COMMUNITY DAY IS GIVEN STUDENT AID

Spring Mills Exhibit and Fair Is Directed by Country Life Club Members

SENIOR AGRICULTURAL STUDENTS AID IN WORK

Conducting a program of events that was largely instrumental in making the affair a success, a number of Penn State students made a trip to Spring Mills last Friday to take part in the Community Day activities held there. Members of the Penn State Country Life Club and the seniors in Agricultural Education conducted the major part of the program that was rendered.

This Community Day was in reality a fair with exhibits of live-stock, farm products, needlework and cooking. The exhibit was followed by a program of athletics and other recreations. The student delegates took charge of the music, officiated in the athletic contests and supervised the games.

Among the speakers present at the fair were W. R. Gordon of the department of Rural Organization Extension, and Dr. F. T. Strick, Assistant-director of Vocational Education of the department of Public Instruction at Harrisburg. Dr. Strick spoke on "The School Center of the Community." Mr. Gordon discussed "The Value of Play and Our Rural Grounds."

The neighboring high schools took part in the athletic events included in the recreational program. A soccer game between the Spring Mills Vocational School and Millheim High School was held in the afternoon. Music was furnished by the Country Life Club members. A double quartet with F. B. Childings '24 as its leader, entertained with several community selections.

The program for the evening consisted of music by the double quartet and was followed by three one-act plays presented by the Penn State Strolling Players. A great amount of credit for the success of the Community Day is largely due to the efforts of F. B. Benet, Director of the Spring Mills Vocational School, Edwin Dale, Supervisor of Agriculture, and John Payne, Vocational Supervisor for Centre county.

MERCERSBURG CLUB IS PLANNING ACTIVE YEAR

Fundamental Purpose is to Stimulate Penn State Spirit Among Members

With the opening of the present college year, members of the Mercersburg Club, composed of Penn State students who were formerly enrolled at the well-known preparatory school, are outlining a program of activities for the coming year which will firmly establish the organization as one of the leading ones of its kind on the campus. The club was formed last May by W. A. Rodgers, secretary to Dr. Irvine, Headmaster of Mercersburg Academy. Mr. Rodgers is also organizing similar societies in other large colleges of the country.

While the fundamental purpose of the club is to stimulate a greater Penn State spirit among Mercersburg graduates enrolled here and at the same time help new students coming from the academy, the members are planning various social functions, to include dances, smokes and a banquet, which will be held throughout the year. "Mike" Palm, president of the club, and H. W. Bausum '25, secretary, will outline the details for these affairs at the next meeting.

When at Penn State last spring, Mr. Rodgers called a meeting of all former Mercersburg students and explained to them the purpose of these clubs which he is organizing. He was enthusiastically received by the students and twenty-one men were enrolled as charter members.

SOCIETY OF INDUSTRIAL ENGINEERS HOLDS MEETING

The first meeting of the student branch of the Society of Industrial Engineers was held last Friday night in Engineering "D". Although the meeting was entirely social in character and the interests centered around cider and pretzels, considerable discussion was held concerning the society activities for the year.

In a talk to the society, Professor J. O. Keller, Head of the department, laid emphasis on the value to college students of participation in activities other than those in the classroom. In this connection, he emphasized the importance of college activities in developing those phases of a student's education which seem to be in demand when he is looking for a job on graduation. In this connection, he spoke of the value to be obtained in the work which has to do with the preparation for the engineering exhibit.

The detailed plans for some of the exhibits were worked out, and definite assignments were made for many of the students to a particular line of work. The meeting was exceedingly enthusiastic and it was typical of the feeling of the Industrial Engineering Society in supporting engineering and college activities.

ENGINEERING EXTENSION COURSES ARE IN DEMAND

Professors Elder and Gaum Make Trips in Interest of Extension Department

Steps marking the progress of the extension work that is being carried on by the Penn State department of Engineering Extension were made manifest by the announcement that Professor W. T. Elder left for the Cambria plant of the Bethlehem Steel company to organize a new correspondence course to be taught at the plant under the supervision of the company's staff.

Various other sections of the state demand the attention of the Extension Department. Professor C. G. Baum has just returned from an extended trip in the eastern part of the state, particularly in the vicinity of Philadelphia and in the Cumberland Valley. The trip concerned apprentice instruction and Professor Gaum reports that there appears to be a decided revival of this form of instruction by the companies themselves, supplemented in some cases by the co-operation with local night schools.

The department is having a large demand for its correspondence course in radio, inquiries having been received in the past week from a dozen states and Canada. It is hoped that the college radio station can be used to supplement the correspondence instruction in this course.

Another use to which the facilities of this department are being put is by students who have dropped out of college. Many of them are taking up college credit work with the intention of using these credits in the event of their possible return to Penn State. Work of the same sort is also being done by high school graduates who were prevented from entering this fall.

MILK PRODUCED BY COLLEGE HERD HAS INCREASED DEMAND

The Campus grade "A" milk which is produced and bottled at the College Dairy Barn, has met with such a strong demand that the college herd is not able to supply the amount needed by the community. Dozens of requests from new customers have had to be denied and the amount allowed to any one patron is limited. It is expected that a number of new cows will be added to the college herd in the near future. This will partially relieve the situation. The certified milk produced in the college dairy is also meeting with much commendation on the part of those using this milk for infant feeding or for invalids.

PENN STATE GLEE CLUB MEMBERS HOLD SMOKER

Mr. Atherton '22 Member of New York City University Glee Club Gives Talk

A smoker, featured by songs and speeches, was enjoyed by the members of the Penn State Glee club at the Beta Theta Pi house Wednesday evening. The purpose of the get-together was to furnish an opportunity for the old and new members of the club to become acquainted. The regular rehearsal was held, after which the smokes were lighted.

Speakers of the evening were introduced by D. V. Bauder '24, president of the club. Mr. E. N. Sullivan, alumni secretary, spoke of the beginning of glee club work at Penn State and told of the uphill fight made to establish and maintain a club on the campus in the initial years of the organization. Mr. Charles N. H. Atherton '22, of New York City, son of former president Dr. George W. Atherton, complimented the club and its director on their fine showing at the intercollegiate glee club contest in Carnegie Hall last March, and expressed his belief that the Penn State songsters would be rated among the leaders at the next contest.

Mr. Atherton is engaged in settlement work in New York and is now on leave of absence. He is a member of the University Glee club of New York City under whose auspices the intercollegiate are held. The next speaker introduced was Dr. O. F. Boucke, who expressed his pleasure at the type of music rendered by the club in recent years. He also spoke of the early years and efforts of the organization then under the direction of Professor C. C. Robinson.

R. W. Grant, director of the club, stated his appreciation of the work done by the members and spoke highly of the musical ability of the club as a whole. He also said that among the club members there seemed to be a friendship and spirit of cooperation that couldn't be beaten by any other organization on the campus.

PENN STATE POTATO CROP ATTRACTS MUCH ATTENTION

The attention of the potato buyers of the state is being attracted by the volume of the Penn State potato crop of this year. Under the management of Superintendent C. L. Goodling an average crop of 334 bushels to the acre with a maximum of 435 bushels to a single acre has been produced on a twenty acre lot.

DEAN ZIMMERMAN OF MARYLAND UNIV. TO VISIT PENN STATE

Dean P. W. Zimmerman of the College of Agriculture of the University of Maryland will be a visitor to State College on Alumni Day. He will be accompanied by F. H. Leuschner '21 and T. H. Bardeson '21 both on the staff of the University of Maryland. The visitors will look over the School of Agriculture here as well as seeing the football game with Navy.

FRESHMAN CABINET TO BE ORGANIZED BY Y. M. C. A.

Importance of Local Work Is Shown by Request for Teacher at Penitentiary

Following a supper in the "Y" hut, a freshman Y. M. C. A. Cabinet will be organized this coming Thursday evening. The yearling cabinet will have the same committees as the senior cabinet, and will function in much the same way. The experiment of last year's freshman cabinet proved such a success that it was decided to incorporate it as a permanent phase of Y. M. C. A. work on the campus of Penn State.

A request was received at the "Y" hut last week from the state penitentiary at Rockview for a student teacher for the Sunday morning Bible class at that place. No one has been selected for the position as yet and those who are interested in such work should get in touch with Secretary Olmstead at once. Student Bible classes have begun their studies for the year, having met last Monday night for the second time. These classes gather at various homes and fraternity houses about the town every Monday evening at seven o'clock and anyone desiring to affiliate himself with this work may get information concerning it at the "Y" hut.

Secretary Olmstead leaves tomorrow for Cleveland, Ohio, where he will attend a constitutional convention of the Y. M. C. A. This is the first convention of its kind ever held by the national association, and Mr. Olmstead is one of the delegates elected to represent Pennsylvania.

It is anticipated that out of this convention will come a reorganization of the state and national departments as there has been some overlapping between these two functions. So far plans have been submitted for national reorganization, one of which is sponsored by the Rockefeller Foundation. The fundamental idea of local autonomy for the associations will undoubtedly be preserved.

SUCCESS OF ENGINEERING ACTIVITIES IS ASSURED

Membership in the Combined Engineering Society are still being turned in to the treasurer, although the total number is still only a small part of the engineering school. The following is a list of the percentage enrollment by departments to date:

- Industrial Engineering 61 per cent
 - Mechanical Engineering 23 per cent
 - Civil Engineering 12 per cent
 - Electrical Engineering 12 per cent
- This enrollment, although representing slightly less than two-hundred and fifty engineers, and the sum which they have turned in as dues to the Combined Engineering Society, insure the success of the engineering activities for the year. In addition to the funds which have been provided for the engineering exhibit, the finance committee has budgeted two-hundred dollars to finance the engineers ball which will be held some time during the winter. This leaves approximately twice that amount to provide the entertainment and a picnic supper at the spring carnival which will be held some time during May. Both of these latter two events are to be open to those members of the Combined Engineering Society as functions, which have been included in their dues for the year.

NOTICE OF DISSOLUTION

Notice is hereby given that the co-partnership, composed of I. M. Foust and A. T. Sellers, doing business under the firm name of Foust-Sellers Hardware Company, was dissolved by order of Court on the 11th day of October, 1923, and the business purchased by I. M. Foust, to whom all accounts are payable, and who has assumed the payment of all firm debts.

I. M. FOUST,
A. T. SELLERS.

Not that we advocate one-armed driving—but when she's in the car with you, what can you expect?

Then a wind comes along, your cap starts to leave your head—and there seems nothing to do but let go the wheel, altogether!

There is one other thing to do, though, at that: Crawl under a "SURE-FIT" CAP—gear it tight on your forehead—and you're all set for the journey.

The only other thing necessary to make your pleasure absolute and complete is to learn to steer with your knees.

Investigate these caps. They're easy to look at as well as easy to adjust—and the price makes them easy to own.
