GROUP INSURANCE PLAN ADOPTED BY COLLEGE FACULTY

75 Percent of Staff Members Accept Policies To Make Program Effective

INSTITUTION WILL SHARE IN PREMIUM PAYMENTS

Permanent Disability Protection Offered Holders—Amounts Based Upon Salaries

Seventy-five percent of full-time college staff members accepted policies in meetings last week to complete the requirement for placing a program of group insurance in effect here.

With premiums to be paid jointly by the college and the policy holder the system is on a contributory basis. Providing two services, the program offers life insurance and a permanent disability clause. Policies will range from one to ten thousand dollars with amounts for individuals based on salary. In case of total or permanent disability from disease monthly payments are to be made after a six months period of idleness.

May Join Until June 1

The opportunity to join in the plan is open to full-time staff members until June 1. After that time any eligible staff member will be required to pass a medical examination and will not become eligible for the disability provision for a year after signing.

New appointments to the college staffs are automatically taken into the program with the exception of full-time clerical and labor forces who must serve a six months probation period before the insurance becomes effective.

The contract for the system is held by the Equitable Assurance Society of the United States which has held a similar insurance policy for members of the agricultural extension staff for several years.

Has Trustee Approval

Having its origins in faculty discussion and movements, the program for group insurance was definitely launched two years ago when President Ralph D. Hetzel appointed a faculty-administration committee to make a study. Following this investigation a committee of the Trustees made further inquiry and finally the insurance system was passed by the Board at its January meeting.

In addition to the protection afforded by the new policy, staff members are covered for accident insurance under an older State provision. A system for retirement annuities is the next problem according to College officials.
