# Seventy-Five Years of Progress

Rebuilt "Old Main" Hub of Penn State Campus

### To the Faculty, Alumni, Students, and Friends of Penn State:-

It is our pleasure at this time to present to you the results of our handiwork begun a year and a half ago. Although the destruction of the old building first caused many a sigh, we are certain that the new edifice has salved that former hurt.

During the past year, our men have been busy erecting from the stone of the old structure this new and more modern building. It is now ready to take its place on the Penn State campus as a student activities center and main College administration headquarters.

We are certain that you share with us at this time the feeling of satisfaction always present when a task has been well done. Standing out as a guide post in the Nittany Valley, Old Main is a fitting memorial for our consummate endeavors.
