

I. M. COURT TILTS WILL END FRIDAY

4 Teams Eliminated in Contests Yesterday—3 More Games Scheduled Tonight

With four games played last night and three more scheduled for tonight, the intramural basketball tournament will probably come to an end by Friday night, according to Manager Robert H. Beatty.

Contests fought out last night were the Chi Phi-Kappa Sigma, Delta Upsilon-Phi Kappa Sigma, Penn State Ramblers-Sigma Nu, and Phi Delta Theta-Penn State Club sets.

Delta Upsilon Wins
Three games will see as many teams eliminated from competition tonight. Those scheduled are between Beta Theta Pi-Chi Upsilon, Lambda Chi Alpha-Phi Gamma Delta, and Delta Sigma Phi-Theta Upsilon Omega.

Alpha Chi Rho, drew a bye, since there are fifteen teams in the finals representing five leagues of twelve teams each, which were originally entered in the tournament.

The last league game took place Thursday night when Delta Upsilon and Alpha Kappa Pi, both undefeated, met to decide which was to be the third representative of that group Delta Upsilon won.

VARSITY RIFLE TEAM WINS MATCH FROM GETTYSBURG

The varsity rifle team defeated Gettysburg College in a shoulder-to-shoulder match here Saturday by the score of 1312-to-1266. Captain Edwin F. Wolcott '32, led the State marksmen with a 279 out of a possible 300. Jacobs, of Gettysburg, received second honors with a score of 261.

Two more shoulder-to-shoulder matches with West Virginia and Carnegie Tech remain on the varsity schedule before the team travels to compete in the National Intercollegiate at the George Washington University in Washington, D. C., on March 16.

I. M. BOXERS OPEN TOURNEY TONIGHT

30 Fighters of 115, 155-Pound Classes Will Compete in Recreation Hall at 6:30 O'clock

The intramural boxing tourney starts tonight at 6:30 o'clock when thirty fighters in two weight classes will be matched in the opening battles. This year men will compete for the 115-pound title, while seventeen 155-pounders are registered.

Anyone entered in the inter-class contests to be held this afternoon will not be allowed to compete, according to John A. Wood '33, manager, because of the strain of two fights in one day. All entries in the two classes are to be weighed in at Recreation hall by noon today, and must present health certificates signed by Doctor Ratenour.

Seventeen groups will be represented in the fights tonight. Two of them will have more than one man competing in each weight.

DEPTH SOUNDERS FOR AIRCRAFT

WITH the application of electricity to aircraft instruments, another chapter was written in the annals of air transportation. To-day's ship is not only swifter but safer and more dependable. Modern depth-sounding devices indicate instantly the height of the ship above the ground surface. A unique feature of General Electric's recently purchased monoplane is the almost completely electrified instrument panel.

The most recently developed instrument is the sonic altimeter, which provides a quick means of indicating changes in height above ground. Sound from an intermittently operated air whistle is directed downward. The echo is picked up in a receiving megaphone, and the sound is heard through a stethoscope. The elapsed time between the sound and the echo determines the height. Tests show that water, buildings, woods, etc., produce echoes that are different and characteristic.

Besides developing a complete system of aircraft instruments, college trained General Electric engineers have pioneered in every electrical field—on land, on sea, and in the air.
