

Summer Collegian

VOL. XI, No. 3

STATE COLLEGE, PA., THURSDAY, JULY 7, 1927

PRICE TEN CENTS

Youthful Violin Artist Will Make Debut Here

Miss Carolyn Le Fevre To Replace Vera Poppe in Entertainment Number Here Tonight

Because of sudden severe illness, Miss Vera Poppe, noted cellist, who was originally scheduled to appear in the second number of the Artists' Entertainment course here tonight, is unable to perform and Miss Carolyn Le Fevre, celebrated violinist, will replace the cellist tonight at eight fifteen o'clock in the Auditorium.

Miss Le Fevre not only will fill capably the vacancy of Miss Poppe but in addition, managers state, will be as attractive an artist because of her reputation as one of the best woman violinists in the world.

Acclaimed By Critics

Critics claim that Miss Le Fevre is without doubt the most interesting violinist before the public and give abundant praise for the youth, beauty, ardor, technique and musicianship of the gifted player. Her playing is, as notable, they add, for its sympathetic fire, force of individuality, clear intent and emphasis of particular phrases that have kindled her imagination.

Miss Le Fevre has appeared as a soloist with great success. She has performed with leading symphony orchestras, including the Berlin Symphony and the Los Angeles Philharmonic where, as one writer states, "her performance held her auditors in a spell of attention seldom achieved by old performers." Her American and European concert tours have been extraordinary successes, according to Herman DeVries, critic for the Chicago American.

Tickets will be on sale for the various numbers daily at the Summer Session office and the Auditorium box office on the night of the performance. Prices for series tickets are \$2.50, \$2, and \$1.50.

Institute Broadcasts

Besides its work in booking artist entertainers, the Institute of Music, under the direction of R. W. Grant, is broadcasting weekly over WPSO, official college station. Last night, the first of these programs was continued on third page.

R. H. BELL APPOINTED TO STATE PLANT GROUP

Assistant Extension Director To Assume New Duties—Resigns Penn State Position

R. H. Bell, for the past seven years assistant director of agricultural extension here, has assumed his duties as director of the Bureau of Plant Industry in the State Department of Agriculture at Harrisburg.

In his new position Bell will have charge of nursery and apyary inspection work, European corn borer and Japanese beetle control, the potato wart and seed control work.

A native of Huntingdon county, Bell grew up on a farm. He taught country school for four years and then attended at Penn State where he was graduated from the agricultural school in 1910. After four years in horticultural work at the college he became extension agricultural agent in Lycoming county in 1914.

In 1919 he returned to State College as extension fruit specialist and a year later became assistant director of the agricultural extension service. Bell is a member of Alpha Zeta, national agricultural fraternity, and Phi Kappa Phi, national scholastic society.

Radio Relay League To Hold Next Convention At Penn State in June

Members of the Atlantic Division of the American Radio Relay League, totaling between two hundred and three hundred, will hold their next annual convention at Penn State next June Dr. E. C. Woodruff, of the College of electrical engineering department, has been elected director of the division for the second year.

G. L. Clossley, chief operator at the College radio stations, WPSO and SXE, is communications manager for the Western Pennsylvania section, and is chairman of a committee to arrange for the 1928 convention. The league draws its members from non-commercial radio operators and experimenters. The Atlantic division includes such operators in Pennsylvania, New York, New Jersey, Virginia, West Virginia, Delaware, Maryland and District of Columbia.

Youthful Violinist

Carolyn Le Fevre

PLAYERS PREPARE "THE DOVER ROAD"

Director Cloetingh Has Strong Cast for Showing Here on July Fifteenth

TICKET SALE TO BEGIN AT MUSSER'S MONDAY

"Whatever the status of the American dramatist may be, there can be no doubt that as far as satirical humor is concerned, A. A. Milne, the English playwright, stands in a class by himself." Whether this opinion is justified, will be the problem of those who expect to witness the Players' performance of Milne's wittiest play, "The Dover Road," in the Auditorium on Friday, July fifteenth.

The first ticket sale will be held at Whitney Musser's clothes store on Monday, the eleventh.

Certainly there will be adequate opportunity to judge the play. Director A. C. Cloetingh has secured for the major roles the same cast that made "The Dover Road" shown at commencement the most popular production of the year.

Ben Ricker will play Mr. Latimer, the quaint old gentleman who stragglers out (or tries to) the love affairs of Leonard, Anne, Eustacia and Nicholas. Oliver Anderson and Donald Buchanan will play opposite Margaret.

HOLDS BOOK EXHIBITION IN CORRIDOR OF OLD MAIN

An exhibit of technical and professional books of interest to school teachers, is being held in the corridor of Old Main. H. J. Shaffer, in charge of the exhibit and an agent of the World Book company, announces that the exhibit will close tomorrow morning.

O-Nix Hosed as Firemen Drive Barnum, Bailey and Ringling Out of Business

Barnum has shut down. Bailey has gone out of business. Ringling has wept bitterly, hauled down his circus tents and sent his elephants, even the one with the little white tail like a rabbit's, back to McKeesport (Indiana). The reason is as plain as a donkey's nose: the State College Fire company has gone into the business.

SESSIONISTS MAKE RESERVATIONS FOR ALLEGHENY OUTING

Second Excursion Will Include Visit To Coal Mines—Party Leaves on Saturday

TRIP WILL COVER MORE THAN A HUNDRED MILES

Tours to Penn's and Woodward Caves Will Follow—Tickets At Summer Office

The Allegheny Mountain Excursion will start from in front of the Auditorium at eight o'clock Saturday morning, Prof. W. R. White said yesterday. One hundred and sixty-five made the trip to Nippenose Valley last week.

"This trip will be a ride of about a hundred miles through some of the wildest and most beautiful places in the Allegheny Mountains," Professor White declared. "The beauty and charm of the varied scenery give joy to all who see it. No matter how often the trip is repeated, a person never loses interest in the Allegheny Mountains where one can see irregular shaped ridges checkerboarded with farms and forests."

Since 1924, because of the construction of a concrete road, Indian Mound Hill and Moshannon Mountain, which are about the best views of this excursion, have had to be omitted. The route will lead through Bellefonte, Snow Shoe, Grass Flat, Morrisdale, Philipsburg, Osceola Mills, Sandy Ridge, Bald Eagle and Warriors Mark. Allegheny Coal Fields.

This excursion will enter the vast coal fields of the Allegheny mountains and will include a visit to one of the best modern equipped coal mines, which will be entered by riding in mine cars. A flash light will be very convenient, but can be dispensed with since some light will be furnished by guides at the mine. Clothing suitable for entering a coal mine should be worn. White shoes, said Professor White, are not a necessary part.

Parties going on this excursion should provide themselves with a lunch for noon since there will be no opportunity to buy any along the way. Lunch will probably be eaten at Lakeside Park near Morrisdale after visiting the coal mine at Grass Flat. The cost of transportation will be one dollar.

Gus Karbach Wins Steele Racing Cup

Gus Karbach, Penn State sprinter, literally cleaned up in Philadelphia track events Monday. After winning the 440-yard event in the city games Gus captured the 440 and 220-yard races in the Germantown Business Men's association games. Gus got back to State College Tuesday sporting a new gold watch and a huge loving cup as a result.

The cup, donated by Alfred M. Steele, became Karbach's when he won the 140 on Monday for the third successive year. It had been in competition for eight years. Fred Loomis won it in 1920 while in the next two years John Onkes and Dan Taylor, a Penn State man, had their names engraved on the cup. Morris Kissel '25, and Keith Snelly, U. of P. star, won the two following years and then Karbach came through with three straight victories.

O-Nix Hosed as Firemen Drive Barnum, Bailey and Ringling Out of Business

whale them at a great big sand bag called Tommie. You pay a dime, of course, (cautiously). It's for a good cause, you know. You are now a Big Bull Elk. But what happens if you knock Tommie over? Hah! Hah! You can't brother, you can't. No one in the world can do it. Not even Bezdach.

"You see, it weighs two hundred pounds and it's nailed in to make sure Saturday night a great big bozo, O-Nix, his name was, come up and wanted to win the box of candy. O Nix, my little wife said (glancing affectionately at the little wife) to egg him on. And say, mister, you should have seen that quarter-ton giant wheeze.

"He wound up, and the first crack landed near the top of the canvas backing. I guess we'll have to raise it a little, say about ten feet, I said, so that none of these people will get hurt.

Ken Loeffler Gives Basketball Course

Thirty-two members have enrolled in the course for coaches of basketball being conducted at Penn State by Kenneth Loeffler, a former Lion player. The course is a part of the regular summer session curriculum and will run until July fifteenth. The men, most of whom are instructors in physical education in high schools and colleges, will receive instruction in theories of play, conditioning of teams and methods of coaching.

Principles discussed in lectures will be carried out in scrimmage as the course develops. A similar course for coaches of football will be held later in the summer, conducted by Herbert McCracken, Lafayette coach.

NOTED LANDSCAPE PAINTER OFFERING SUMMER COURSES

Emile Walters Begins Seventh Year Here as Instructor in School of Art

HAS WON MANY AWARDS FOR OIL REPRODUCTIONS

Sees Opportunities To Develop College's Prestige—Holds Gallery Exhibition

Emile Walters, noted landscape painter who comes from New York City and whose work has been distributed throughout many art galleries and museums both in this country and in Europe, is another of the group of educator celebrities who is offering courses at the Penn State Summer Session.

Mr. Walters by no means a new addition to the summer session faculty for he is beginning his seventh six week period here, having instructed students of art for the past six years and developed the summer school of art at the Nittany institution until now two instructors, instead of one, are required to supervise such work.

MEN OF INDUSTRY GATHER HERE AT CHEMISTRY PARLEY

Scholars, Experts and Scientists Also Included in Galaxy Of Noted Visitors

DOCTOR TEEPLE GIVES OPENING DELIVERANCE

Rideal, Bain, Gillett, Tropsch and Many Others Will Speak During Institute

Occupying one of the most prominent places on the Penn State summer session calendar is the Institute of Chemistry of the American Chemical Society which has been actively engaged in developing scientific research and in offering lectures and talks to summer session attendants since its opening Tuesday morning.

Dr. John Teeple, consulting chemical engineer of New York city and winner of the Perkins medal, one of the most distinguished honors accorded an industrial chemist, opened the day's activities with a talk on economic factors in chemical industry. Doctor Teeple is considered one of the nation's experts in his particular line of work. More than a hundred members were there, Doctor Heist, Dr. Mees, Dr. Holmes and Mr. Haynes led the discussion.

Among the recent arrivals to join the ranks of Penn State's chemist celebrities is Eric K. Rideal of England who came here from New York Monday afternoon. Doctor Rideal is scheduled to talk to the chemists tomorrow. He is also offering daily lectures for the attendants of the Institute.

Rideal Speaks Next Thursday

When Dr. Rideal speaks on catalysis next Thursday, he will provide material that will hold unusual interest for many of the Institute members. Some of the most striking developments in modern chemical industry have been made along the line of catalysis. One of the many industries which utilizes the catalysis method is the sulfuric acid department. Another important application of the theory

Eighteenth Summer Session THE PENNSYLVANIA STATE COLLEGE OFFICIAL ANNOUNCEMENTS

THURSDAY, JULY 7
6:30 p. m.—Motion Picture, "Copper," film produced by General Electric Company. Nittany Theatre. Admission free.
8:00 p. m.—Chemistry Institute lecture, "Leather," by Dr. C. D. McLaughlin, Director of Research Laboratory of Tanneries Council, Chemistry Annex of the Amphitheatre.
8:15 p. m.—Carolyn Le Fevre, violinist, plays in second number of Artists' Entertainment Course, Auditorium. Special fee.

FRIDAY, JULY 8
3:00 p. m.—Lecture and demonstration, "Industrial Oxygen and Liquid Oxygen" by F. P. Gross, Jr., Amphitheatre, Chemistry Annex Building.
6:30 p. m.—Dinner for members of Summer Session Faculty and their wives. Centre Hills Country Club. Price per plate \$1.00. Reservations must be made at the Summer Session office not later than Wednesday noon, July 6th.
6:30 p. m.—Motion Picture, "Oxygen the Wonder Worker." Nittany Theatre. Admission free.
8:00 p. m.—Lecture, "Chemistry and the State," by Dr. Eric K. Rideal.

SATURDAY, JULY 9
8:00 a. m.—Allegheny Mountain Excursion Leaves from front of Auditorium. Secure tickets not later than Friday noon at Summer Session office. Cost of tickets \$1.75 each.
7:00 p. m.—Vesper Song Service. Address by Bishop F. J. McConnell, Pittsburgh. Open Air Theatre.

SUNDAY, JULY 10
3:00 p. m.—Ticket sale, "The Dover Road," Whitney Musser's.
6:30 p. m.—Motion Picture, "The Manufacture of Nickel." Nittany Theatre. Admission free.
7:00 p. m.—Student Assembly and Community Singing. Direction of Professor Grant Auditorium.
8:00 p. m.—Lecture, "Abnormal Psychology and Mental Hygiene" by Dr. H. V. Pike, Director of Clinical Psychiatry, Danville State Hospital for the Insane, Auditorium.
8:00 p. m.—Lecture, "The Use of X-Rays in Diagnosing the Ills of Industry," by Dr. W. P. Davey. Amphitheatre. Chemistry Annex Building.

TUESDAY, JULY 12
6:15 p. m.—Excursion to Penn's Cave. Leaves from front of Auditorium. Secure tickets not later than Tuesday noon at Summer Session Office. Cost of tickets \$.75 each. Does not include cost of admission to cave.
6:30 p. m.—Motion Picture, "Dynamite—Its Manufacture and Use." Nittany Theatre. Admission free.
8:00 p. m.—Lecture, "Industrial and Mechanical Arts in Education," by Mr. Charles F. Bauder, Director, Division of Industrial Arts and Vocational Education, Board of Education, Philadelphia, Pennsylvania, Room 200 Engineering D.
8:00 p. m.—Lecture, "Peroxides, their Manufacture, Properties, and Practical Uses," by Dr. M. J. Rentschler, General Manager of the J. H. R. Products Company of Willoughby, Ohio. Amphitheatre, Chemistry Annex Building.

(Continued on page four)

DR. HOLBROOK RESIGNS AS DEAN OF MINING SCHOOL

Will Become Head of Combined Schools at U. of Pittsburgh—Expresses Regret as He Leaves for Canada Tuesday

RESIGNS POSITION

Dean E. A. Holbrook

GRACE H. CONKLING PRESENTS READINGS

Selections From Her Four Books Delight Capacity Crowd on Wednesday Evening

WILL CONTINUE TALKS AT ENGLISH INSTITUTE

Grace Hazard Conkling, second of the English Institute's visiting lecturers, last night delighted a capacity audience with readings from her four books of verse and from her daughter's, 11 and 12, two.

Mrs. Conkling's visit seems, apparently, to have stimulated an interest in the imagist poets. Herself an admirer of the poetry of Robert Frost and Amy Lowell Mrs. Conkling has done much in her short stay here to bring the work of these poets to the attention of those interested in that form of literature.

Five Years in Mexico
For five years after her marriage Mrs. Conkling lived in Mexico and much of her work suggests lives of Mexican motifs. Her fine cadence, "Tampico," for example.

(Continued on third page)

Phil Page and Sty Pitch Against One Another in Debut

The remnants of Penn State baseball fandom, here for the summer session are commenting on the strange turn that brought two Penn State pitchers from this year's rivalry nine together, as opposing hurlers in an exhibition game last week.

Phil Page, captain of the Lions during the past season, now with the Springfield club of the Eastern League and Joe Styborski, who is getting a tryout with the New York Yankees, were former Penn State pitchers called on to face each other from the mound. Styborski relieved Chesterski who started for the Yankees, and Page went into the box after Taylor had started for the New Englanders.

Styborski's team had a little the better of the argument, winning 10 to 7, due partly to two home runs by Babe Ruth and one by Gehrig.

Styborski and Page were teammates for four years at Penn State and both were exceptionally good hitters. Page led his team in batting this season and played in the outfield when not in the box. Styborski was the Lion's leading home run hitter for two seasons. Both joined their respective professional clubs immediately after graduation two weeks ago.

Nittany Alumni Offer August Summer Party

Officials of the Penn State Alumni Association announced yesterday that the annual "summer party" and outing for graduates and former students would be held on the campus and at the Centre Hills Country Club on Friday and Saturday, August twenty-sixth and twenty-seventh. This has become an annual feature for alumni and attendance has been growing each year. The outing affords opportunity for close contact with College officials.

Continuation of the report that Dean E. A. Holbrook of the School of Mines would leave Penn State and assume the headship of the combined schools of engineering and mining at the University of Pittsburgh, was received yesterday from President R. D. Hatzel. Dean Holbrook's resignation, tendered formally Tuesday afternoon, will be considered by the Board of Trustees at its next regular meeting July 13 to take effect September first.

"I accepted the position as dean in charge of the combined school of engineering and of mines at the University of Pittsburgh, because it was a step into a position of greater possibilities. The University schools are of ones and their combination, to a professional engineer, makes the position an attractive one. I hate like fire to leave, though."

This was Dean Holbrook's only statement on Tuesday. A half hour later he boarded a train for Canada where he expects to be on a business trip for three weeks.

Despite the fact that there were rumors the last several weeks to the effect that Professor Holbrook would resign there had been no official word received until this week. His resignation came as a surprise.

During his five years here as dean of the School of Mines succeeding Dr. E. S. Moore, the Penn State school had come to be the second largest in the country and the largest east of the Mississippi River. Only the Colorado School of Mines boasts a larger enrollment.

It was said of Dean Holbrook that he was the most popular dean at Penn State. He was always keenly interested in student enterprises in (Continued on last page)

CHEMISTS USE FILMS IN EXPLAINING SCIENCE

"Copper" Goes on Nittany Screen Tonight—Specialists Lecture in Huge Amphitheatre

Lectures and films explaining subjects of popular science which are being sponsored by the Institute of Chemistry and which have been offered Tuesday and Wednesday will continue today and tomorrow in the Nittany Theatre and in the Amphitheatre of the Chemistry Annex.

The more oral lectures are on scheduled, one entitled "Leather" and explained by Dr. C. D. McLaughlin, director of the research laboratory of the Tanneries Council and the second on chemistry and the State by Dr. Eric K. Rideal, lecturer on physical chemistry at Cambridge university, England. Dr. Rideal is a Fellow of Trinity Hall.

"Copper" is the name of the film which will be shown in the Nittany Theatre tonight at eight o'clock. The second of the silent lectures will take place at the same theatre at eight o'clock tomorrow night and will have the title of "Oxygen, the Wonder Worker." Both are produced by the Bureau of Mines.

The public as well as students and Institute members is invited to attend these lectures and moving pictures. There will be no admission charge. The film lecture series will continue next week. "The Manufacture of Nickel" will be shown Monday, "Dynamite," a film produced by the du Pont Company, is scheduled for Tuesday and "The Manufacture of Paper" will flash on the screen Wednesday. The first reel is sent by the International Nickel company and the last has been made by the Hammermill Paper company of Erie.

Sewage Operators Will Hold Conference Here

The second annual conference of water filter plant operators and sewage plant operators of Pennsylvania are to be held at the School of Engineering here from July twelfth to fifteenth. Colonel E. D. Walker, head of the civil engineering department, and yesterday that the water filter plant operators would meet on Tuesday and Wednesday of next week, followed by the gathering of sewage operators on Thursday and Friday. Dr. Ralph D. Hetzel, president of the College, is scheduled to address each conference. Similar conventions were held here last year with great success.
