

FOOTBALL MEN GREETED AT BIG MASS MEETING

Alumni and Players Talk on Navy Game—Bez Gives Students Inside Grid Game

Long before seven o'clock on the eve of the Navy game, students and alumni filled every seat and most of the standing room on the main floor and in the balcony of the Auditorium...

When the football squad entered and took their seats of prominence, cheer after cheer arose from the gathered masses and when they finally quieted down, it was with great reluctance...

"Dutch" Bedenk, "Mike" Palm, Harry Wilson and "Hap" Frank, were next called on by Enck and all made short, succinct speeches expressing hope for the contest on the morrow.

Amid much cheering, Bez mounted the platform to give his opinions on the chances of his proteges. He said that Penn State has a bigger and faster team this year than he has seen here before...

JUDGING TEAM MAKES RECORD AT DAIRY SHOW

Three Penn State Students Take Many Prizes—Cattle, Judges Show Up Well

The Penn State dairy products judging team, composed of W. F. Borst '24, V. K. Hoekel '25 and M. P. Soponis '24, made a remarkable record at the National Dairy Exposition held at Syracuse recently.

Hoekel was first among the twenty-one contestants in the judging of butter. In obtaining these honors, he duplicated his fine work at the Eastern State Exposition, where he was also high man in the judging of butter.

In the average grades for the judging of all products the three Penn State men ranked among the first five in the contest. Borst having the highest score of all contestants.

The signal victory of the dairy products judging team reflects much credit upon Penn State and upon Professors W. H. Martin and W. B. Combs, both of whom took an active part in coaching the team.

Penn State was represented in the dairy cattle judging contest by L. L. Haig '24, Wilbur Selt '24, John Colgren '25 and W. R. Willot '24. This was the largest collegiate dairy cattle judging competition that has ever been witnessed in the United States.

FIRST REGULAR MEETING IS HELD BY CLOVER CLUB

All Agronomy students were brought together for the first time this year when the Clover Club held its first regular meeting last Thursday evening.

Mr. Stewart, of the State Department of Agriculture, was secured as the speaker for this first gathering and the subject of his talk centered around one thing—wheat. He spoke interestingly on wheat grades and the wheat situation as it now is in the state.

Plans for the second annual grain show, to be held sometime during the coming winter, were discussed at the meeting. The exhibits will be limited to those of the students and of the college.

EXHIBITS BY ENGINEERS ARE WEEK END FEATURE

Work of School Is Cleverly Evident by Working Models Erected in All Departments

Penn State's several engineering units, including the Civil Engineering, Mechanical, Industrial, Architectural and Electrical Engineering Departments, held their second annual exhibit last Saturday, Alumni Home Coming Day.

The Civil Engineering exhibit, which was held in Engineering A, consisted of pictures and small working models of highways, irrigation dams, sewage disposal plants, and methods of railroad construction.

The Industrial Engineering exhibit, which was held in Engineering B, consisted of furniture made in the Industrial Engineering factory, a home made radio set, articles made in the foundry and various other interesting features.

The Electrical Engineers held their exhibit in Engineering D where many present day electrical devices were shown.

Some of the interesting displays of this exhibit were a complete telephone system, and a device known as the wireless light which shone brightly whenever placed upon a map of the state in the vicinity of State College.

The last exhibit was that held by the Architectural Engineers in Engineering F. Their display contained a gallery of world famous architects, student designs, and water color sketches.

FOR SALE—Baby carriage and stroller. Rates very reasonable 419 W. College Ave.

See the big game in New York next Saturday. Go by automobile. Cheaper than railroad fare. New cars—open and closed. Make reservations now. DRIVE-IT-YOURSELF AUTO CO. Phone 876, 234 E. College

FOR SALE—Six room house and other buildings on 4 acre lot, five miles from State College on main road. Aurelia McBride, 606 W. Fairmont, 10-19-23

PHYSICAL EXAMINATIONS ARE NEARING COMPLETION

Dr. J. P. Ritenour and his staff of assistants, composed of "Chief" Myers of the Department of Physical Education and Doctors Kidder, Foster and Dale have been examining on an average of over one hundred freshmen each evening in the Armory.

Judging from the number of men who have already been examined, the average development of the first year men is much better than that of last year, probably due to the fact that most of the new men have carried on outdoor exercise to a high degree during the past summer.

See a good show! We have the schedules for nearby theatres. DRIVE-IT-YOURSELF AUTO CO. 234 E. College

Puretest Mineral Oil RUSSIAN TYPE Is daily echoed by customers who keep coming back for more.

Puretest Mineral Oil is complete and thorough in its industrial lubricating properties. Tasteless, odorless, non-irritating. Excellent for constipation.

Rexall Drug Store ROBERT J. MILLER, P. D. State College, Pa.

Contrary to the opinion that members of the new class were much under size, it was announced that they come up to the average in both height and weight.

What about going home for the weekend? Hire a car and drive it yourself. Make reservations now. DRIVE-IT-YOURSELF AUTO CO. 234 E. College

members of the examining board are of the opinion that military drill will correct this.

Real Service Must Be Engineered

Many of the men whose names are writ large in engineering history are design engineers; men like Westinghouse, Lamme, Stanley, Hodgkinson, Tesla, Shallenberger. Their inventions have the quality of usefulness, of reliability, of productibility; which is an involved way, perhaps, of saying that they have the primary requisite of all really great inventions: Serviceability.

Engineering history abounds in instances of near-genius that produced no product, and of great developments that never reached completion; and most of these instances are explained by the lack, somewhere in the system, of that ability to give real Service.

Service, in a machine or a system, or wherever you find it, is not there by accident but because it was incorporated by men who understood what was required and knew how to provide it.

Much more is required of the designer than facility in calculation and mastery of theory. He must have first hand and thorough familiarity with manufacturing operations and with commercial and operating conditions. It takes more than mere ingenuity and inventiveness to design apparatus that will be really serviceable and will "stay put."

The design engineer, in the Westinghouse plan, is responsible for the performance of the finished product. He cannot possibly have the proper understanding of operation unless he operates and tests, unless he spends time and thought in investigation and study, not in the laboratory or drawing room, but right on the operating job. Here, most of his ideas will develop; and here he will see and prepare for all the different things which the product will later have to encounter.

It should be thoroughly understood that the primary function of the design engineer is the conception and the production of new or improved apparatus, and familiarity with the practical is essential to the proper discharge of this duty.

It is this view of designing that makes this branch of Westinghouse engineering so important, so effective, and so productive of real developments.

Westinghouse ACHIEVEMENT & OPPORTUNITY

You were first to appreciate soft collars—so you'll appreciate this adjustable cap!

You college men demand comfort in attire. That as much as anything, is responsible for the "something different" that sets you apart.

Thus the vogue for soft-collars, for goloshes, for easy-fitting suits began in the colleges of the land.

Thus, also, are college men flocking to welcome the "SURE-FIT" cap.

This cap has an invisible buckle and strap which enables you to adjust it to your comfort. It's made in every pattern and is styled for college men.

Hop to your haberdasher and look it over.
