

That good COFFEE and Toasted Sandwiches

GREGORY'S

Notices

Mrs. William D. Crockett will give an illustrated lecture on Europe at 6:30 o'clock tomorrow night in the lobby of McAllister Hall. Slides of European scenes will be shown.

Those fraternities and non-fraternity men wishing to have booths in the Freshman Mid-Winter Carnival will please call Harry McCoy, Delta Sigma Phi house, before Friday.

There will be an A. S. C. E. meeting in Room 200 Engineering D at 7:30 o'clock tonight.

Onlooking Canine Usurps Spotlight From Wrestlers

A member of the canine tribe completely usurped the spotlight from two struggling matmen during the course of the wrestling meet between Lafayette and Penn State in Recreation Hall Saturday.

Essemer and Sargent, of Lafayette, had come to grip and were engaging in a very exciting match. The spectators, paying close attention to the writhing bodies of the grapplers, suddenly became aware of a dog advancing steadily and dignifiedly across the floor. Disregarding the whistles and calls of the onlookers, he slowly came up to the mat and favored the combatants with a bored, sophisticated, yet slightly interested, glance.

One of the students seated near the Penn State bench attempted to seize "M. Mutu" by the neck. Jumping quickly away, our hero gave the would-be dog-catcher such a reproachful look that he sank back to his seat very sheepishly.

After carefully considering his master's pleas to desist, the dog consented to be seated on the bench near Coach Spindel, where he soon lost himself in rapt contemplation of the matches.

Fist Students Came To College in Sleds

(Continued from first page)

On the college farms and nine hours in laboratories and lecture rooms. Celebrated for his proof of the assimilation of nitrogen by plants, Dr. Evan Pugh became the first president of the institution in 1859. The next legislature appropriated \$49,000 for the completion of Old Main. It was under Dr. Pugh's brief administration of four years that the institution laid the foundation as a leader in agricultural education and research, and his vision is partly responsible for the founding of the land grant colleges, one in each state.

It was about the time that the State Agricultural society was preparing to establish the new school that agricultural and industrial leaders were active in Washington. The demand for a different type of higher education resulted in the passage of the Morrill Land Grant College Act of Congress, which was signed by Abraham Lincoln on July 2, 1862. It provided for the establishment of institutions of higher learning, where it was specified that "the leading object shall be to promote the liberal and practical education of the industrial classes in the several pursuits and professions of life." On April 1 of the next year the Pennsylvania legislature passed an act declaring "the Morrill Act is hereby accepted by the State of Pennsylvania, with all its provisions and conditions, and the faith of the State is hereby pledged to carry the same into effect." This act named what is now the Pennsylvania State College as the land grant college of the state.

Coincident to the celebration Saturday of the seventieth anniversary of its opening, is the recent announcement that the Old Main Building, which stood for the first thirty years of the college life as the only academic building on the campus, is to be torn down next summer and rebuilt with the same weathered limestone to carry on the ancient traditions of the college. It has been vacated by student classes, and its upper floors were long since condemned as unsafe.

There are few living residents of the community who can recall the opening day of seventy years ago. The section then was entirely rural, and the only industries of the neighborhood were iron ore quarries and iron furnaces. There was no town here—not even a cross road tavern.

Following the conditions of the Morrill Act, the Penn State college of today is a leader among the land grant colleges, and while not so large and well supported as the great state universities of Illinois, California, Wisconsin, Michigan and other western states, the Pennsylvania link in the great chain enjoys the distinction of having the third largest School of Agriculture in the United States, the largest School of Mines and Metallurgy in the country, the third largest School of Engineering in the east, a resident body of over 4000 young men and women, and through its extension schools and courses takes practical instruction to more than 25,000 people each year. The 200 acres of land that were held at the start have grown to over 2000 acres, and through alumni gifts and state appropriations, a \$2,000,000 two-year building program is being brought to completion.

The Governor's budget for the next two years would provide \$6,211,000 for college work, including \$2,250,000 for buildings, and the future steady growth of the institution and its service to the Commonwealth is increasing brighter as the years go by.

KAPPA DELTA PI ELECTIONS

That 47th Improvement

... Pressureless Touch

Geo. S. Parker's latest, in the Modern Duofold—aids college work immensely

Think of this: A pen that's 28% lighter than rubber, yet this light weight alone is all that is required to start it writing at the first touch of the point to paper. And keep it writing—smoothly, evenly and beautifully at any speed!

Finger-pressure is relieved! No bearing down! No effort! Merely guidance from your hand—the pen itself does all the writing for you!

And none of the interruptions or intrusions that any other kind of pen has ever caused before—a gliding, smooth response that clears the track for THINKING, thus producing BETTER thoughts for class-room or home work.

So smooth and even that all papers take ink better from it. This is Geo. S. Parker's 47th improvement in a fountain pen, known as Parker Pressureless Touch.

The result is the most able pen you've ever used—a pen we guarantee forever against all defects so its benefits to you are everlasting.

Try it without obligation at any nearby pen counter today. All dealers are glad to have you demonstrate it to yourself. Other Parker Duofold features are: Barrels of Parker Permanent, Non-Breakable, Ink-Tight Duo-Sleeve Cap, Non-Leakable, Choice of Five Flashing Colors and New, Modern Black and Pearl, the Latest Mode.

Every genuine Parker Duofold Pen or Fencil is stamped "Geo. S. Parker—DUOFOLD" on the barrel. That is there for your protection. See it when you buy.

Who are planning to enter the Business World

What Other College Men Have Done With Kresge

"Graduating from Western Reserve University in 1921, I began business life with an idea that I was led for managerial work. I left my comfortable desk work and started in the stockroom. Then I worked successively as floor manager, assistant manager, and manager. I then received my biggest promotion, and today I am happily located in an executive position, with increased responsibilities. The financial return that has come to me exceeds all that I had expected."

Colby B. S. '15—Wesleyan M. S. 1917
"A Phi Beta Kappa man became an instructor until 1920, then assistant head chemist for an Eastern manufacturer until 1922 when he entered the Kresge organization to take the training course. He is now a manager of a Kresge store and claims "Today I find myself receiving a greater income than the teachers and industrial acquaintances who sought to discourage me for making such a radical change of occupation."

A Missouri University graduate enthusiastically relates the following:
"In June of 1923, just after I had been presented with my much treasured sheepskin, a gray haired gentleman with years of experience said to me: 'Just what the future holds for you will depend largely on the grade you sow during the next few years. Take my advice and sow some good company, begin at the bottom and work your way to the top.'"

I followed his advice by starting in the stockroom of a Kresge store on December 8, 1923. Today I am managing my first store, happy in the thought that I am on the road to success."

What Others Have Done You Can Do

A Bucknell College graduate writes:
"After graduating from college with the degree of B. S. and M. A. I accepted a position as Chemistry instructor in a small college. After two years as an instructor, I became dissatisfied and decided to enter the business world."

I became acquainted with an enthusiastic Kresge manager, who gladly explained their system of training men to become store managers. Shortly after that I started in the stockroom, received promotions according to my ability to earn them, and today although a successful store manager I am in line for still greater responsibilities.

I know of no other organization where a man's efforts will be better repaid than with the Kresge Company."

An alumnus of the University of Michigan class of 1922 says: "The most important problem confronting me the last semester in school was choosing the 'job' that would begin when campus days were over. To make the right start in the business world was my ambition. I turned down several soft map jobs, the kind that paid fairly well to start but held no future, for a stockroom job with the Kresge Company which paid little to start but offered a definite future. I completed my education with good common sense, and after applying myself diligently, I was rapidly promoted to greater responsibilities."

Today I am manager of a good sized store, and gladly recommend the Kresge Company as a means to a definite end, providing you possess the necessary qualifications and a whole hearted desire to succeed."
