EXAMS AGAIN

There is an old and tried saying which holds that you ultimately get out of anything just what you put into it—no more, no less. Twice a year this is proved to us by the arrival of exam week in our midst.

To the people who have put fifteen weeks of work into their courses, exams mean little. They get out of the course, in return for what they have put in, the necessary knowledge to pass the exams without fuss, rush or worry. Think how you envy them!

To those who put little or nothing into the courses, exams and the cramming before them hover as a blight which will run half of June by turning it into a grand mix-up of fuss, rush and worry. They can get nothing from the courses because they have put nothing in.

In many cases they will succeed in absorbing enough to pass the exam, and thus the course, by the skin of their teeth, but it will not stay with them long enough to pay them for the time they spent on it. These people need sympathy. If they expect to go through life in the same manner they go through college, they are due for a jolt.

Out in life the exams come when you least expect them—like bolts from the blue. There is no time to cram, the emergency must be met with the weapons in hand at that moment.

There are no kind professors and textbook authors to almost pour into your heads the results of their work and research. It is "Every man for himself, and the devil will take the hindmost."

Why wait until you must begin putting in what you want to get out? Get the habit now, and when a trial comes you'll have the jump on the less wise mortals.

ATTENTION—Will the two students who were in the Franklin sedan when it collided with a car above Pine Grove Mills on Saturday afternoon, May 21, 1927, please call State College 373 at once?

Co-eds Cram For Season's Quizzes

"Throw me that paper-knife—I've got to get this book open now. Three more days and then—oh, I know I'll flunk that Latin."

An air of strained activity has intruded itself upon the usual scenes of carefree gaiety in the women's dormitories. The dark cloud of impending doom in the form of yellow slips sent to unsuspecting parents, has cast its huge shadow over the corners generally devoted to "bull sessions" and "feeds," and labor reigns supreme.

Books that were kept in blissful peace in the darkest corner of the bookcase are taken from their shelves and fondly dusted in preparation for a long, siege Black coffee replaces the ice cream of "before-exams" days, and study halls almost creak with their unaccustomed load of silence.

But all for one week. Then, as if by magic, eyes dulled by study and lack of sleep brighten, books are tossed in the air and Marie Minerva departs in defeat.

Baseball and Track Are Latest Spring Sports

The interclass baseball tournament is being played off this week. On Tuesday the yearlings defeated the Sophomores with an 8 to 4 score.

The day for the girls' annual interclass track and field meet has been tentatively set for today. Any change in these plans will be noted on the bulletin boards.

Library Will Be Open For Summer Session

In order to accommodate Summer Session students, the Carnegie Library will continue its service during June, July and August, announces Miss S. W. Vought, College librarian.

Those students desiring to take books out at the close of the term may do so provided that they obtained special permission from the desk. These books may be kept out until September.

It has been requested by the librarians that all books that are due before the end of the semester be returned as soon as possible in order that the work of the employees may be facilitated.

Treasurer Deducts Plebes' Fine From R. O. T. C. Rebates

One dollar is now being deducted from freshmen deposits on R. O. T. C. uniforms by the College Treasurer to pay for their share of the damage caused by the Panama parade. The Treasurer is authorized to do this by Student Council in the following letter:

May 28, 1927.
President Ralph D. Hetzel,
Pennsylvania State College,
State College, Pennsylvania.
My President

At the last regular meeting of the Student Council it was moved and passed that the President of the College be requested to authorize the College Treasurer to collect for the Student Council, and in its name, the amount of the assessment laid upon the individual members of the Class of 1930 as their share in the cost of adjusting the claims against the students as a result of the demonstration on the night of May thirtieth. The Student Council hopes that the President will see fit to take the necessary action.

Respectfully yours,
S. L. Reeder
President
E. L. Spitel, Secretary

Seniors Are Awarded Silver Loving Cups for Activity in All Sports

Four Senior girls, Misses E. A. Bullock, N. E. Sheridan, L. H. Robertson, and E. R. Frank, have been awarded silver loving cups by the W. A. A. as a reward for earning one hundred and seventy-five points in athletics while in College.

This is the first time in four years that any girl has earned enough points for a cup. The W. A. A. board wishes to commend the girls of the senior class for their activity in sports of every kind. They have won many championships since they entered College, and this year they have championship teams in hockey and basketball.

Each of the following girls has been awarded the varsity "S" for having earned one hundred and twenty-five points: Misses C. M. Ognibene '27, M. D. Reed '28, M. M. Wheeler '28, and M. M. Mather '27.

Name Distribution Point For '27 Caps and Gowns

Distribution of caps and gowns will be made from Engineering A Saturday, June eleventh, from ten o'clock in the morning to five o'clock in the afternoon. They will be worn Sunday at Baccalaureate, Monday for Class Day and Tuesday at Commencement. Special distribution will be made Monday morning from nine to ten-thirty o'clock. Immediately after Commencement caps and gowns must be returned to Engineering A. Saturday noon is the deadline for all cap and gown measurements.

STATE'S YOUNG FARMERS TO ORGANIZE HERE SOON

Four Hundred and Fifty Will Take Part—Rotary Club Plans Welcome

Under the direction of the club work department of the Agricultural Extension division, the eighth annual Young Farmers' Week will be held here from June fifteenth to eighteenth inclusive.

More than four hundred and fifty boys and girls will attend this event, one-half of this number being members of agricultural clubs conducted by the local department all over the State, the remainder being students of vocational schools of Pennsylvania.

The program opens with a welcome in Old Chapel Wednesday evening of that week and a talk by Dean Watts, who will explain the life of farm boys and girls of other countries.

Thursday morning and afternoon is to be featured by a livestock and poultry judging contest, open to all Thursday evening the crowd will be the guests of the State College Rotary club at an entertainment at the Cathaum theatre.

CHARLES AND KNADEL ATTEND POULTRY SHOW

Prof. T. B. Charles and H. C. Knadel, of the poultry department, will attend the third world's poultry contest at Ottawa, Canada, from July twenty-seventh to August fourth. Forty countries are participating in this event, which is held once every three years.

Frizzell Reviews Debating Activities of Past Season

Prof. J. H. Frizzell, forensic coach, has compiled a summary of the activities of the College debating teams during the past year in the article below.

With the victory of the girls' debating team over Syracuse university last week, Penn State brought to a close one of the longest, if not the longest, debating seasons in more than a quarter of a century of forensic history. The fact has made no remarkable stir in the collegiate mind, it is true, but the achievements of the men and women who have accomplished the result are none the less worthy of record.

The season was not characterized solely by its length, for it was, on the whole, markedly successful not only in the number of victories, but also in the high quality of the debating shown and in the large number of persons who during the year engaged in this activity.

A brief resume will show the facts: Total debates held during the year, 18; debates at home, 9; victories, 9; no-decision debates, two being split-team, 4; defeats, 5; men's debates, 15; girls' debates, 3; students on debating squad during the year, 27, girls 13, total, 40; students in one or more intercollegiate debates, men 13, girls 6, total 19, different questions debated, 5.

Seldom has a season shown a greater number of "through-the-season" workers on the squad, or a larger number of actual participants in intercollegiate contests. Only two of these latter will be graduated, and the foundation for next season's team is already strongly laid.

The caliber of our opponents has been high and our victories include Pitt, W. and J., George Washington, Bowdoin, Boston college, Syracuse

(girls' debate), Ursinus, Dickinson and Lincol'n university. We met Penn, the University of California and Rutgers in no-decision debates and were defeated by Michigan State, Western Maryland, Dickinson, Geneva and Cedar Crest (girls' debate). The majority of these colleges are outstanding institutions, not only in the field of debate, but in the field of athletics, as well, and most of them appear with respect on our athletic schedules.

The return of girls' debates to the schedule after a lapse of more than a few years is another feature of the season just closed, and the results amply justify the effort. The girls have demonstrated their ability and their good sportsmanship under trying conditions in no uncertain terms, while the two home debates they held have been real treats for the few fortunate ones who attended them. We shall hope for even better results next season.

This is not a review of personalities, but of an activity. However, it would be inappropriate to pass over without mention the outstanding work of Gilbert Nurick '28, N. R. Adams '28, M. D. Berrill '28, S. R. Butt '28, J. W. Diandt '29, and M. R. Davis '30. This in no way minimizes the thoroughly effective work of a score of others who furnished the opposition.

Embryo Isaac Walton Catches Lengthy Trout

Continued patience of one of Penn State's ardent fishermen was rewarded last Monday morning by the landing of a seventeen-inch trout in a nearby stream. The fortunate angler is A. M. Acuff '28, and to prove the genuineness of his catch a sixteen-inch specimen was added on Tuesday. In spite of much questioning by other aspiring Isaac Waltons, Acuff refuses to divulge the whereabouts of his favorite fishing spot.

Horticultural Group Takes Inspection Trip

Meeting in the largest gathering of vegetable men in the State, the Horticultural Association of Pennsylvania will make an inspection trip through Delaware and the eastern part of Maryland July eleventh, twelfth and thirteenth.

\$75.00 A WEEK
Several students of this college who are willing to work systematically and faithfully this summer should earn from \$50 to \$150 per week (\$75 should be a fair average) by working for a New York corporation of the highest standing.
The work is selling, and the remuneration is by commission only. All possible help will be given by the home office, but success will depend almost wholly upon student's willingness to work a definite number of hours per day either upon well-to-do and wealthy people in their homes or offices.
There is a reason for not giving details in this advertisement, but you may rest assured that the work is of the most dignified and creditable character. Write today for complete information. Address:

Feel the Thickness of this Paper
—then imagine it split twelve times

The paper on which this is printed is approximately three one-thousandths (.003) of an inch in thickness.

The mechanics of America are grinding in every-day practice within limits of accuracy of twenty-five hundred-thousandths (.00025) of an inch—that is just about one-twelfth the thickness of this paper.

Grinding means accuracy, and mechanical accuracy is essential for speed and dependability.

Grinding in recent years has revolutionized metal-working methods. Grinding Wheels and Grinding Machines are employed in all modern machine shops to obtain extreme accuracy, rapid production and low cost.

"Grinding" and "Norton" are synonymous. Norton precision-grinding machines have made possible fast production with precision. Norton abrasives trade-marked "Alundum" and "Crystolon"—in grinding wheels and as a polishing material—have secured a strong footing in practically every industry. Norton Refractories and Laboratory Ware are fast becoming factors in the power plant, foundry, laboratory, and in research work in general.

When thoughts turn toward extreme accuracy and research, they turn toward "Norton"—the machines of precision, the abrasive products of the electric furnace.
