

Notices

The Pennsylvania Dairymen's Association will meet in Old Chapel Friday night at seven-thirty o'clock. The speakers will include President Ralph D. Hetzel and Dr. Raymond A. Dutcher. All persons interested in any phase of dairying are invited to attend.

I. F. C. Delegates Vote On Rushing Tomorrow

(Continued from first page) shall continue until the following Saturday night at eight o'clock. Rushing may be carried on during this period. The second period will start at eleven o'clock at night on the closing day of the first period (Saturday) and will end the following Monday morning at eleven o'clock. During this thirty-six hour period, fraternities may not be in company with freshmen at any time whatsoever. The third period will start at eleven o'clock in the morning of the closing day of the second period (Monday) and will end the following Thursday night at eight o'clock. Rushing may be carried on during this period.

Time of Pledging

After Thursday night at eight o'clock fraternities may not be in company with freshmen at any time until the following Saturday when the freshmen accept the various bids.

Before Friday at noon all fraternities shall send the bid cards of the men they wish to bid, to the office of the Dean of Men. These bid cards shall be sorted by the Board of Control and placed in individual envelopes for the various freshmen. Freshmen shall call for these bids on Saturday between the hours of ten o'clock in the morning and two o'clock in the afternoon. They will signify their acceptance of a bid by appearance for dinner Saturday night.

All dates with freshmen shall be made at the hours, each day, from eleven-thirty o'clock in the morning until five o'clock in the afternoon for lunch and from five o'clock in the afternoon until eleven o'clock at night for smokers.

Date Limited

A fraternity shall have no more than four dates with any one freshman during the periods of rushing season and no more than two dates in any one period.

During a date a fraternity may give a freshman any information it so desires about itself but at no time shall it offer him a bid except at the proper time following the close of the third period. All bids must be given on bid cards to be provided by the Interfraternity Council.

On the first day of Freshman Week each freshman shall be given a card upon which will be printed blank spaces for each date in the rushing season. Fraternity men must sign in the respective blanks for the dates they wish with the freshman. The rushing code will be printed on the back of each date card.

Each fraternity shall post a fifty-dollar bond with the treasurer of the College to cover any violation of the code which might occur. This money will be refunded after the rushing season, if no penalty is incurred.

Will Hold Elections

With the satisfactory passage of the new code the Council will hold the election of officers for next year. The legislative body will meet each week until some definite agreement is reached concerning a new rushing and pledging system.

ENGINEERING LEADERS PLAN CONCLAVE HERE

Will Devise New Methods for Serving Industries of Pennsylvania

With the graduation of one hundred thirteen men from night branch schools in six Pennsylvania cities, officials of the College engineering extension department are turning their attention to the thirteenth annual engineering convention to be held here May twenty-four to twenty-six. Representatives of scores of Pennsylvania industries will attend the extension convention here the latter part of this month. The purpose of the gathering will be to devise additional methods by which the College can better serve the industries of the state and consult them concerning their employee training plans.

The branch schools of the department have had their most successful year in the history of extension work at Penn State. Special graduation certificates were awarded to twenty-seven men completing the three and four year courses at Wilkes-Barre; fifteen at Williamsport, twenty-five at Allentown, twenty-two at Reading, and twenty at Scranton. Although the school at Erie is but two years old, four students who started with advanced standing were graduated.

An industrial conference has been called by Robert L. Sackett, dean of the School of Engineering, to be held at the same time as the extension convention. Training of undergraduates for the industries will be considered by personnel directors and officers of the largest industrial plants in the state.

Reached concerning a new rushing and pledging system. Wilson S. Creal, Harry V. Fritchman, Richard A. Geuder, George H. Jackson, James K. Rankin, William S. Turner and Fred H. Yocum, all of the junior class, have been nominated for the office of president of the Greek governing group. Nominees for secretary and treasurer are Homer K. Dodge, '29, Richard M. Strecker, '29 and Nelson F. Wicks, '29.

Physics Department Opens Modern Repair Laboratory

In order to provide graduate students in the School of Chemistry and Physics with special apparatus, a new shop has been opened in the chemistry building, capable of making or repairing any apparatus used in that school. According to Dr. Wheeler P. Davey of the department of physical chemistry, these new conveniences will allow the college to take care of a larger enrollment of graduate students, at a lower cost, since formerly much of the money paid for necessary apparatus was profit for the manufacturer.

The equipment of the new shop is adequate for all the present requirements, and is of the most modern type. There are three lathes, a bench lathe, made available to the college

by Dr. G. W. Sargent, a precision lathe, which will turn out a piece of metal to the accuracy of one ten-thousandth of an inch and a large lathe, the largest in the college on which a piece of metal twenty-five inches in diameter can be worked. There are two drill presses, a milling machine, and a shaper. The shop is provided with complete carpentry and storage battery equipment. The machinery also includes an apparatus of the atomic hydrogen type that will weld metals successfully that can be welded no other way. Included in the shop but located in the chemistry annex, there is glass-blowing equipment for special glassware. The outstanding characteristic of the shop is its efficiency.

Students Arrange for Move-Up Day Program

(Continued from first page) L. Heckler '29, and David R. Pratt '28, as his assistants. In previous years, the Student Council decree went into effect at one o'clock with a parade to the scene of the underclass escapade. As in former years, seniors will probably don Lion suits, junior class blazers, sophomore sweaters and freshmen will discard dinks, black socks and ties for civvies and socks of colorful patterns and headpieces of human shape. The freshmen must wear dinks to the economics, however, with a hat to wear after the traditional burning of the green dinks.

Lion Batters Prepare For Syracuse Game

(Continued from first page) In contact, with Al Lesko receiving the slants of the Bezekian fingers and Lungren, Dobielaar, Kent and Wolf holding down the infield positions in the order named. George Delp, Gene Singley and Captain Bus Harrington will protect left, center and right fields, respectively.

Mr. C. E. Smith, representing the New York Cannery and selling Lily of the Valley canned goods, will be in town all this week to call on fraternity caterers.

(Continued from first page) zation, who will also preside at the meeting.

During this gathering President Ralph D. Hetzel, Dean Charlotte E. Ray, and Arthur R. Warnock, dean of men, will make addresses. Miss Ellen Burkholder '28, president of the Women's Student Government Association, and Charles C. Berryhill '28, president of Student Council, will also welcome the visiting parents.

An array of five sports events has been scheduled for the afternoon to provide entertainment for the guests. Penn State varsity teams will clash with Albright college in baseball, Swarthmore in lacrosse, Pitt in a dual track and field meet, Carnegie Tech in tennis and George Washington in golf.

May Day Exercises In addition to a production by the Penn State Players which will be staged at eight-fifteen o'clock, the women students will furnish entertainment with the observance of their annual May Fete at seven o'clock. At the latter exercises Miss Eliza-

Enjoys Can of Tobacco 16 Years Old

Watahachie, Texas May 18, 1926 Larus & Bro. Co. Richmond, Va. Gentlemen: The agent while going through his plunder stored in our baggage room came across a can of your tobacco, and account of his not using a pipe he made me a present of this tobacco. You will note the revenue stamp and your memo which was inclosed. The tobacco was put up in 1910, sixteen years ago. But it was in good shape, of remarkable flavor, and was greatly enjoyed by me. I thought you would be interested in knowing how your tobacco held out in these days of fast living. Yours very truly, (signed) Gordon McDonald

beth Hazel '28, will perform the regal duties of the May Queen with Miss Anne Mellinger '31, as her attendant. Miss Margaret Girvan '29, chairman of the May Day committee, also announces that following the crowning of the May Queen, a play will be presented in the open air theatre on the front campus. The leading roles of this drama, which is entitled "Told in a Japanese Garden," will be taken by Miss Lola Haid '31, and Miss Helen Buckwalter '31.

Student Council Will Hold General Election

(Continued from first page) ty of any building in which there is a voting booth, will be prohibited. All

names of those breaking the rules of procedure will be reported to Student Council and published in the Collegian. If a violator of the rules should obtain office, the candidate receiving the next highest number of votes shall take his place.

THAT VARSITY DRAG!

"Down on your heels, up on your toes, "Is that the way that the 'Good News' goes? "May he not the words, but it certainly feels "Like the lively rhythm of Wingfoot Heels!" NOW come the perfect days of the college year—the swing-outs, the meets, the picnics, the sophomore-senior proms, and then the big parade! The fresh has almost worn off the frosh, and from one end of the campus to the other you'll hear mighty few pairs of the old hard heels. The world has gone Wing-foot, that's why. And so it should. Goodyear Wingfoot Heels are rubber—new, live, cushioning rubber—rubber that gives, and lifts, and helps. They have that "look! look!" style, and they wear like a new gold key. More people walk on Goodyear Wingfoot Heels than on any other kind. Get in line! A minute's huddle with your favorite shoe repairman, and you're stepping out on Goodyear Wing-foot Heels. Yes, today!

When Dad was a "Modern Youth"

BICYCLES, stereopticon lectures, and the "gilded" youths with their horses and carts; at night the midnight oil burning in student lamps while the gas lights glared and flickered across the campus—the gay nineties when Dad was in college seem primitive to us today. Now it's sport roadsters, the movies, and radios. At night the MAZDA lamp replaces the midnight oil in dormitory rooms, while modern street lighting sheds its friendly glow over the campus. Without electricity we would have none of these improvements. To-day's marvel of electrical invention becomes to-morrow's accepted utility. In the coming years, by taking advantage of new uses of electricity you will be able to go so much farther that the "tearing twenties" will seem just as primitive as the "gay nineties".
