

COLLEGE CATALOGUE FOR COMING YEAR PUBLISHED

The faculty of Penn State for the past year numbered 760 men and women, according to the general catalogue of the institution which has just come from the printer and which is now being sent by the college registrar to students and applicants for admission. Extension work in agricultural engineering education and mining (class 269, or about half of the faculty) thirty-seven devote their time to research problems, largely in agriculture and engineering, while

774 make up the actual teaching and administrative staff. The new catalogue is a 700 page volume containing full information about the college. New features this year include the re-arrangement of the School of Chemistry and Physics, the listing of a new curriculum in ceramic engineering, and the outlining of the prescribed work in military science for members of the engineers unit of the Reserve Officers' Training Corps. Several new scholarships are announced this year including twelve Julliard Musical Foundation scholarships established by the late Augustus D. Julliard, of New York, to promote musical culture in the United States.

ROOMING AND BOARDING ACCOMMODATIONS

The following is a list of boarding and rooming houses that still have vacancies for the summer session. Each of the houses listed is specially approved and the quality of the accommodations vouches for by the summer session authorities.

Table with columns for ROOMS FOR WOMEN and ROOMS FOR MEN, listing names and addresses of boarding houses.

BOARD

Table listing board members and their addresses.

NORMAL SCHOOL GRADUATES MAY OBTAIN DEGREES

Junior Rating Given Teachers in Curriculum of Arts and Science Education

ALL COURSES OPEN IN SCHOOL OF EDUCATION

Credits May Be Taken in Summer Sessions or Correspondence Study Courses

Because of its close relationship to the public school system of the state, the college has given much thought to the problem of providing an opportunity for normal school graduates to work for a college degree in the School of Education. A regular graduate of a normal school will receive junior standing in the arts and science education curriculum and the remaining work for a degree may be taken in summer sessions.

The minimum time that must be spent in residence at the college is one full academic year. This year must be taken immediately preceding graduation, or in five summer sessions, totaling thirty credits, three of the summers must be taken in consecutive order preceding graduation. Although it is desirable to spend one full year continuously at the college, it is possible to take all of the work in summer sessions extra-mural courses or correspondence study courses.

Rules

The rule granting college credit for normal school work reads as follows: Any candidate who is a graduate of an approved four-year high school course and of a two-year state normal school course, or of a three-year high school course and a three-year state normal school course and who has spent a total of six years in completing the work of the two schools, shall be granted junior standing in the arts and science education curriculum of the School of Education. If the combined high school and normal school courses normally aggregate but five years the candidate shall be granted but one year of advanced standing, that is, he shall be classified as a sophomore.

So much credit cannot be granted in the other curricula of the School of Education. (Chemistry, physics, industrial education and agricultural education) because the normal school course does not furnish enough of the prerequisites in these curricula to enable a student to finish the last two years' requirements in two years. Hence for these latter curricula there must be a separate evaluation of each student's credentials to determine his exact standing.

Curricula Open

Curricula in five different departments are offered to normal school graduates in the School of Education. Each regulars requiring four collegiate units. These courses are as follows: Arts and science education with majors in all of the departments of work in elementary and secondary schools which are not specifically covered by other curricula of the school, also in administration, supervision and research.

Agricultural education, with majors in the various specialties in the field of scientific agriculture and rural life. Industrial education, with options in shop work, related subjects and construction schools.

Home economics, with options in vocational teacher training, institutional administration and household arts.

Nature study, with majors in nature study and general science. A more complete description of each of these courses may be found in the general college catalogue.

In the majority of cases, the courses of students admitted with junior standing in the School of Education will consist of approximately the following, varying somewhat according to elective courses taken in normal school; major subject eighteen credits, minor twelve credits, science six, arts credits in psychology or philosophy and education, political science three credits, economics three, clerical or language twelve, making a total of sixty credits.

Degree

All curricula of the School of Education lead regularly to the degree of bachelor of science. The degree of bachelor of arts may be obtained in the arts and science education curriculum, if at least fifty per cent of the credits earned for the degree are in liberal arts studies such as English, languages, history, mathematics, philosophy or similar subjects.

Any additional information as to how a normal school graduate may obtain a degree from Penn State, can be obtained by applying to the summer session office.

DR. PIKE WILL SPEAK BEFORE STUDENT BODY

Dr. J. V. Pike will again come to Penn State to lecture before the student body on the subject of 'Abnormal Psychology and Mental Hygiene' on Monday night at eight o'clock in the Open Air Theater. Dr. Pike is a physician at the Danville State Sanatorium and has had a great deal of practical experience in the treatment of those mentally deranged.

Dr. Pike is well known at Penn State because of his frequent visits here during the past two years when he has conducted a series of lectures during the winter months which finally culminated in a trip to the sanatorium for personal view of the conditions used by the state for treatment of its unfortunate inmates. This system will also be used this summer and after a series of talks on the various subjects of which there are five, a trip to the hospital will be arranged for those who wish to go. At this time an opportunity will be given to observe the patients there and will illustrate the various types upon which Dr. Pike will dwell during the lecture.

NOTED ARTIST SECURED TO TEACH OIL PAINTING

Emile Walters, Well-known for Landscapes Has Garnered Important Prizes

In an effort to build up the fine arts department at Penn State the summer session is fortunate in securing the services of Emile Walters, one of America's leading landscape artists, as

instructor in oil painting for the summer course. Because of the increased interest shown since the advent of Mr. Walters, he is teaching both morning and afternoon. The morning class for advanced students, while the afternoon will be devoted to beginners' classes.

During the past winter Mr. Walters has gained several special honors. He was recently elected to the 'New Society of American Artists' one of the most select art societies in New York. In the autumn exhibition of the National Academy of Design he was highly honored by winning the coveted Francis Murphy prize with a landscape of spring entitled 'Still Blooms'.

Upon institution, he is represented in the Pan American exhibition, an exhibition which travels throughout Central and South America. He is a member of the Art Club of Philadelphia, the Salmagundi Club of New York and is internationally known and represented.

MISS RISHELL WILL SING FOR NEAR EAST BENEFIT

Making her debut at State College, Miss M. L. Rishell who graduated from Emerson College of Boston, Massachusetts this spring will entertain at the Lutheran church with a program of instrumental and solo music on Monday night at seven-fifty-five o'clock for the benefit of the Near East Relief Mission fund. Admission will be twenty cents for children and thirty-five for adults.

Miss Rishell is a daughter of the Rev. C. W. Rishell of the Pleasant Gap Methodist Episcopal church and was obtained to give the entertainment, since she is at her home for a few weeks' vacation. The recital is being arranged under the auspices of Mrs. C. W. Smith's Sunday School.

During her vacations in previous summers, Miss Rishell has appeared in several of the near-by towns including a recent presentation at Williamsport where she was received with enthusiasm. Her timing and former recitals promise a successful program.

LARGE CROWD TAKES PART IN COMMUNITY SING IN AUDITORIUM

With a record attendance, the opening gathering of summer session students for the singing of community songs was held in the Auditorium under the leadership of Director Grant of the music department Monday night.

Chaplain Frank Metzger gave the address of welcome to the students. In this he pointed out that they had come to an institution the traditions of which had been built by men like Dr. John H. Sparks and Dr. Atherton. He said that this tradition of good fellowship was carried on among the resident students through the 'Penn State Hello' and went on to urge that even though they were just here for the six weeks that summer session students should adopt the Nittany password.

Singing exercises opened with 'America' and closed with the 'Star Spangled Banner.' Old folk songs were also included on the program for the evening while several short and humorous selections were interspersed to add to the spirit of the affair. This is one of the means employed by the College to draw the teachers together and create a wider friendship among them.

A second meeting will be held Monday night in the Open Air Theater at seven o'clock. Dr. Grant has been working on a program for the evening and plans to have some fine selections ready for the participants. All are invited to attend and take part in the exercises.

CHORUS ENROLLS LARGE NUMBER OF VOLUNTEERS

An unusually large number of students have enrolled for the annual summer session chorus, according to Professor F. W. Grant, director of the department of music. However, the majority of those signed up are women students, and there is a dearth of material in the male voice section.

TRIP TO BEAR MEADOWS TO BE TAKEN SATURDAY

Continued from first page. should provide themselves with a lunch for noon as there will be no opportunity to buy any along the way. Those wishing to be comfortable and to enjoy this excursion should wear stout heavy shoes and clothing suitable for traveling in a dense forest.
