

### LIONS TO ENTER MIT TOURNAMENT

(Continued from past page)

against Captain Paul Vicari, of Syracuse, in the 115-pound class, according to the drawings at the Association meeting Sunday. Davey Stoop, present titleholder in the 115-pound class will make a bid for the 125-pound crown against Captain Shadel, of Penn.

In their second meeting this year, Johnny McAndrews will face Captain Doug Crosby, Western Maryland, in the 135-pound division, and Al Lewis will enter the ring against Ross, of Syracuse, in the 145-pound class, for the second time within a week. Ekatus, Western Maryland, will meet the Lion 175-pounder, either Girvan or Miller, while Crunkley, Navy, will face either Miller or Skoberne, Nittany Heavy.

Referees for the tournament will be Bryan Hayes, of Philadelphia, and John Lucas, of the University of Pennsylvania. The work will be divided evenly between the two men, but Lucas will not referee any bouts in which a Penn entry is fighting because of his connection with that institution.

Managers Meet Today  
Upholding its former rulings, the Association decided that the seconds must be undergraduates, and the coaches shall not sit on the bench. Contestants are not supposed to be in communication with the coach after they leave the dressing room. The wrapping of a boxer's hands with handgrips was made optional, but the Association decided that the wrappings could not extend above the wrist.

Final arrangements for the tournament will be made at a meeting of the boxing managers from the colleges represented at 2 o'clock Friday

### Bio-Chemist Helps Police Capture Criminals by Taking Blood Tests

To save life and to put it in jeopardy are two tasks for which Dr. Arthur von K. Anderson, of the department of biological chemistry, is called upon to perform. The physician and the police official alike come to him for confirmation of their suspicions.

Dr. Anderson has been called in twice on murder cases to test supposed blood stains, the guilt or innocence of some human being to be established by the results of the experiments.

At least once a week, some doctor in the town receives a patient whose illness cannot be detected by the ordinary means. The patient is sent to Dr. Anderson, who usually succeeds in diagnosing the case by blood tests. One-tenth of a cubic centimeter, or three drops of blood is all that is

required in this test, in comparison to the method used heretofore which required ten times as much. The process developed by Dr. Anderson has the advantage of requiring only the pricking a finger instead of tapping an artery, which was often difficult in more obese people, or those deficient in blood.

In giving his students an example of the importance and delicacy of experimental work of this type, the chemist has performed tests with the blood of rats and cattle the results of which were published in several technical magazines.

The majority of cases diagnosed have been diabetic, kidney or appendicitis. Most of the physicians in the borough have at one time or another entrusted cases to Dr. Anderson.

### ARCHITECT SOCIETY AWARDS STUDENT DRAWING MENTION

Essex II Thomas '31 received one of six mentions awarded in the recent intercollegiate competition of senior landscape architecture problems under the auspices of the American Society of Landscape Architects in New York city recently.

Penn State received special compliments on the general excellence of submitted problems in a report from the judges. Cornell, Pennsylvania, Iowa, and the University of Cincinnati received mention also.

afternoon. The contestants will weigh in at 4 o'clock and the doctor's physical examination will be made at that time. There will be a meeting of the Association at 10 o'clock Saturday morning.

### PLAN MORE ROCKVIEW TRIPS

Because of the popularity of Saturday's trip to the Western Penitentiary at Rockview the Y. M. C. A. is planning future excursions of this kind, it was announced today. These trips will be held on future Saturday afternoons or at a suitable date.

# What the NEW HUMIDOR PACK means to Camel Smokers\*

COMPARE a package of Camels with any other cigarette and note the difference in the technique of packing.

Note that Camels are completely enclosed in an outer transparent cover of moisture-proof cellophane and sealed air-tight at every point.

We call this outer shell the Humidor Pack. It differs from the ordinary cellophane pack and while it is egg-shell thin, it means a lot in terms of cigarette enjoyment.

It means, for instance, that evaporation is checkmated and that Salt Lake City can now have as good Camels as Winston-Salem.

While Camels are made of a blend of the choicest Turkish and mellowest domestic tobaccos, it is highly important, if you are to get full benefit of this quality, that these cigarettes come to you with their natural moisture content still intact.

The Humidor Pack insures that. It prevents the fine tobaccos of Camels from drying out and losing any of their delightful flavor.

Aside from cheap tobacco, two factors in a cigarette can mar the smoker's pleasure:

*Fine particles of peppery dust if left in the tobacco by inefficient cleaning methods sting and irritate delicate throat membrane.*

*Dry tobacco, robbed of its natural moisture by scorching or by evaporation gives off a hot smoke that burns the throat with every inhalation.*

We take every precaution against these factors here at Winston-Salem.

A special vacuum cleaning apparatus removes dust and now the new Humidor Pack prevents dryness.

Check the difference yourself. It is a very simple matter to check the difference between Humidor Packed

Camels and other ordinary dry cigarettes.

First of all you can feel the difference as you roll the cigarettes between your fingers. Camels are full-bodied and pliable. A dry cigarette crumbles under pressure and sheds tobacco.

If you will hold a cigarette to each ear and roll them with your fingers you can actually hear the difference.

The real test of course is to smoke them. And here's where the new Humidor Pack proves a real blessing to the smoker.

As you inhale the cool, fragrant smoke from a Camel you get all the mildness and magic of the fine tobaccos of which it is blended.

But when you draw in the hot smoke from a dried cigarette see how flat and brackish it is by comparison and how harsh it is to your throat.

If you are a regular Camel smoker you have already noticed what proper condition of the cigarette means.

But if you haven't tried Camels in the new Humidor Pack you have a new adventure with Lady Nicotine in store.

Switch your affections for just one day, then go back to your old love tomorrow if you can.

R. J. REYNOLDS TOBACCO COMPANY, Winston-Salem, N.C.
