Chief" Myers, who is in charge of the Gymnasium, work will be seriously hampered until October first. Due to the new Dormitories not being completed, many of the students who applied for rooms there have been compelled to room in the Armory. As a result, all indoor classes in Physical Education will have to be postponed until October first. Freshmen and sophomores will be able to sign up for their fall sports at once, however. These sports may be chosen from football, cross country, soccer, track, tennis, lacrosse, wrestling, boxing, golf, gymnastics, callisthenics, and basketball.

After all freshmen have been registered, physical examinations under the supervision of Dr. Ritonour will begin and will probably last for a week. It is planned to examine one hundred freshmen a night. Bulletins announcing the names of the freshmen to be examined will be posted near the Armory each day. Meanwhile, sophomores will begin work immediately after registering.

The Department is trying out a new plan this year, that of holding varsity and freshmen tennis tournaments. In these competitions, men will be selected for the respective teams so that work can be started at the opening of the spring season.

**STUDENTS ARE INJURED
IN AUTOMOBILE MISHAP**

A serious automobile accident on the State College-Bellefonte road last week almost proved fatal to two prominent Penn State students. F. W. Artols '24, captain of the 1924 rifle team, received a crushed arm and severe body lacerations, while E. G. Hawkins '25, first assistant football manager, sustained a compound fracture of the leg.

**PENN STATE ENGINEERS
PLAN FOR OPEN HOUSE**

Annual Exhibit To Be Staged on
Alumni Day—To Enlarge Program
of Last Year

A meeting of a small group of the leading engineering students was held Wednesday morning to make preliminary plans for the activities of the Engineering School for the coming year. The great success of the Open House which was held by the Schools of Engineering and Mining on last Pennsylvania Day has led the engineers to believe that they can expand their program even more for the coming year. It is expected that a similar Open House to be held this year on Alumni Day, will be followed by an Engineers' Party in the winter, and a Grand Outdoor Carnival in the spring.

Several departments of the Engineering School are already making plans for exhibits for the Open House on October twentieth. Organizations are being perfected and work on the various features is being assigned to individuals under the supervision of general committees. Since only five weeks remain before Alumni Day, the work will be started at once.

Large numbers of out-of-town visitors are expected to make the attendance at the exhibits even larger than the crowd that was entertained last Pennsylvania Day. Every effort is being made to prepare interesting exhibits that will furnish amusement for the visitors and publicity for the engineers.

A giant picnic and carnival for a thousand engineers and their friends will be the closing feature of the year, and will be held sometime in the late spring. Side shows and amusements in the afternoon, a picnic supper cooked and served by the engineers themselves, and a vaudeville entertainment by the side of a mammoth camp fire in the evening will be the features of the day.

Social events of such magnitude as these planned for the entire group of engineers are requiring the organization of an executive committee made up of representatives of each department under the leadership of the officers of the Combined Engineering Society. These men are holding additional meetings at the end of the week in order to approve final plans for financing and managing the Open House and the Picnic.

**FOUR PENN STATE MEN
IN JAPAN'S EARTHQUAKE**

During the recent earthquake which rocked the whole of Japan, one former Penn State student was killed and several others escaped with minor injuries. Donald D. Herr '02, of Cleveland, Ohio, was instantly killed at Miyazaki while Joseph S. Ruble '01, who accompanied Herr, miraculously escaped with a few slight injuries after being pinned beneath a telephone pole. Both men were purchasing curios in a Japanese shop when a mountain road slid into a steep gorge, carrying the small shop in the debris.

Two other Penn State men, T. M. Casoy '15 of Merion, Pa., and S. F. Ashbrook '17 were in Japan at the time of the shock. Casoy has been reported safe but no news as to the whereabouts of Ashbrook has been received.

**FROSH ASKED TO SIGN
UP FOR COLLEGE RADIO**

Freshmen who are interested in radio operating will have an opportunity to become affiliated with the College Radio Station in the near future as a call has been issued for the first-year men. Application should be made in a letter to contain information concerning experience, class of license held and other detailed information.

All letters of application should be sent to Gilbert L. Croesley at the Department of Electrical Engineering or before Wednesday evening, September nineteenth. It is the desire of the officials of the College Radio Station to have a number of freshmen sign up from which the best men will be chosen to assist in operating the Penn State station.

**GRADUATE SCHOOL PROMISES
TO HAVE LARGE ENROLLMENT**

After a successful summer session, during which it had an enrollment of about seventy-five, the Penn State Graduate School is well started toward a banner year this fall. Although many of the assistants of the faculty have not as yet enrolled due to the busy registration season, there are quite a large number of new full-time graduates already entered which makes the prospects of the school more promising.

**BAND CANDIDATES WILL
MEET TUESDAY NIGHT**

The Penn State Band is entering a season even more successful than that of last year is indicated by the interest shown by the members of the band who met in the Band Room, Old Main, last night. Instruments and music were distributed to the old members and plans were discussed for the coming year. Director Thompson intimated during the meeting that in all probability at least fifty men of the band would be equipped with new uniforms and overcoats, although definite action has not as yet been taken on the matter. All old band men are requested to report for the Freshman Reception at six-thirty this evening.

Several inquiries were received by Director Thompson during the summer months from prospective freshmen as to the possibility of entering the band and in order to get the new material into shape as soon as possible, applicants for membership are invited to attend a meeting to be held in the Band Room next Tuesday evening at six-thirty o'clock.

The trips which the band will take this fall include journeys to the cities of New York, Philadelphia, Pittsburgh and perhaps Syracuse.

**BLUE KEY SOCIETY TO
CONTINUE ACTIVE WORK**

Blue Key, Penn State's newest campus society, has been formally organized and already plans are being prepared for this season's activities. At a recent meeting of the organization a committee, appointed for the purpose, was instructed to secure designs for an emblem that would exemplify the aims and the purpose of the society. With the extensive program in view, both social and athletic, that has been outlined for the coming season, the need of an organization of the nature of the Blue Key will be fully justified.

At present the committee, with H. W. Banum '25 as chairman, has under consideration several designs submitted by various jewelry manufacturers, one of which will be selected to become the recognized symbol of Penn State's Blue Key society.

ACTUAL SIZE

You like to grasp a pen like this. It's big. It's husky. It looks strong, reliable, long-lived. And it is.

This new Wahl Signature Pen is a wonder for college work. It never needs prompting. You don't have to shake it. Touch that flexible point to paper and the ink starts with your thought.

The Wahl Comb Feed regulates the flow so perfectly that the ink never floods. The ink capacity is enormous.

And the everlasting nib—it's a marvel. It suits itself to any writing style. Just seems made for your hand. It is heavy

14-karat gold. Tipped with the hardest and finest grade of iridium that money can buy. Experts say this everlasting nib is the finest made.

Another big idea—clipped in pocket, purse, shirt-front, or notebook, the Wahl Signature Pen will not leak. The patented cap-construction assures this. The gold band you see around the cap prevents splitting.

There are two big sizes at \$7 and \$8—one for men, one for women. Ask for the Wahl Signature Pen. Other Wahl Pens from \$2.50 up.
