THE BELL ROPE

A year or two ago there was printed in these columns a communication the starting words of which weight it he correct adverb was used. Anything which speaks of the hanging sword is ominous, and especially, such a hanging sword as chapel attendance

But, be that as it may, this is a new sort of sound we will talk about. It is a new sort of bell, and its reception by the students must not be ommous to the car; it must be pleasing to every sense. It is "The Old Main Bell." And its sound, although governed by the quality of the metal, has another governor. And that authority is the man who tolis the bell—the man who twists the rope about his forearms and rings the big bell above his head.

The bell will never ring without a bellman. Without a force to start the huge inverted bowl swinging to and away from the clapper, there can be no sound. Without the contributions of the student body. "The Old Main Bell," Penn State's pive literary magazine, will clink—not toll—ommously, Penn State will be forced to relinquish the honors gained for this College by the staff of last year's publication.

You who have writing ability, you who goard huge stores of pregnant experiences, you who soar in flights of imagination—grays the bell-rope and pull—pull for "The Old Main Bell."

"GET TO PENN"

"GET TO PENN"

Oa Thursday begins the exodus that has been a mental picture for every loyal Penn State man since the Blue and White gave Penn a scoreless trimming on Franklin Field two years ago—or, to go back farther into the distant past—to the time when Harry Wilson covered himself with glory and Penn with whitewash.

Down anto the haunts of the touted Quakers goes the borde of silent Lions, intent on taking the "lighting Friends" by surprise and administering to them an unexpected dubbing. Into the stands surrounding the huge "Sugar Bowl" will be packed fifteen thousand voices shouting for the men from the foot of Mount Nittany.

Pennsylvania, loser to Illinois by a last-quarter field goal, has swept all other opposition before it, the rising Red and Blue whirlwind, swerved just a trifle from its course by the towers of the filmi, will try to get back into its path of absolute terror, to destroy everything it meet.

Penn State, sluggish against the fast-tackling, swift-running opposition for the last thre games, looks to lighting courage to be the victor over its age-old rival. Do you know that news from Philadelphia Asys "When the Penn-Penn-State series was, first mangurated Penn State was a mid-week attreation for Jennsylvania. The Red and Blue, after gazing on the results of Penn State's games thus far this season, is looking forward to the same kind or entertainment."

Can Penn State stand for that? No. Will that ringged, fighting, loyal eleven of ours stand to that? Not on your life! That Penn game will be the fight of our live! "Get to Penn!"

YOU'RE INVITED

Monday evoning will see the first meeting of Penn State's Open Forum. This endeavor, the name of which bespeaks its function, is something new and vitally interesting to those on this cam-pus, who once in a great while, concern themselves with thinking.

pus, who once in a great while, concern themselves with thinking.

The topics which are to come up for discussion in these meetings are not such things as:
"Why the Rah-rah Boys do not wear garters" or
"Why hiled tuxedos never fit." Far from that.
The questions will be of far greater importance than these trivial gestures of the mentally athletic students (sic!) on this campus. The Penn State Club has an idea at hand, the virtues of which outnumber the vices so overwhelmingly that the proposed Forum should meet with the

instant approval, the voluntary attendance and the unbiased thought of all of us. What the question is for the first meeting to decide is yet in the air. However, the speakers on the platform will be well versed on the subject, and will review it in an unprejudiced manner. Then, we understand, the issue, in the form of a resolution, is to be placed before the audience for a decision.

resolution, is to be placed before the audience for a decision.

Whether the decision given in any instance will result in a change of policy in regard to the issues under discussion, is yet to be deter mined It is probable that nothing will be settled, then again, something big may arise from any session of the Forum. At any rate, the Forum is the result of much thought, it will be a sort of clearing-house for student opinion—and it is a progressive step in the education of the student body.

The Bullosopher's Chair

The Bullosopher's Chair

"Smithers, did you even hear of the disease called Megacephalic Egotitis? Know what that means "

Smithers —"Never heard of it"

"Well, Smithers, that's not strange. I'll explain Librally translated it means an inflammation of the ego with attendant swelling of the head. The disease is rather common, middly communicable, and very virilent at centain times of the year, usually in the fall and in the sping. It is also a progressive disease, and well nigh incurable urful it has sun its full course. There are tertain pallintives, to be sure, but there is no known cure, once the disease is well seited. O, of course, there are a few preventive measures, but they are not much in use.

"College men are most susceptible to attack, and, strangely, the first symptoms begin to appear about the third year after graduation. When the graduate revisits the campia and finds new men in charge of student activities, into who were most insignificant in his day, an annoying ment il miritation is set up which stimulates the heretofoic latent germs of megacephalic egotitis to activity. The first munifestations of an attack of this disease are mild exhalations of vapors and rin inclination toward pes inside photographic and produce and the little disease is purely mental, you understand,—and by the fourth year, when are cincly new generation has come in to cover the earnpus and lithe buildings and put hand to all the heliate that guide he various campius craft, the afflicted one is about certain that they hold fleet is headed for the rocks, with wind and tide urging on toward complete shipwreck.

"This is indiced a deplocable condition of mind,—the disease is purely mental, you understand,—and by the fount year it has become so established that there is little loope of recovery for the next ten of lifteen years. In about that length of time the disease reaches this slittle loope of recovery for the mental state of this particular vice with the part of time the disease reaches the solutions of vice becomes flus

"Many persons, not acquairted with this malady could be inclined to take its manifestations seriously, but he patient's demonstrations are usually fraught with little larger to any one.

anger to anyone

"At this period also the afflicted person manifests a
lecided tendency toward loss of mental balance, sometimes
approaching near to manna and frenzy, but the victim is
never sufficiently volent, (more's the pity!) to waitant
incarceration or focible restraint."

Smithers:-"O,—I see! Why, I know a guy that ."
"Never mind, Smithers, you musn't see and know too

Smithers:--"O,—I see! Why, I know a guy that ""Never mind, Smithers, you musn't see and know too the But, as I was about to say when you interrupted e, at the height of the patovysins the sufferer is likely talk much about the destiny of the "Dear Old College" remolo, again,) and make frequent and blatant references to hell and the devil, but these are only symptons, intheis, and they should cause no anniety. The attacks, nich occur periodically, as I have said, are always discessing, though not necessarily alarming, and they have tendency to diminish in violence from about the eighenth to the twentieth vean. Strange as it may seem, the care quite frequently disappears entirely in most college. The connection between the discentification of the college. The connection between the discentification of the complete cure, apparently from this cause.

arce of the hallucinations."

Smithers:-"But what about those poor fellows who don't have sons to serd.

Well. Smithers, they just have to middle through The'riombe lasts a little longer, that's all, but final recovery, say in thirty years, is practically certain, if he strange middle, somewhat terrifying to the younger generation, but causing math among us of the lodger generation. You see, we're passed through it outselves."

Dutcher Aids Research In Scientific Education

Prof. R. A. Dutcher of the Department of Agricultural and Biological Chemistry and Dr. W H. Eddy of Columbia university, will investigate the scientific education accomplishments of all the food manufacturing concerns in the United States during 1926.

A contest among the nation's food manufacturing concerns is being inaugurated by the American Food Journal, one of the leading publications of its kind in the country. Prizes and certificates of merit will be awaided to the concerns that have been of most benefit to the ultimate consumer during the year Awaidwill be made on the basis of the research work done by the concern, of its advertising methods, together with secretarine educational accomplishments. Confittees composed of two men prominent in that field will mestigate each of the above phase.

Former Department Heads Visit College

Two former heads of the Colleg daily department visited the College on Satulday. These piecks were Di C W Laison, low chief of the Bureau of Daily Industry, United States expariment of agriculture, and Fied Rusmussen, executive secretary of the National association of Ice Greim Manufacturiers They addressed a group of daily students and faculty members during their stay at the college.

memores using memory lege Doctor Larson was head of the department of darry husbandly from 1913 to 1916, and Profesoi Rasmussen succeeded him. The little served until appointed secretary of the State Department of Agriculture by Governor Sproul after three years here.

reliminary meetings to pledge their upport to the cabin project.

Members of five co-ed groups, Syhor, Nita-Nee, Arete, La Camardie, and Chi Omega, pooled their efforts to obtain the firancial goal by elling the "pasteboard shingles" five sale was opened Saturday mornig at eight o'clock continued after a hort moon recess and concluded short.

In the noon of the football game

The monky acquired will be used for the few remaining expenses of the Andy Lytle Cabin. The cabin is the first of a series of such structures that Penn State students intend to establish at intermittent posts through the surrounding mountains. In proposing such cabins Penn State students are emulating Dartimouth patrons who generical their Alma Mater with a similar chain of cabins several years ago.

The Andy Lytle cabin, now complete, is open to any student organization on the Penn State campus for appropriate social functiors.

that of several men to the entire body.

I then, too, when the feenzy of national prosperity will have spent itself, the financial pressure will insist upon a less costly athletic regime; for some one pays for the present large intercolleginte spectacle. The physical training will become more and more an integral part of the college curriculum and not a machine by itself. The professional idea, eventually, will be tossed over the colleginte wall; and physical training currise will take their place side by stedent, not a coach.

3 The third major change which is, unfortunately, anticipated is the change of stress from the study of man himself to that of his environment. With the insistence upon conveniences, upon transportation facilities, and upon organizations the colleges will stress methods and processes, laws and practices, organization and statistics, buildings and equipment. What the higher institutions of learning are likely to forget is that a knowledge of facts is in itself of hittle importance except in so far as they may be used in making life saftly, sweeter, better and holier.

4. The cultural or book-learning phase of education has been overemphasized Good as that is, it is not so for everybody. Too many students have been forced into too few grootes, with a corresponding lowering of entrance requirements and graduation standards A greater effort will be made to determine the student's aptitudes, and then to direct him accordingly. This will result in a greater differentiation of industal training to meet the varying human capacities and capabilities in doing this the industrial schools will too easily forget that the study of tooks, the wonders of electricity, the laws of stress and strain in native income for human kind and for God at the liberal subjects. Likewise will
