

### COLLEGE TO OPEN POND LABORATORY

Modern and Complete Addition Will House All Research Work In Chemistry

The Pond Laboratory addition, said to be the most modern and complete of its kind in any American college, will be opened to sophomore, junior and senior chemists with the opening of College Wednesday noon.

Its design and equipment were planned by Dr. Gerald L. Wendt, former dean of the School of Chemistry and Physics and now assistant to the president of the College in research. The addition completes the first of three large units for a science group, and is built of white stone.

The chemistry library will be moved from the Old Track house to the floor of the new unit. A physical and micro-chemistry laboratory will occupy the first floor, while X-ray apparatus will be housed in the lower floors.

Room For 1000 Students  
On the floor above are large organic and analytical chemistry laboratories. The three floors are equipped with enough work cabinets and desks to permit more than 1000 students use of the labs in a 32-hour week on a maximum schedule.

The basement will be devoted to physical chemistry research, and three new research laboratories give opportunity for almost any kind of research work in X-ray crystal structure analysis, organic, inorganic, and analytical chemistry.

Three private research laboratories for the use of advanced students of chemistry are provided in the new building. Larger classes in chemistry work will be cared for under these increased facilities.

### DR. WHITMORE BEGINS DUTIES AS NEW DEAN

Dr. Frank C. Whitmore, of Northwestern university, has assumed his duties as Dean of the Chemistry and Physics school, succeeding Dr. Gerald F. Wendt, now assistant to President Hetzel in scientific and industrial research.

Dr. Whitmore was formerly head of the chemistry department at the Illinois institution. He will also continue his studies of organic metal compounds through which he has won international recognition. Under his supervision more than \$16,000 will be awarded yearly in research fellowships in the Chemistry and Physics school.

### EAST MEETS WEST AS CHINA, PENN STATE TRADE STUDENTS

Passing through Iowa on his way to China, Lester M. Zook '29, met Shuo Tsoi To, Lingnan university '26. Zook continued on his way to Lingnan university in Canton accompanied by G. W. (Daddy) Groff '07, while Mr. To came to Penn State to take graduate work in Animal Husbandry.

At the Iowa State university in Ames, the only Chinese student now at Penn State took his master's degree. He was awarded his bachelor's degree at Lingnan.

While an undergraduate, Mr. To became acquainted with Penn State through Daddy Groff who recently became Dean of the School of Agriculture at the Canton institution. He learned French from Edward R. Van Sant, present instructor in English, who was then an instructor in the Canton Christian college.

Planning to return to China immediately after obtaining his master's degree, Mr. To came to State College to visit the East, Penn State and to see Dean Ralph L. Watts, head of the School of Agriculture and a member of the Lingnan university Board of Trustees.

Dean Watts convinced the Chinese

student that a year spent in the School of Agriculture here would materially increase his worth as an instructor at Lingnan. A scholarship, covering a large part of his expenses, enabled the Lingnan graduate to follow the counsel of his advisor. He does not expect to remain long enough to receive his doctor's degree.

"The years I spent at Lingnan were significant in the history of the institution," Mr. To said. "When I entered it was merely the Canton Christian college, supported by contributions from Penn State students, and from several other private subscriptions.

"Now it is Lingnan university, and has five separate colleges. In April the students began a campaign to raise \$1,000,000 to enlarge and equip the newly established medicine school. The past few years have been years of a great awakening to the younger generation of Chinese," he explained.

Mr. To will visit the east coast of the United States before he returns to Canton. On his way to China he will travel westward across the country and sail from San Francisco.

### Campus Bulletin

S. A. J. meetings will begin at 6:30 Sunday night in the Auditorium. The society will meet weekly thereafter during the College year (except on official holidays). Jewish students who do not elect chapel for worship have the alternative of attending this society's meetings.

Candidates for the staff of the Old Main Bell are requested to report immediately to Robert P. Stevenson at Theta Upsilon Omega or M. Alexander Spear at Alpha Sigma Phi.

Candidates for the Olewine scholarship must give their names to Miss Charlotte E. Ray in her office before September 27. This scholarship is the gift of Mrs. Elizabeth Olewine, a noted alumnus and means \$100 to the

recipient. Only freshmen girls who are residents of Centre county are eligible. COLLEGIAN subscribers may receive their copy of today's issue at Co-op corner today by presenting receipt.
